Susan is autistic. She lives locked inside her own secret world. Kristy thinks it's unfair that Susan has to be sent off to school and is treated differently from everyone else. This stunning follow-up to Ellen Kushner's cult-classic novel, *Swordspoint*, is set in the same world of labyrinthine intrigue, where sharp swords and even sharper wits rule. Against a rich tapestry of artists and aristocrats, students, strumpets, and spies, a gentleman and a scholar will find themselves playing out an ancient drama destined to explode their society's smug view of itself--and reveal that sometimes the best price of uncovering history is being forced to repeat it.... The Fall of the Kings Generations ago the last king fell, taking with him the final truths about a race of wizards who ruled at his side. But the blood of the kings runs deep in the land and its people, waiting for the coming together of two unusual men, Theron Campion, a young nobleman of royal lineage, is heir to an ancient

There he meets Basil St. Cloud, a brilliant and charismatic teacher ruled by a passion for knowledge—and a passion for the ancient kings. Anne of Windy Poplars

Railroad Men

Examines the relationship between two of the founding fathers of American industry--Andrew Carnegie and Henry Clay Frick--and the Homestead Steel Strike of 1892, which led to the dissolution of their partnership.

When a teenager is the victim of an unprovoked attack while walking his dog, a murder investigation begins. A cruel twist of fate makes his innocent family the targets of a vicious campaign of terror. As the detectives of Liverpool's Major Investigation Team try to contain the violence, several key members of an organised crime family begin to topple, causing shockwaves across the world. Why was the teenager attacked? And will the villains be brought to justice?

In the 1890s the Apollo Iron and Steel Company ended a bitterly contested labor dispute by hiring replacement workers from the surrounding countryside. To avoid future unrest, however, the company sought to gain tighter control

over its workers not only at the factory but also in their homes. Drawing upon a philosophy of reform movements in Europe and the United States, the firm decided that providing workers with good housing and a good urban environment would make them more loyal and productive. In 1895, Apollo Iron and Steel built a new, integrated, non-unionized steelworks and hired the nation's preeminent landscape architectural firm (Olmsted, Olmsted, and Eliot) to design the model industrial town: Vandergrift. In *Capital's Utopia: Vandergrift, Pennsylvania, 1855-1916*, Anne E. Mosher offers the first comprehensive geographical overview of the industrial restructuring of an American steelworks and its workforce in the late nineteenth-century. In addition, by offering a thorough analysis of the Olmsted plan, Mosher integrates historical geography and labor history with landscape architectural history and urban studies. As a result, this book is far more than a case study. It is a window into an important period of industrial development and its consequences on

communities and environments in the world-famous steel country of southwestern Pennsylvania.

This early work by Lucy Maud Montgomery was originally published in 1936 and we are now republishing it with a brand new introductory biography. Lucy Maud Montgomery was born on 30th

November 1874, New London, in the Canadian province of Prince Edward Island. Her mother, Clara Woolner (Macneil), died before Lucy reached the age of two and so she was raised by her maternal grandparents in a family of wealthy Scottish immigrants. In 1908 Montgomery produced her first full-length novel, titled 'Anne of Green Gables'. It was an instant success, and following it up with several sequels, Montgomery became a regular on the best-seller list and an international household name. Montgomery died in Toronto on 24th April 1942.

A fast-paced and gripping crime thriller from an international best-selling author.

American Military History provides the United States Army-in particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new

edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on

terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

28 Days of Blessing Your Wife

Shows how analogy-making pervades human thought at all levels, influencing the choice of words and phrases in speech, providing guidance in unfamiliar situations, and giving rise to great acts of imagination.

