Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates.

Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, or lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

SharePoint Online from Scratch gives hands-on instructions on how to practically make use of a SharePoint tenant for an organization, or parts thereof. It is almost entirely no-code. Even if SharePoint Online from Scratch primarily is a handbook, explanations on how SharePoint works are mixed into the instructions. SharePoint Online is an ever changing platform, so the author's aim is to give a deeper understanding of how to take advantage of SharePoint at the same time as giving practical advice.

A practical guide to the development and operation of digital preservation services for organizations of any size Practical Digital Preservation offers a comprehensive overview of best practice and is aimed at the non-specialist, assuming only a basic understanding of IT. The book provides guidance as to how to implement strategies with minimal time and resources. Digital preservation has become a critical issue for institutions of all sizes but until recently has mostly been the preserve of national archives and libraries with the resources, time and specialist knowledge available to experiment. As the discipline matures and practical tools and information are increasingly available the barriers to entry are falling for smaller organizations which can realistically start to take active steps towards a preservation strategy. However, the sheer volume of technical information now available on the subject is becoming a significant obstacle and a straightforward guide is required to offer clear and practical solutions. Each chapter in Practical Digital Preservation covers the essential

building blocks of digital preservation strategy and implementation, leading the reader through the process. International case studies from organizations such as the Wellcome Library, Central Connecticut State University Library in the USA and Gloucestershire Archives in the UK illustrate how real organizations have approached the challenges of digital preservation. Key topics include: • Making the case for digital preservation • Understanding your requirements • Models for implementing a digital preservation service • Selecting and acquiring digital objects • Accessioning and ingesting digital objects • Describing digital objects • Preserving digital objects • Providing access to users • Future trends. Readership: Anyone involved in digital preservation and those wanting to get a better understanding of the process, students studying library and information science (LIS), archives and records management courses and academics getting to grips with practical issues.

This book is a retrospective view of modern philosophical anthropology through the works of two of its greatest exponents. the author demonstrates how mythology, the philosophy of history and language and Vico's concept of man had as a constant referral point Malebranche's psychology with its Cartesian formulation. The idolatrous and mythopoietic imagination that is described in La Scienza Nuova (New Science) has much in common with the "pagan" mind (that is to say the mind subjugated to passions, sensitivity and fantasy that is described in La Recherche (The Search after Truth). Some of the themes discussed here are myth, the metaphoric nature of thought, idolatry, the formation of mentality, the relationships which bind passions and representations and the association of ideas through iconic images. Also discussed are other themes such as the structure of society and imagination, imitation, persuasion and social relationships, communication within society between illustrious imaginations. Moreover in Malebranche has been found a complex and complete theory of imaginative universals (universali fantastici). The philosophy of the imagination in Vico and Malebranche is translated and edited by Giorgio A. Pinton.

"The purpose of this publication is to contribute to [the] process of clarification by explaining universally recognised human rights in a way that makes sense to business. The publication also aims to illustrate, through the use of case studies and actions, how human rights are relevant in a corporate context and how human rights issues can be managed."--Introduction, p. vii.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

An Appalachian Novel

A single volume that gathers together three of the most remarkable novels from Jean Echenoz, the “most distinctive French voice of his generation” (The Washington Post), Three by Echenoz demonstrates the award-winning author’s extraordinary versatility and elegant yet playful style at its finest. “A parodic thriller sparkling with wit” (L’Humanité), Big Blondes probes our universal obsession with fame as a television documentary producer tries to track down a renowned singer who has mysteriously disappeared. A darkly comedic, noir-style tour de force, it finally answers the age-old question: do blondes have more fun? “Fluid, never forced...like a garment that fits beautifully even inside-out” (Elle), Piano brings Dante’s Inferno to contemporary Paris, following Max Delmarc, a concert pianist suffering from paralyzing stage fright and alcoholism, as he meets his untimely death and descends through purgatory—part luxury hotel, part minimum-security prison—into a modern vision of hell. Running is “a small wonder of writing and humanity” (L’Express)—a portrait of the legendary Czech athlete Emil Zátopek, who became a national hero, winning three gold medals at the 1952 Helsinki Olympics even as he was compelled to face the unyielding realities of life under an authoritarian regime.

