"When people ask why I joined the Coast Guard, I respond that I was twenty-two, blond, and fit. In most military services that is guaranteed sexual harassment. Why not join the one with the ocean breeze?" Caroline's journey from enlisted Coast Guard member to CIA analyst includes boot camp, Hamptons yachters named Gary, meaning making in Guantanamo Bay, and a session with a Veterans Affairs-assigned therapist who has fourteen cats, one of which cures migraines. She takes you from serious topics of sexual harassment and suicide to laughing about how her predator's moment to make her prey was oddly interrupted. You are a fly on the wall during her botched FBI polygraph and will be scratching your head about her CIA classmate who U-turns during their surveillance-detection training like she just saw a sign for a sale at Macy's.

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057.

Although gifted with a superbly logical brain, Christopher is autistic.

Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing.

Christopher decides that he will track

down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

A Wall Street Journal Business Bestseller: This "vivid" inside story of WeWork and its CEO tells the remarkable saga of one of the most audacious, and improbable, rises and falls in American business history (Ken Auletta). Christened a potential savior of Silicon Valley's startup culture, Adam Neumann was

set to take WeWork, his office share company disrupting the commercial real estate market, public, cash out on the company's forty-seven billion dollar valuation, and break the string of major startups unable to deliver to shareholders. But as employees knew, and investors soon found out, WeWork's capital was built on promises that the company was more than a real estate purveyor, that in fact it was a transformational technology company. Veteran journalist Reeves Weideman dives deep into WeWork and its CEO's astronomical rise, from the marijuana and tequila-filled board rooms to cult-like company summer camps and consciousness-raising with Anthony Kiedis. Billion Dollar Loser is a character-driven business narrative that captures, through the fascinating psyche of a billionaire founder and his wife and co-founder, the slippery state of global capitalism. This long-awaited book is a complete reference to the C programming language and C runtime library. Its purpose is to serve as a convenient, reliable companion in your day-to-day work as a C programmer. C in a Nutshell covers virtually everything you need to program in C, describing all the elements of the language and illustrating their use with numerous examples. The book is divided into three distinct parts. The first part is a fast-paced description, reminiscent of the classic Kernighan & Ritchie text on which many C programmers cut their teeth. It focuses specifically on the C language and preprocessor directives, including extensions introduced to the ANSI standard in 1999. These topics and others are covered: Numeric constants Implicit and explicit type conversions Expressions and operators Functions Fixed-length and variable-length arrays Pointers Dynamic memory management Input and output The second part of the book is a comprehensive reference to the C runtime library; it includes an overview of the contents of the standard headers and a description of each standard library function. Part III provides the necessary knowledge of the C programmer's basic tools: the compiler, the make utility, and the debugger. The tools described here are those in the GNU software collection. C in a Nutshell is the perfect companion to K&R, and destined to be the most reached-for reference on your desk.*