Marriage for many women is simply miserable. And if that's not bad enough, what makes this even worse is that oftentimes it is we men who inject the misery into the marriage (like injecting our favorite marinade into the Thanksgiving turkey). We judge our wives, criticize them, gripe, complain, and fail to appreciate them. Is this behavior helpful? Is it effective? Is it Christ-like? No (and no wonder why the divorce rate among professing Christians is not much different from those who do not follow Jesus)! To tell you the truth, God's plan for the way you treat your wife looks very different. Throughout *With No Strings Attached: 28 Days of Blessing Your Wife*, Dr. Steven Bell details twenty-eight unique ways for you to love your wife unconditionally. Each approach to blessing your wife is simple, yet immensely challenging (and well worth your time). The days of the “ status quo ” husband are quickly coming to an end, and our wives need more from us than we've been giving them. Grounded in scripture and a number of other helpful resources, *With No Strings Attached: 28 Days of Blessing Your Wife* provides a clear blueprint of how to take your marriage from miserable to

DI Alan Williams is called to the recovery of two bodies from the sea at Trearddur Bay, during a storm. The lifeboat crew suspect they're fishermen, washed away by a wave but they're wrong. Alan and his detective sergeant, Kim Davies, realise the men were beaten and tied together before they entered the water. Two miles along the headland at Porth Dafarch, a third victim is found but there are no obvious links. As the number of victims increases, a major investigation team battles to unravel a deadly puzzle which, appears to have links to a series of historic murders from the 90's.

In 1995, Peter Moore owned and operated the cinema in Holyhead. It is thought he assaulted over 40 men and he was arrested and charged with four murders, which he'd committed in as many months. He was jailed for life in 1996 and is still the only recorded Welsh serial killer. Fast forward to today and Detective Inspector Alan Williams is investigating a series of murders with uncanny similarities to the Peter Moore attacks. Is there a copycat on the loose or are the murders connected to the local underworld, which controls the supply of narcotics across North Wales and the North West? Finding a motive, is the challenge he might not win. ALL THE TIME THEY'RE TRACKING THE KILLER, THE KILLER IS STALKING THEM...

For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

Canadian Critical Luxury Studies

A Patriot's History of the United States

Vosper's Revenge: Book Three of the Dragon Stone Saga

Canadian Critical Luxury Studies: Decentering Luxury is a dynamic new contribution to the study of luxury. The essays in this collection challenge Euro- and US-centric perceptions that bind luxury to either a colonial past or a consumerist present. The book announces a new collective of thinkers who focus on Indigenous and Canadian instances of luxurious production, experiences and sites to propose a new definition of luxury that includes a plurality of regional practices highlighting that Canadian luxury centres on community and connection. Each of the interdisciplinary contributions analyse luxury from different vantage points to understand why luxury has succeeded or failed in the Canadian context. From the history of the fur trade to the latest Indigenous fashion movement, from the T. Eaton Co.'s 1920s Made-in-Canada campaign to the on-again-off-again Toronto Fashion Week, from Vancouver public art commissions to Montréal's future-forward fashiontech sector, the essays in this volume explain what makes and

breaks Canadian luxury. These original case studies redefine luxury for Canada – a former colonial possession and contemporary second-tier cultural market – and lay the foundation for the critical study of luxury in other historically secondary geographies that produce, consume and circulate material and symbolic luxuries. The collection ultimately challenges old myths and the mystique surrounding European luxury to give it a new lustre that shines light on those actors who have been historically excluded from its privilege: Indigenous peoples, immigrants, the working classes. It sheds light on the reasons that conventional expressions of luxury may fail in secondary markets and offers guidance for fashiontech innovations that invest in the individual without imposing dehumanizing values of efficiency and rational measurement. Although focused on the Canadian context, the book will appeal to an international audience of scholarly and industry readers. Its interventions about broadening the focus of luxury studies beyond traditional sites in Western Europe make it an important text for global audiences. It offers an alternate reading of conventional luxury histories, sites and practices; in doing so, it models a national approach to luxury that can be applied to alternate national markets. Jessica P. Clark is a historian of Britain and empire, with a focus on gender, consumption and labour, and an associate professor of history at Brock University, Ontario, Canada. Nigel Lezama is an associate professor of French studies at Brock University and works at the intersection of fashion, luxury, literary and cultural studies. Contributions are drawn from a number of

