Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Based on recently declassified documents, this book provides the first examination of the Truman Administration's decision to employ covert operations in the Cold War.

Although covert operations were an integral part of America's arsenal during the late 1940s and early 1950s, the majority of these operations were ill conceived, unrealistic and ultimately doomed to failure. In this volume, the author looks at three central questions: Why were these types of operations adopted? Why were they conducted in such a haphazard manner? And, why, once it became clear that they were not working, did the administration fail to abandon them? The book argues that the Truman Administration was unable to reconcile policy, strategy and operations successfully, and to agree on a consistent course of action for waging the Cold War. This ensured that they wasted time and effort, money and manpower on covert operations designed to challenge Soviet hegemony, which had little or no real chance of success. US Covert Operations and Cold War Strategy will be of great interest to students of US foreign policy, Cold War history, intelligence and international history in general.

**As part of the American Medical Association (AMA)'s Accelerating Change in Medical Education Consortium's work, Health Systems Science (HSS) is establishing itself as the third major branch of a balanced medical education, alongside basic and clinical sciences. Health Systems Science Review is a first-of-its-kind review book designed to prepare future physicians and other health care professionals to function effectively within health systems by better understanding how health care is delivered, how health care professionals work together to deliver that care, and how the health system can improve patient care and health care delivery. This study tool provides case-based questions followed by discussions of answers and suggested readings—making it a valuable review resource for medical students and instructors, as well as medical residents; nursing, allied health, and public health students; and hospital administrators. Meets a growing need for an effective, targeted review tool on HSS, a topic increasingly covered on the USMLE and other exams. Contains 250+ case-based, multiple-choice questions, with extensive discussion of correct and incorrect answers. Offers an up-to-date, effective review to support and assess competence in HSS, covering health care delivery and processes, health care policy and economics, clinical informatics and technology, social determinants of health, patient safety, teamwork and collaboration, systems thinking and complexity science, and much more. Provides highly relevant content applicable to today's evolving health care delivery written by experts in emerging areas of HSS. Serves as an excellent study companion for the ground-breaking book, Health Systems Science, by Susan E. Skochelak, MD, MPH, et al., also developed by the AMA's Accelerating Change in Medical Education Consortium, which is at the forefront of change and innovation in medical education.**

*In today's tough economy, cutting prices and providing good service aren't enough. To be truly successful, innovative businesspeople must learn the art of Positively Outrageous Service (POS)—doing the unexpected unexpectedly and giving the customer more than he or she could hope for. POS put customer service guru T. Scott Gross on the map in the early 1990s. In this revised third edition, he contemporizes his work by examining what's wrong in the service industry today and how to turn those negatives into POS. In his signature, slightly irreverent, but always insightful style, he shows managers at every level of the service industry how to: Build a customer base by following the four key principles of promotions—have fun, get people to your store, get people involved with your product, and do something good for others Hire the right people and show them the fundamentals of POS Energize and obtain the most creativity out of employees Win over customers when mistakes happen, no matter who is at fault POS is not just a way of doing business, according to Gross; it's also a state of mind and the key to success in the twenty-first century. T. Scott Gross is a consumer advocate whose client roster for consulting, training, and speaking reads like a who's who of the Fortune 500. Countless businesses, including Southwest Airlines, FedEx, McDonald's, Sears, and Wal-Mart, have asked him to motivate the troops at sales meetings and conferences worldwide. "He either enchants or antagonizes everyone he meets. But even his enemies agree there are three things Ray Kroc does damned well: sell hamburgers, make money, and tell stories." --from Grinding It Out Few entrepreneurs can claim to have radically changed the way we live, and Ray Kroc is one of them. His revolutions in food-service automation, franchising, shared national training, and advertising have earned him a place beside the men and women who have founded not only businesses, but entire empires. But even more interesting than Ray Kroc the business man is Ray Kroc the man. Not your typical self-made tycoon, Kroc was fifty-two years old when he opened his first franchise. In Grinding It Out, you'll meet the man behind McDonald's, one of the largest fast-food corporations in the world with over 32,000 stores around the globe. Irrepressible enthusiast, intuitive people person, and born storyteller, Kroc will fascinate and inspire you on every page.

Discusses the people, the strategies, and the innovations that turned a hamburger stand into a multi-billion-dollar corporation that revolutionized an industry and influenced the culture of America.
