Resources and guidance for the journey of Common Core implementation In this age of the Common Core State Standards, all content area teachers must integrate literacy standards into their curriculum. If you're like most content area educators, you're feeling a bit overwhelmed at the thought of addressing all the new standards, or you might just need a little extra help. In this hands-on resource, Common Core literacy expert Katherine McKnight offers secondary teachers a clear understanding of what literacy looks like in math, science, and technical subjects. McKnight gives educators proven teaching techniques that help develop literacy skills in students.

She also offers a wealth of practical strategies and ready-to-use activities that content area teachers can integrate seamlessly. Included are Ideas for implementing the literacy requirements of the Common Core across content areas A selection of activities that support literacy skills and build content knowledge in math, science, and technology classrooms An easy-to-use Difficulty Dial that indicates the complexity of each activity Robust student samples that bring the activities to life across a variety of grade levels and subjects Common Core Literacy for Math, Science, and Technical Subjects is designed for practicality. resource guide, and countless ideas for deepening content knowledge, this book provides excellent support for rigorous Common Core implementation. Praise for Common Core Literacy for Math, Science, and Technical Subjects “A realist with an incisive wit, Katie’s robust pedagogy and trenchant analysis inspire all of us to incorporate the CCSS meaningfully in specific content areas. For her gifted writing, let alone her substantive and easy-to-implement ideas, this is a godsend for content area teachers. Move it to the top of the priority reading stack.” —Rick Wormeli, veteran educator, author, and teacher trainer “McKnight eloquently dispels much of the

findings suggest that this sample of 104 urban students' self-esteem changed most significantly during the sixth grade with high variability from the end of sixth grade to the end of eighth grade. While sixth grade appears to be the most dynamic regarding change in self-esteem and self-concept, students demonstrated more complexity in their analysis of their friendships at the end of eighth grade and also revealed a greater degree of differentiation of themselves in self-appraisals of parents and teachers. Gender differences were also found in change in self-esteem during the middle grades and in the content of self-image. Results reveal implications for middle-level school climate.
