Bibliographic Guide to Education

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

This is the first book to tackle investment law and trade law jointly, and to compare the principles, rules, and dispute-settlement mechanisms of investment agreements with the multilateral framework of the WTO/GATS. Among the many invaluable questions the book addresses are the following: What are the substantive rules that apply to investment in services under investment agreements and the GATS? How do these disciplines differ? Which offers the best protection for investors in services and do they affect the governments' policymaking capacity? Who can gain access to investor-State arbitration and WTO dispute settlement? The in-depth analysis, supported by an extensive review of existent jurisprudence, provides a thorough explanation of treaty standards like most favoured nation, national treatment, fair and equitable treatment, domestic regulation, and transparency, as well as procedural rules on access to the dispute-settlement mechanisms and enforcement procedures.
