The Irish Civil War and Society sheds new light on the social currents shaping the Irish Civil War, from the 'politics of respectability' behind animosities and discourses; to the intersection of social conflicts with political violence; to the social dimensions of the war's messy aftermath.

At the heart of this vibrant saga is a vast ship, the Ibis. Its destiny is a tumultuous voyage across the Indian Ocean; its purpose, to fight China's vicious nineteenth-century Opium Wars. As for the crew, they are a motley array of sailors and stowaways, coolies and convicts. In a time of colonial upheaval, fate has thrown

together a diverse cast of Indians and Westerners, from a bankrupt raja to a widowed tribeswoman, from a mulatto American freedman to a freespirited French orphan. As their old family ties are washed away, they, like their historical counterparts, come to view themselves as jahaj-bhais, or ship-brothers. An unlikely dynasty is born, which will span continents, races, and generations. The vast sweep of this historical adventure spans the lush poppy fields of the Ganges, the rolling high seas, the exotic

The National Library of Ireland is a major source for the study of the Irish Famine. Its collections include the newspapers, the parliamentary debates, and the various official reports published at the time. The Department of Manuscripts holds the records of many of the great landed estates, which provide primary

evidence on the landlords' role in the crisis. The Library's extensive collection of prints and drawings enables us to visualise conditions at the time, and to empathise with our ancestors in their travails. To give as broad an understanding as possible of this vast and complex subject, the book also includes documents and illustrations from a number of other repositories. They include the National Archives, the Department of Irish Folklore at University College Dublin, Dublin Diocesan Archives, Birmingham Library Services, the British Library, the National Library

of Scotland, the McKinney Library in Albany, U.S.A., and the National Archives of Canada. This paper provides an extensive review of different aspects of five shellfish-poisoning syndromes (paralytic, diarrhoeic, amnesic, neurologic and azapiracid), as well as one fish-poisoning syndrome (ciguatera fish poisoning), and discusses in detail the causative toxins produced by marine organisms, chemical structures and analytical methods of the toxins, habitat and occurrence of the toxin-producing organisms, case studies and existing

regulations. Based on this analysis, risk assessments are carried out for each of the toxins, and recommendations are elaborated to improve the management of these risks in order to reduce the harmful effect of these toxins on public health.

This book tackles a hitherto neglected topic by presenting Ireland as very much a part of the Black Atlantic world. It shows how slaves and sugar produced economic and political change in Eighteenth-century Ireland and discusses the role of Irish emigrants in slave societies in the Caribbean and North America.

The singer's younger brother describes their close relationship and explores little-known aspects of her life, from their shared childhood

in Michigan to her successful music career, many transformations, and personal challenges. Are you worried and anxious about the present state of the world? Are you concerned about your future and that of your family? Do you want to live better, cheaper and healthier? Without worrying about politics, war, money problems, government surveillance, keeping up with the Joneses or even the unthinkable -- nuclear Armageddon? Then consider bugging out to Belize, the little English-speaking country on the Caribbean Coast. It's so close, yet so far from

most of the world's problems. Bug Out to Belize by Lan Sluder tells you how to do it: What areas are best ? How much does it costs to live in Belize? How do you get residency? What are the pitfalls to avoid? And, how to make the move! Written by a leading expert on Belize, an award-winning reporter, newspaper and magazine editor, contributor to leading publications around the world including the New York Times, Caribbean Travel & Life, Chicago Tribune, Miami Herald and the Globe and Mail, and author of more than 20 books, Bug Out to Belize can guide

you to a better, more worry-free future in beautiful Belize, the friendly, affordable, frost-free and English-speaking little country on the Caribbean Coast.

Is management a profession? Should it

be? Can it be? This major work of social and intellectual history reveals how such questions have driven business education and shaped American management and society for more than a century. The book is also a call for reform. Rakesh Khurana shows that university-based business schools were founded to train a professional class of managers in the mold of doctors and lawyers but have effectively retreated from that goal, leaving a gaping moral

hole at the center of business education and perhaps in management itself. Khurana begins in the late nineteenth century, when members of an emerging managerial elite, seeking social status to match the wealth and power they had accrued, began working with major universities to establish graduate business education programs paralleling those for medicine and law. Constituting business as a profession, however, required codifying the

knowledge relevant for practitioners and developing enforceable standards of conduct. Khurana, drawing on a rich set of archival material from business schools, foundations, and academic associations, traces how business educators confronted these challenges with varying strategies during the Progressive era and the Depression, the postwar boom years, and recent decades of freewheeling capitalism. Today, Khurana argues, business schools have

largely capitulated in the battle for professionalism and have become merely purveyors of a product, the MBA, with students treated as consumers.

Professional and moral ideals that once animated and inspired business schools have been conquered by a perspective that managers are merely agents of shareholders, beholden only to the cause of share profits. According to Khurana, we should not thus be surprised at the rise of corporate

malfeasance. The time has come, he concludes, to rejuvenate intellectually and morally the training of our future business leaders.

Colloquially known as "Fitzgerald's," this is the official manual of N.J.'s legislature, filled with a variety of important facts for its politicians and lobbyists.

This book offers a comprehensive review devoted exclusively to slate as dimension stone. Beginning with a description of the slate as dimension stone, the book describes the origin of slate and related geological phenomena. It thoroughly explains key data acquisition methods and techniques, which are

accompanied by extensive data. In turn, slate standards are introduced and compared with regard to their importance for product quality. The book covers in detail the specific petrographical, fabric, strength, physical properties and weathering behaviour of slates. The chapter on mining and production provides an overview of the different forms of exploitation and related geotechnical aspects, together with production and workflow design, from the beginning to the final product. The second part comprises a thorough description of worldwide slate deposits and their geology, properties and appearance as well as a brief introduction of the history. Given its scope and

This book presents a design-driven investigation into smart materials developed by chemists, physicists, materials and chemical engineers, and applied by designers to consumer products, buildings, interfaces, or textiles. Introducing a class of smart materials (referred to as stimuli-responsive, morphing or kinetic materials) that move and change their shape in response to stimuli, the book presents their characteristics, advantages, potentials, as well as the difficulties involved in their application. The book also

presents a large number of case studies on products, projects, concepts, and experiments employing smart materials, thus mapping out new design territories for these innovative materials. The case studies involve different fields of design, including product, interior, fashion, and communication design. Reflecting the growing demand for sustainable and human-centered design agendas, the book explores and reveals the role and influence of these new materials and technologies on design and human experience, and discusses how they can be used to redefine our objects and spaces so as to promote more resilient environments. The book offers an intriguing and valuable resource for design professionals, engineers, scientists and students alike.
