A project-focused book presents more than 25 projects with easy-to-follow instructions for creating unique bracelets, necklaces and earrings using two-hole shaped beads. Readers will learn to turn inexpensive seed beads into one-of-a-kind jewelry. Ten basic bead stitches are covered. Inspired by the craftsmanship and attention to detail of early costume jewelry, Heather DeSimone demonstrates how to create fun, one-of-a-kind pieces by teaching techniques for layering readily available components in Create Three Dimensional Jewelry. Jewelry makers will learn how to layer premade components, make beaded clusters, create beaded loops, weave seed beads, embellish filigree components, rivet stamped metal pieces, and more as they create 21 unique

projects. Most importantly, mastering this three-dimensional approach to “building” jewelry teaches designers to think about using their materials in a new way.

Kumihimo Basics & Beyond presents techniques for creating all-cord braids and beaded braids, then teaches beaders how to transform them into finished jewelry. Short demonstrations of the key techniques needed for each project are presented in easy-to-grasp portions, allowing beaders to learn and practice as they go. Rebecca Combs demystifies tricky “kumihimo math” by providing detailed supply lists for each project in the book, plus teaches beaders how to calculate the amount of fiber and how many beads they’ll need for their future kumihimo projects.