fields including, but not limited to, Indigenous studies, museum studies, business management, cultural studies, fashion studies, technology and industry. Contributors include Kathryn Franklin, University of Toronto; Rebecca Halliday, Ryerson University; Riley Kucheran, Ryerson University; Valérie Lamontagne, Amsterdam University of Applied Sciences/Amsterdam Fashion Institute (AMFI); Marie O'Mahony, Ontario College of Art and Design; Julia Polyk-O'Neill, Brock University, Ontario. This is a primarily an academic book. It is of great relevance to scholars within the subfield of critical luxury studies, as well as scholars of consumer and commodity cultures more broadly, and those working or interested in Canadian studies, media studies, critical studies, and historians. Researchers and postgraduate students studying luxury as well as those studying the history of the development of Canada, its colonial past and the marginalization of Indigenous people, and with the development of fashion technologies will also find it useful. Academics and practitioners concerned with the development of city and nation branding will find the book of value.

Former history professor John Curry has been recruited by a time-travel company to scout the best vantage point for clients to witness the inauguration of the first President of the United States. There's just one problem: When he arrives in 1789, there is no inauguration--and no United States. Until this point, the time-travel job has had its perks. Getting relationship advice from the legendary lover, Casanova, was valuable.

Accompanying Casanova to the opening night of Mozart's opera, Don Giovanni, was even better. But being stranded in the British Colony of New York isn't what he signed up for. Few people have even heard of George Washington, and the short-lived American Revolution failed--presumably because Washington wasn't alive to lead it. John always knew history could change on a dime, but not after it already happened. Right? After learning Washington was killed thirty years earlier during the French and Indian War, John realizes the only way he can return home is to ensure there's a United States to return to. Everything hinges on keeping Washington alive--not the easiest task protecting someone famous for leading battles on the front lines while perched on a horse. While traveling further back through time to protect Washington, he uncovers a secret the Freemasons have kept for more than two and a half centuries and learns that the history he thought he knew was completely wrong.

A pioneering neuroscientist argues that we are more than our brains To many, the brain is the seat of personal identity and autonomy. But the way we talk about the brain is often rooted more in mystical conceptions of the soul than in

scientific fact. This blinds us to the physical realities of mental function. We ignore bodily influences on our psychology, from chemicals in the blood to bacteria in the gut, and overlook the ways that the environment affects our behavior, via factors varying from subconscious sights and sounds to the weather. As a result, we alternately overestimate our capacity for free will or equate brains to inorganic machines like computers. But a brain is neither a soul nor an electrical network: it is a bodily organ, and it cannot be separated from its surroundings. Our selves aren't just inside our heads--they're spread throughout our bodies and beyond. Only once we come to terms with this can we grasp the true nature of our humanity.

Benjamin Franklin wrote his posthumously published memoir—a model of the genre—in several pieces and in different temporal and physical places. Douglas Anderson’s study of this work reveals the famed inventor as a literary adept whose approach to autobiographical narrative was as innovative and radical as the inventions and political thought for which he is renowned. Franklin never completed his autobiography, choosing instead to immerse his reader in the formal and textual atmosphere of a deliberately “unfinished” life. Taking this decision on Franklin’s part as a starting point, Anderson treats the memoir as a subtle and rewarding reading lesson, independent of the famous life that it dramatizes but closely linked to the work of predecessors and successors like

John Bunyan and Alexis de Tocqueville, whose books help illuminate Franklin's complex imagination. Anderson shows that Franklin's incomplete story exploits the disorderly and disruptive state of a lived life, as opposed to striving for the meticulous finish of standard memoirs, biographies, and histories. In presenting Franklin's autobiography as an exemplary formal experiment in an era that its author once called the Age of Experiments, The Unfinished Life of Benjamin Franklin veers away from the familiar practices of traditional biographers, viewing history through the lens of literary imagination rather than the other way around. Anderson's carefully considered work makes a persuasive case for revisiting this celebrated book with a keener appreciation for the subtlety and beauty of Franklin's performance.
