Beginner
scene

creatively—from determining how much of the scene should be in focus or obscured by a beautiful bokeh (desirable blur) for effect, to deciding whether to freeze motion or elicit the feeling of

movement.

Readers will learn what constitutes the “right” light for photography, and how to use highlight and shadow to create drama and add interest and a sense of dimension in their images.

Information is presented on composition (the artful arrangement of the elements of the scene within the confines of the frame in a way that excites the viewer), adding artificial light, and much more. All

concepts are reinforced by the introduction of 43 skill-building and concept-reinforcing self-assignments designed to heighten understanding and boost confidence. With lushly illustrated pages and
