In the olden days, people ate early because there was hardly any light after sunset. Their next meal would only be after sunrise. This practice spread to all religions as a discipline due to its health and spiritual benefits. Today, it is called the dry fasting diet-the most superior form of fasting and cleansing. Replicating it requires abstinence from all food and water for twelve or more hours. Luke Coutinho and Sheikh Abdul Aziz Nuaimi teach us how this diet can stimulate the body, help one find the right balance between the 'elimination phase' and the 'building phase', aid weight loss and avoid a number of diseases. From beauty to general well-being, discover the miracle of dry fasting and the route to a new you.

**This book is an elementary introduction to  $p$ -adic analysis from the number theory perspective. With over 100 exercises included, it will acquaint the non-expert to the basic ideas of the theory and encourage the novice to enter this fertile field of research. The main focus of the book is the study of  $p$ -adic  $L$ -functions and their analytic properties. It begins with a basic introduction to Bernoulli numbers and continues with establishing the Kummer congruences. These congruences are then used to construct the  $p$ -adic analog of the Riemann zeta function and  $p$ -adic analogs of Dirichlet's  $L$ -functions. Featured is a chapter on how to apply the theory of Newton polygons to determine Galois groups of polynomials over the rational number field. As motivation for further study, the final chapter introduces Iwasawa theory. The book treats the subject informally, making the text accessible to non-experts. It would make a nice independent text for a course geared toward advanced undergraduates through beginning graduate students.**

As the country that inspires the world with 'gross national happiness' development philosophy, Bhutan is striving to pursue its economic growth while committing to its core values of green development. Even with robust economic growth rates, Bhutan's dependence on imports and hydropower revenues drives the country to search for self-reliant options to fuel further decarbonizing the economy. Electric vehicle is being explored as one of the key policies to introduce green mobility, reduce fossil fuel imports and put the country firmly on a green path. Globally, electric vehicles market and technology are still in the nascent stage but are developing rapidly. The automotive industry has adopted electrification as a pillar of future technology. EV uptake is expected to increase significantly with ongoing improvements in technology and resulting cost decreases in the global market. This report aims to help Bhutan explore various technical and policy issues of introducing electric vehicles in its own context. It analyses a variety of factors that will impact adoption of electric vehicles from technical, manufacturing, feasibility to consumer awareness and stakeholders' capacity. It also addresses several policy questions which are at the heart of public debate such as affordability of the government program, economic costs and benefits, distributional impact, fiscal, and macroeconomic implications. Drawing from vast international experiences, the report examines in great detail how global cutting-edge technology like electric vehicles could be pursued in the context of developing economies with different socio-economic characteristics and constraints compared to developed economies. It will help readers better grasp the technical, financial, economic and social challenges as well as opportunities in initiating electric vehicles program and provide practical recommendations that will be useful for policy makers in designing their own EV initiative.

Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This book is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for graduate-level courses in international management.
