Continuous Casting

Who Owns Whom

This principal source for company identification is indexed by Standard Industrial Classification Code, geographical location, and by executive and directors' names.

Developing BRIC markets are changing the business models of traditional western technology leaders. Classic business strategies are no longer suitable for companies attacking abroad whilst defending their market at home. Based on real-life cases, the book evaluates the best new strategies for western companies in technology-based B2B markets.

Multinational Telecommunications Companies

This basic source for identification of U.S. manufacturers is arranged by product in a large multi-volume set. Includes: Products & services, Company profiles and Catalog file.

Multimedia surveillance systems is an emerging field that includes signal and image processing, communications, and computer vision. Multimedia Video-Based Surveillance Systems: Requirements, Issues and Solutions, combines the most recent research results from these areas for use by engineers and end-users involved in the design of surveillance systems in the fields of transportation and services. The book covers emerging surveillance requirements, including new digital sensors for real-time acquisition of surveillance data, low-level image processing algorithms, and event detection methods. It also discusses problems related to knowledge representation in surveillance systems, wireless and wired multimedia networks, and a new generation of surveillance communication tools. Timely information is presented on digital watermarking, broadband multimedia transmission, legal use of surveillance systems, performance evaluation criteria, and other new and emerging topics, along with applications for transports and pedestrian monitoring. The information contained in

Multimedia Video-Based Surveillance Systems: Requirements, Issues and Solutions, bridges the distance between present practice and research findings, and the book is an indispensable reference tool for professional engineers.

Consulting-specifying Engineer

Major Companies of Latin America and the Caribbean

Corporate entrepreneurship involves new business creation within established companies, the strategic renewal of existing business, and, ultimately, the search for sustainable competitive advantage in an increasingly globalised economy. Yet it remains elusive for many firms. In a collaboration between a practitioner and academic, Joe J. Amberg and Sara L. McGaughey explore corporate entrepreneuring within a large conglomerate multinational enterprise: Siemens AG. In early 2009, following a prolonged period of business stagnation and a huge bribery scandal, Siemens' top management identified a severe lack of entrepreneurship as a critical issue. The strengthening of 'local entrepreneurship' became a new priority in the strategic planning for 2010 to 2014. By examining three contrasting ventures in the Siemens business unit Fire Safety between 2008 and 2012, the authors identify key drivers and impediments that sustain inertia in corporate entrepreneuring within this global organisation. This study offers an insightful contribution to our growing – yet still fledgling – understanding of corporate entrepreneurship in global corporations, highlighting the importance of context, interdependencies between critical factors, and the false promise of universal best practice.

The Continuous Casting 2000 symposium maintains the tradition established in 1976 of holding regular events. This millennium event, however, is the first international meeting of the series. The aim is to highlight the importance of continuous casting - of aluminum, copper and magnesium - to the international fabricating industry, focusing on technological advances in all the sectors that are important for the manufacture of high quality continuous cast products.
