Start-up now, get inspired to create a high impact international business, make a difference by putting ideas into action, and produce a return on investment with your talents. Entrepreneurs gain satisfaction by using their talents to produce new wealth for both society and themselves. In a modern world, employment choices typically fit established institutional norms. A [good] job in a government bureaucracy or a large corporation, with its abundance of restrictive policies, may not provide much work satisfaction despite the employment benefits and stability. If you have ever thought, dreamed, imagined, or fantasized about starting a business, or being part of a company doing creative work with a purpose, then you have started to connect with your entrepreneurial spirit. This book is for anyone who wants to better understand the entrepreneurial approach. It originated from the first entrepreneurship course I taught at the University of Pisa from 2011 through 2014 and is based on over 15 years of experience as an entrepreneur of venture backed technology companies. The course was designed for PhD researchers and MBA students looking to expand their work opportunities beyond their traditional prescribed paths into institutions and corporations. This material is not only for academic researchers, it assumes that entrepreneurship is latent in all people. Traditionally, we are taught not to aim for self-employment through entrepreneurship during the years of primary education. Anyone with an advanced education, self-motivation, ambition, a vision for how to improve the world, a good attitude, and a willingness to take on the challenge of actively exploring entrepreneurial pursuits, should be able to follow the material and put it to use in their own efforts. If you currently own or are working in a company and want to innovate and expand the business, this book might be of value in inspiring you to grow a high impact international business by leveraging the business you are already doing. Read it to prepare for the journey and put the concepts into action; do not be a passive reader. Start-up now, get inspired to create a high impact international business, make a difference by putting ideas into action, and produce a return on investment using your talents.

To have a prosperous business, you must understand the power of branding. Your personal brand is made up of the qualities and unique traits you relay about yourself, and it represents the way you want other people to think about you. Personal Branding is increasingly coming into the public eye, as individuals seek to differentiate themselves by developing unique brands to propel their career and job opportunities. Many people think that personal branding is just for celebrities, but every individual is, in fact, a brand. Millions of other people offer the same service as you do, so ask yourself; "How do I currently stand out in the crowd?" Without branding, you're simply part of the many, and not part of the few. Personal Branding is about digging deep and spending time developing a unique Brand Statement, Brand Position, and Name (that speak to what you're doing), as well as Brand Promise, USP (Unique Selling Proposition), and Graphic imagery. Think of your Brand as a stage that allows you to rise above the rest and show consumers with confidence why they should choose you versus your competitor. With focus and a well-developed Brand Strategy, you will build the foundation and map out the path to becoming a successful personal Brand. Some organizations pay a great deal of attention to ensuring the physical safety of their team members, but do the team members feel safe enough to speak up and raise tough concerns? Share bold and still-in-formation ideas? In this book, bestselling authors and inclusion experts

Frederick A. Miller and Judith H. Katz introduce the concept of "interaction safety" and demonstrate how it can help create a work environment of trust, inclusion, and collaboration. Interaction safety encourages reasonable risk-taking and inspires every individual to be brave enough to reach for higher goals and more ambitious possibilities. When interaction safety exists, people know they will not be penalized, ostracized, demoted, made small, discounted, or shunned because of their thoughts, contributions, and conversations. Individuals feel encouraged, empowered, and can achieve more together than they would alone. Miller and Katz provide a four-level model for assessing and increasing the interaction safety in organizations, illustrated by short scenarios taken from real-life situations. They offer concrete actions team members, leaders, and organizations can take to build and maintain a productive, collaborative, and innovative environment in which people do their best work individually and collectively. When interaction safety is a way of life, the energy people used to spend walking on eggshells, trying to get their ideas heard, navigating minefields, or avoiding those they distrust can instead be put towards doing their best work and winning bigger for the organization. With a culture of openness and true collaboration, both the organization and individuals can soar!
