The boss of New York's infamous Lucchese crime family, Anthony "Gaspipe" Casso's life in the Mafia was preordained from birth. His rare talent for "earning"—concocting ingenious schemes to hijack trucks, rob banks, and bring vast quantities of drugs into New York—fueled his unstoppable rise up the ladder of organized crime. A mafioso responsible for at least fifty murders, Casso lived large, with a beautiful wife and money to burn. When the law finally caught up with him in 1994, Casso became the thing he hated most—an informer. From his blood feud with John Gotti to his dealings with the "Mafia cops," decorated NYPD officers Lou Eppolito and Stephen Caracappa, to the Windows case, which marked the beginning of the end for the New York Mob, Gaspipe is Anthony Casso's shocking story—a roller-coaster ride into an exclusive netherworld that reveals the true inner workings of the Mafia, from its inception to the present time.

What does writing Greek books mean at the height of the Cinquecento in Venice? The present volume provides fascinating insights into Greek-language book production at a time when printed books were already at a rather advanced stage of development with regards to requests, purchases and exchanges of books; copying and borrowing practices; relations among intellectuals and with institutions, and much more. Based on the investigation into selected institutional and private libraries – in particular the book collection of Gabriel Severos, guide of the Greek Confraternity in Venice – the authors present new pertinent evidence from Renaissance books and documents, discuss methodological questions, and propose innovative research perspectives for a sociocultural approach to book histories.

*In this fascinating book, the author traces the careers, ideas, discoveries, and inventions of two renowned scientists, Athanasius Kircher and Galileo Galilei, one a Jesuit, the other a sincere man of faith whose relations with the Jesuits deteriorated badly. The Author documents Kircher's often intuitive work in many areas, including translating the hieroglyphs, developing sundials, and inventing the magic lantern, and explains how Kircher was a forerunner of Darwin in suggesting that animal species evolve. Galileo's work on scales, telescopes, and sun spots is mapped and discussed, and care is taken to place his discoveries within their cultural environment. While Galileo is without doubt the "winner" in the comparison with Kircher, the latter achieved extraordinary insights by unconventional means. For all Galileo's fine work, the author believes that scientists do need to regain the power of dreaming, vindicating Kirchner's view.*

*This book presents a semiotic study of the re-elaboration of Christian narratives and values in a corpus of Italian novels published after the Second Vatican Council (1960s). It tackles the complex set of ideas expressed by Italian writers about the biblical narration of human origins and traditional religious language and ritual, the perceived clash between the immanent and transcendent nature and role of the Church, and the problematic notion of sanctity emerging from contemporary narrative.*

Wordplay involving several linguistic codes represents an important modality of ludic language. It is attested in different epochs, communicative situations, genres, and contexts of use. The translation of wordplay, which is generally seen as a challenging enterprise, illustrates another dimension of crossing linguistic borders in wordplay. The third volume of the series *The Dynamics of Wordplay* unites contributions from different disciplines which study the creative and playful use of elements from different languages and the transfer of ludic language into other linguistic systems. It sheds light on the multi-dimensionality, special linguistic make-up, and specific interactive potential of wordplay at the interface of different languages and cultures. The individual studies collected in this volume will be of interest to scholars from different scientific fields, such as linguistics and literary studies as well as cultural and media studies.

This book investigates morpho-syntactic convergences that characterize the languages of the Balkan Sprachbund: Balkan Slavic, Greek, Romanian, Albanian, Balkan Romani. Apart from new data, the volume features contributions within different theoretical frameworks (contact linguistics, functional linguistics, typology, areal linguistics, and generative grammar).

The Altars and Altarpieces of New St. Peter's

A comprehensive re-assessment of Raphael's artistic achievement and the ways in which it transformed the idea of what art is.

To this day, no comprehensive academic study of the development of guidebooks to Rome over time has been performed. This book treats the history of guidebooks to Rome from the Middle Ages up to the early twentieth century. It is based on the results of the interdisciplinary research project *Topos and Topography*, led by Anna Blennow and Stefano Fogelberg Rota. From the case studies performed within the project, it becomes evident that the guidebook as a phenomenon was formed in Rome during the later Middle Ages and early Renaissance. The elements and rhetorical strategies of guidebooks over time have shown to be surprisingly uniform, with three important points of development: a turn towards a more user-friendly structure from the seventeenth century and onward; the so-called 'Baedeker effect' in the mid-nineteenth century; and the introduction of a personalized guiding voice in the first half of the twentieth century. Thus, the 'guidebook tradition' is an unusually consistent literary oeuvre, which also forms a warranty for the authority of every new guidebook. In this respect, the guidebook tradition is intimately associated with the city of Rome, with which it shares a constantly renovating yet eternally fixed nature.

Tesoro celestial y divino para rescate y consuelo de las almas, [ assi de los viuos, como de los fieles difuntos

Arising from a dissatisfaction with blandly general or abstrusely theoretical approaches to translation, this book sets out to show, through detailed and lively analysis, what it really means to translate literary style. Combining linguistic and lit crit approaches, it proceeds through a series of interconnected chapters to analyse translations of the works of D.H. Lawrence, Virginia Woolf, James Joyce, Samuel Beckett, Henry Green and Barbara Pym. Each chapter thus becomes an illuminating critical essay on the author concerned, showing how divergences between original and translation tend to be of a different kind for each author depending on the nature of his or her inspiration. This new and thoroughly revised edition introduces a system of 'back translation' that now makes Tim Parks' highly-praised book reader friendly even for those with little or no Italian. An entirely new final chapter considers the profound effects that globalization and the search for an immediate international readership is having on both literary translation and literature itself.

This beautiful book presents the work of these two painters, exploring the artistic development of each, comparing their achievements and showing how both were influenced by their times and the milieus in which they worked.

**At times controversial and uncompromising, always intellectually honest, Alessandro Conti's book is - astonishingly - the only attempt to comprehensively chart in time, the changing impact of man's desire to preserve for future generations the materials, meaning and appearances of works of art. Remarkable in its meticulous research of source material and breadth of scope, History of the Restoration and Conservation of Works of Arts, translated by Helen Glanville, charts the practices and underlying philosophies of conservation and 'restored' works of art from the Middle Ages to the end of the nineteenth century. In English-speaking countries, a lack of foreign language skills leaves many unable to consult a wealth of both published and unpublished historical documentation. Developments in conservation have therefore tended toward the scientific and analytical. Access to such documentation leads to better understanding of the present appearance of works of art and of their changing aspect and perception over time. Recent publications indicate that there is a great need for people writing on the subject to be aware of material which is not in their mother tongue: approaches presented as 'new' are in fact merely 'contemporary', and have been discussed or practiced in other centuries and countries. Just as knowledge of practices and effects of art conservation and restoration should form an integral part of History of Art Degrees, the more theoretic, abstract and historical aspects, should also be part of the training. This book is an invaluable source for academic and public institutions, art historians as well as practicing conservators and lovers of art.**

**The Original Portrayal of Mozart's Don Giovanni offers an original reading of Mozart's and Da Ponte's opera Don Giovanni, using as a lens the portrayal of the title role by its creator, the baritone Luigi Bassi (1766-1825). Although Bassi was coached in the role by the composer himself, his portrayal has never been studied in depth before, and this book presents a large number of new sources (first- and second-hand accounts), which allows us to reconstruct his performance scene by scene. The book confronts Bassi's portrayal with a study of the opera's early German reception and performance history, demonstrating how Don Giovanni as we know it today was not only created by Mozart, Da Ponte and Luigi Bassi but also by the early German adapters, translators, critics and performers who turned the title character into the arrogant and violent villain we still encounter in most of today's stage productions. Incorporating discussion of dramaturgical thinking of the late Enlightenment and the difficult moral problems that the opera raises, this is an important study for scholars and researchers from opera studies, theatre and performance studies, music history as well as conductors, directors and singers.**
