How To Start Your Own Shoe Company is for anyone with the dream of starting a shoe company of their own. The book follows the launch of two small start-up shoe companies. Each company has its own style of shoes and business plan. In each chapter we will describe a requirement or process, then we will take some time to

Online Library Shoe Making Guide

explain how each new shoe brand will tackle the challenges. *How To Start Your Own Shoe Company* covers many important topics such as; how to go about creating your shoe brand identity, how to legally set-up your shoe company, how to register trademarks and apply for patents, how to get your shoes designed, built, paid for, and how to go about selling your shoes. We will also cover topics like how to import shoes, international distribution, how to pay overseas vendors and capital requirements. 8.5x 11 Soft Cover 12 Chapters, 170 Pages.

There's never been a better time to "be prepared."

Matthew Stein's comprehensive primer on sustainable

living skills—from food and water to shelter and energy to first-aid and crisis-management skills—prepares you to embark on the path toward sustainability. But unlike any other book, Stein not only shows you how to live “green” in seemingly stable times, but to live in the face of potential disasters, lasting days or years, coming in the form of social upheaval, economic meltdown, or environmental catastrophe. *When Technology Fails* covers the gamut. You’ll learn how to start a fire and keep warm if you’ve been left temporarily homeless, as well as the basics of installing a renewable energy system for your home or business. You’ll learn how to find and sterilize

water in the face of utility failure, as well as practical information for dealing with water-quality issues even when the public tap water is still flowing. You'll learn alternative techniques for healing equally suited to an era of profit-driven malpractice as to situations of social calamity. Each chapter (a survey of the risks to the status quo; supplies and preparation for short- and long-term emergencies; emergency measures for survival; water; food; shelter; clothing; first aid, low-tech medicine, and healing; energy, heat, and power; metalworking; utensils and storage; low-tech chemistry; and engineering, machines, and materials) offers the same approach,

describing skills for self-reliance in good times and bad. Fully revised and expanded—the first edition was written pre-9/11 and pre-Katrina, when few Americans took the risk of social disruption seriously—When Technology Fails ends on a positive, proactive note with a new chapter on "Making the Shift to Sustainability," which offers practical suggestions for changing our world on personal, community and global levels.

This sweet true story stars a tiny, orphaned elephant who was given another chance. When Chhouk, an Asian elephant calf, was found, he was alone, underweight, and had a severe foot injury. Conservationist Nick Marx of Wildlife Alliance rescued the baby elephant. With help from the Cambodian Forestry Administration, the Cambodian School of Prosthetics and Orthotics, and an elephant named Lucky, Nick nursed Chhouk back to health and made him an artificial foot.
