Raymond John Chambers was born just over a century ago on 16 November 1917. It is more than fifty years since his first classic, Accounting, Evaluation and Economic Behavior, was published, more than forty since Securities and Obscurities: Reform of the Law of Company Accounts (republished in 1980 as Accounting in Disarray) and over twenty since the unique An Accounting Thesaurus: Five Hundred Years of Accounting. They are drawn upon extensively in this biography of Chambers' intellectual contributions, as are other of his published works. Importantly, we also analyze archival correspondence not previously examined. While Chambers provided several bibliographical summaries of his work, without the benefits of reviewing and interspersing the text with correspondence materials from the Chambers Archive this study would lack an appreciation of the impact of his early childhood, and nuances related to his practical (including numerous consultancies) and academic experiences. The 'semi-biographical narrative' codifies article and editorial length exercises by the authors drawing on parts of the archive related to theory development, measurement and communication. Other parts are also examined. This allows us to respond to those critics who claim his reforms were naive. They

further reveal a man of theory and practice, whose theoretical ideas were solidly grounded on observations from his myriad interests and experiences. Many of his practical experiences have not been examined previously. This approach and the first book-length biography differentiates this work from earlier analyses of Chambers' contribution to the accounting literature. We provide evidence to support the continued push for the reforms he proposed to accepted accounting thought and practice to ensure accounting is the serviceable technology so admired by Pacioli, Da Vinci and many other Renaissance pioneers. It will be of interest to researchers, educators, practitioners and regulators alike.

In 1996 the Federal Accounting Standards Advisory Board (FASAB) 1 enacted Standard Number 6, Accounting for Property, Plant, and Equipment (PP&E), the first government-wide initiative requiring federal agencies to report dollar amounts of deferred maintenance annually. The FASAB has identified four overall objectives in federal financial reporting: budgetary integrity, operating performance, stewardship, and systems and control. FASAB Standard Number 6, as amended, focuses on operating performance and stewardship. The FFC Standing Committee on Operations and Maintenance has prepared this report to identify potential issues that should be considered in any future amendments to the standard and to suggest approaches for resolving them. The committee's

Increasing importance is being attached to how Greek and Latin books of poems were arranged, but such research has often been carried out with little attention to the physical fragments of actual ancient poetry-books. In this extensive study Gregory Hutchinson investigates the design of Greek and Latin books of poems in the light of papyri, including recent discoveries. A series of discussions of major poems and collections from two central periods of Greek and Latin literature is framed by a substantial and illustrated survey of poetry-books and reading, and by a more theoretical discussion of structures involving books. The main poets discussed are Callimachus, Apollonius, Posidippus, Catullus, Horace, and Ovid; a chapter on Latin didactic includes Lucretius, Virgil, Ovid, and Manilius.

Global environmental change often seems to be the most carefully examined issue of our time. Yet understanding the human side--human causes of and responses to environmental

change--has not yet received sustained attention. Global Environmental Change offers a strategy for combining the efforts of natural and social scientists to better understand how our actions influence global change and how global change influences us. The volume is accessible to the nonscientist and provides a wide range of examples and case studies. It explores how the attitudes and actions of individuals, governments, and organizations intertwine to leave their mark on the health of the planet. The book focuses on establishing a framework for this new field of study, identifying problems that must be overcome if we are to deepen our understanding of the human dimensions of global change, presenting conclusions and recommendations.

First Published in 1997. Set in colonial Australia, this explanatory, investigative study examines the dimensions of accounting information prepared for pastoral industry engagement in the Western District of Victoria during 1836-1900 and the local, time-specific environmental factors which shaped these dimensions. Based on examinations of surviving business records, the study provides evidence of the structure and usage of pastoral accounting information in an unregulated financial reporting environment. As an interpretive historical study, it attempts to provide explanations of the accounting practices observed.

Social isolation and loneliness are serious yet underappreciated public health risks that affect a significant portion of the older adult population. Approximately one-quarter of community-dwelling Americans aged 65 and older are considered to be socially isolated, and a significant proportion of adults in the United States report feeling lonely. People who are 50 years of age or older are more likely to experience many of the risk factors that can cause or exacerbate social isolation or loneliness, such as living alone, the loss of family or friends, chronic illness, and sensory impairments. Over a life course, social isolation and loneliness may be episodic or chronic, depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality, comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high-volume and high-frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and mitigate the adverse health impacts of social isolation and loneliness in older adults. *Social Isolation and Loneliness in Older Adults* summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low income, underserved, and vulnerable populations. This report makes recommendations specifically for clinical settings of health care to identify those who suffer the resultant negative health impacts of social isolation and loneliness and target interventions to improve their

social conditions. Social Isolation and Loneliness in Older Adults considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish.