This book is written for classroom teachers who want to know more about e-learning and who would like to experiment with designing e-learning material to use in their own classrooms. It is primarily targeted at secondary teachers but there is no reason why primary school teachers and adult education teachers should not find it useful too. The other group we had in mind were those of you still undertaking initial teacher training. Although there are some exemplary courses, a depressing number of trainee teachers continue to arrive in the classroom having barely heard the words 'e-learning', still less have hands on experience of it.

Gator, Gator, Gator!

Essential PowerShell for Office 365

SharePoint Guida Pratica

From the author of One Day in the Eucalyptus, Eucalyptus Tree: Do you wanna? Wanna see? Let's go find that gator, gator, gator!

COME WITH ME! Put on your life jacket, hop in the boat, and raise your binoculars—it's time to go on an adventure! In Daniel Bernstrom's follow-up to the critically acclaimed One Day in the Eucalyptus, Eucalyptus Tree, a fearless little girl takes off in search of a giant gator—but she's not going into that swamp alone! No way! She wants YOU, the reader, to come along. Off you go, peering through the lush landscapes, looking for that gator! But each time you think you see it? Oops! Just a fox. Or some ducks! Or a snake. Maybe you'll never find the gator, gator, gator . . . With stunning illustrations from Sendak Fellow Frann Preston-Gannon, readers experience the feeling of being on a real adventure deep in the swamp. Rhyming, repeating, and exhilarating, the text is a delightful read-aloud romp that will entertain and make everyone's heart skip a beat!

Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to

arrest to...you get the picture. But KASHER IN THE RYE is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

The purpose of this guide book is to give the reader a quick and effective access to the most appropriate Key Performance Indicator (KPI). The 36,000 KPIs are categorized in a logical and alphabetical order. Many organizations are spending a lot of funds on building their strategic planning and performance management capabilities. One of the current challenges is the difficulty to know what KPIs are used in similar situations. This book main objective is to acquaint the reader with available KPIs measuring performance of a specific industry, sector, international topic, and functional area. The book is divided into three sections:1) Organization Section: 32 Industries | 385 Functions | 11,000 KPIs2) Government Section: 32 Sectors | 457 Functions | 12,000 KPIs3) International Section: 24 Topics | 39 Sources | 13,000 KPIs

Learn Flutter and the Dart programming language by building impressive real-world mobile applications for Android and iOS

Key Features

- Learn cross-platform mobile development with Flutter and Dart by building 11 real-world apps
- Create wide array of mobile projects such as 2D game, productivity timer, movie browsing app, and more
- Practical projects demonstrating Flutter development techniques with tips, tricks, and best practices

Book Description Flutter is a modern reactive mobile framework that removes a lot of the complexity found in building native mobile apps for iOS and Android. With Flutter, developers can now build fast and native mobile apps from a single codebase. This book is packed with 11 projects that will help you build your own mobile applications using Flutter. It begins with an introduction to Dart programming and explains how it can be used with the Flutter SDK to customize mobile apps. Each chapter contains instructions on how to build an independent app from scratch, and each project focuses on important Flutter features. From building Flutter Widgets and applying animations to using databases (SQLite and Sembast) and Firebase, you'll build on your knowledge through the chapters. As you progress, you'll learn how to connect to remote services, integrate maps, and even use Flare to create apps and games in Flutter. Gradually, you'll be able to create apps and games that are ready to be published on the Google Play Store and the App Store. In the concluding chapters, you'll learn how to use the BLoC pattern and various best practices related to creating enterprise apps with Flutter. By the end of this book, you will have the skills you need to write and deliver fully functional mobile apps using Flutter.

What you will learn

- Design reusable mobile architectures that can be applied to apps at any scale
- Get up to speed with error handling and debugging for mobile application development
- Apply the principle of 'composition over inheritance' to break down complex problems into many simple problems
- Update your code and see the results immediately using Flutter's hot reload
- Identify and prevent bugs from reappearing with Flutter's developer tools
- Manage an app's state with Streams and the BLoC pattern
- Build a simple web application using Flutter Web

Who this book is for This book is for mobile developers and software developers who want to learn Flutter to build state-of-the-art mobile apps. Although prior experience with Dart programming or Flutter is not required, knowledge of object-oriented programming (OOP), data structures and software design patterns will be beneficial.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt
