We are happy to introduce the Handbook of Charcoal-Making, a comprehensive survey written by a competent expert with international experience. The book was prepared by the Commission of the European Communities in the frame of its R + D programme on biomass. In the European Community today the biomass option is only little developed: a huge resource is waiting for use. Actually, there is ample scope for biomass utilisation as it bears promise in some of the vital sectors of modern society. Development of indigenous and renewable energy sources, creation of new employment, recycling of wastes and improvement of the environment, restructuring of European agriculture, development of the Third World, they are all concerned. It is important to note that the exploitation of the biomass resource is largely related to its conversion into a marketable product. However, as many of the conversion technologies are not yet well established or need improvement, R + D is more than ever the critical

pathway to get access to the benefits of biomass utilisation. In the European Communities I R + D programme, thermal conversion of biomass is developed with priority. Gasification as well as pyrolysis development projects are being supported by the Commission in European industry and universities. Pyrolysis is particularly attractive because the conversion products charcoal and pyrolytic oil are very convenient in use, technologies are relatively simple and projected pay-back times favourable. -v- Charcoal making is just the simplest and oldest form of pyrolysis.

*****RECOMMENDED BY THE HANDCRAFTED SOAP & COSMETIC GUILD***** "The only book [you'll] ever need." -- Mother Earth News, Feb.-Mar. 2019 "Should become THE book for soapmaking. . . . It's about time someone wrote a book like this. Most are idealistic and inaccurate. This book has a wonderful common sense approach that is SO long overdue. . . . I can recommend it with 100% confidence." -- Susan Kennedy, Oregon Trail Soaps, Rogue River, Oregon "Smart it is A simple, no-nonsense book that cuts through the curmudgery of stifling soap bibles like no other." -- Shellie Humphries, Harstine Island, Washington "A great book for beginners, with clear and easy instructions." -- Anne-Marie Faiola, Bramble Berry Inc., Bellingham, Washington "I learned more from Smart Soapmaking than from any other soaping book, and I have read quite a few. . . . It's written with the average person in mind, not a chemistry major. Directions are very simple and easy to understand. It really takes the mystery out of making soap." -- Jackie Pack, Stuart, Virginia "Groundbreaking Anne L. Watson [is the] universally respected and loved author/crafter/curator of this lost art for thousands of aspiring soapers Unquestionably the best book with which to begin. To be precise, it's probably the most accessible, most reader-friendly, and most immediately useful container of information a first-time soapmaker could hope to find." -- Wishing Willow (blog) "BRILLIANT to find the recipes are in grams as well as ounces." -- Jude Birch, Aussie Soap Supplies,

how? Look no further. The Complete Photo Guide to Soap Making is an A-Z primer on all things soap making. Written by About.com soap making expert David Fisher, this easy-to-use book will guide you through everything you need to know from necessary ingredients, tools, and safety requirements to soap making methods, including: melt and pour, hand milling, cold process, and hot process. You'll be a pro in no time! Each of the chapters focuses on a specific method, demonstrating basic process, decorative techniques, recipes, and related products such as scrubs, bath bombs, and liquid soaps. You'll also find a section on how to formulate original recipes, plus guidance on storage and ideas for packaging to impress your friends, family, and maybe even customers! So grab your creativity and some great ingredients and let's get started.

Soapmakers may love to add a variety of materials to soap, but they find that some cause more trouble than others. In the heat of the chemical reaction, an ingredient might discolor, or lose its scent, or develop a bad smell. Or it might cause problems during soapmaking, giving off noxious fumes, or making the soap harden so fast that there's no time to pour it in the mold. Help has arrived. Anne L. Watson extends the low-temp techniques from her book "Milk Soapmaking" to making soap from a variety of special ingredients, including cucumber, citrus, pine tar, beer, and wine. Soaps that have long challenged home soapmakers will now pose no problem at all.

NO STARTER -- NO WASTE -- NO CHEAT -- NO FAIL 100% NATURALLY FERMENTED BREAD IN JUST 24 HOURS WITH YOUR HOME PROOFER, INSTANT POT, SLOW COOKER, SOUS VIDE COOKER, OR OTHER WARMER There's sourdough, and then there's SMART sourdough -- a whole new approach to an ancient bread! Most sourdough recipes lead you through days or even weeks of developing a starter before you

can make your bread -- and then into a lifetime of maintaining that starter. But this book is based on the belief that all that rigmarole is no longer needed. With modern methods of regulating temperature, and with the easy availability of baker's yeast, honest-to-goodness naturally fermented sourdough bread can be made from start to finish in less than a day. With all the benefits of naturally fermented sourdough, it's only the hassle of making it that has discouraged home bakers. Well, hassle no more. The age of smart sourdough has arrived.

//////////////////////////////////// Mark Shepard began baking his own sourdough bread in 1979 and went on to publish the bestselling booklet "Simple Sourdough." In 2012, he began developing a sourdough method that's even simpler and more reliable -- one that could be used by anyone, with no fear of failure. Mark now lives in Bellingham, Washington, with his wife and fellow author, Anne L. Watson.

//////////////////////////////////// "A guidebook that introduces a quicker, easier, and more modern method for creating homemade sourdough bread . . . His straightforward strategy is particularly notable in that it takes less than a day and doesn't use a starter. The author provides useful chapters spotlighting how bakers can customize dough formation and taste variations based on

loaf size, sourness level, and flavor diversifications; methods for rye, buckwheat, tomato basil, chocolate cherry, and other loaves are included, as well as sections on bread bowls, pizza crusts, and pancakes . . . Generously illustrated with charts, illustrations, and photographs. Overall, Shepard's book will encourage home bakers of any skill level to embark on a new, quicker, and easier way to make their own bread . . . A splendid and novel approach that takes the mystery out of a formerly time-consuming process." -- Kirkus Reviews, April 22, 2022 "A fresh new look at making your own sourdough . . . I love Mark's attention to detail. No matter your setup, tools, or needs, he's got you covered . . . I questioned his use of a pinch or two of baker's yeast, but his research and experiments have me sold. His recipes combine the advantages of cultivated yeast and naturally occurring sourdough bacteria to make bread that actually rises and doesn't take days to make."—Holly Howe, author of "Fermentation Made Easy! Mouthwatering Sauerkraut" "Mark Shepard shares how to make sourdough bread, with its characteristic flavor and health benefits, without maintaining a long-term starter. It's relevant to anyone looking to save time in the kitchen, learn a new technique, or just read a very detailed and interesting book

In this comprehensive guide, Susan Miller Cavitch covers everything you need to know to make your own soaps. Learn the basic techniques for crafting oil-, cream-, and vegetable-based soaps, and then start experimenting with your own personalized scents and effects. Cavitch provides tips for making more than 40 different specialty soaps, showing you how to design colorful marbled bars and expertly blend ingredients to create custom fragrances. You’ll soon be making luxurious soaps at a fraction of the cost of boutique products. Important Notice Early printings of this book contain a recipe variation in a sidebar note on page 36. As a result of further testing, author Susan Miller Cavitch and Storey Publishing strongly recommend that you do not try this variation. Adding honey when you are combining the sodium hydroxide and water may result in a stronger reaction with more intense heat. The mixture may bubble up quickly and come out of the pot, posing a potential hazard.

I Think The Babylonians Were Onto Something.... This craft was first mastered by the Babylonians way back in 2800 B.C. Experts discovered this

during an excavation process many years ago. Although the ancient Babylonians may not have had the same tools at their disposal as us, their methods of soap making were not actually that different to the ones that we use today. What's In A Bar Of Soap? Soap can be found in every house in the country. We all use it, but very few of us actually take the time to think about the ingredients contained in a bar of soap.

Worryingly, there are many problems with the standard bars of soap that you can buy in any supermarket. Most of them contain ingredients that can actually be harmful to the skin. This is why we find that so many people are very interested in learning how to make their own soap. Vegan soap is slowly gaining popularity, and there are many reasons for this. First of all, there is the fact that there are absolutely no additives to be found in homemade vegan soap that can be harmful to the skin. Who Says That There's No Short-cuts to Soap & Glory? he great thing about making your own soap is that you can both do it for fun, and give the soap as gifts for family members, or you could even create your own soap making business. However, in order to get the best results, you need to make sure that you know how to make your soap like a pro. This, however, is not as easy as it sounds. Some of the best soap makers in the world have

In almost every country in the world, there is a

tradition of basketmaking, using plants that are indigenous to that particular area. But today, the plastic bag and cardboard box have replaced the basket's role of years gone by. However, there is something quite irresistible about the smell and the tactile appeal of a country hedgerow basket which is not only home-made but is sometimes even home-grown. This book aims to revive interest in the traditional and useful craft of basketmaking. Susie Vaughan offers a fascinating, step-by-step description of how to make a delightful selection of strong, natural-looking and colourful baskets, mostly using materials which have been gathered from hedgerows, woods and gardens. Firstly, she covers the few tools required, then goes on to give a detailed, illustrated description of materials which can either be gathered from the annual prunings of a wide selection of bushes, or those which are farmed and can be bought from specialist suppliers. Her detailed step-by-step description of making a basket is accompanied by numerous diagrams and full-colour photographs to help explain the finer points of detail. She then explores variations in design, both of the shape of the basket and the alternative weaving patterns that can be employed to make the finished work that much more special. Finally, a superb gallery of photographs of finished baskets is included to provide you with ideas and

Do you love the feel of milk soaps but shy away from the cost? Are you looking for a special kind of gift you can make yourself? Or do you already make soap and want to try something new? Anne L. Watson's "Smart Soapmaking" was the first book based on modern techniques that eliminate the drudgery and guesswork from home soapmaking. Now, by popular demand, she continues her soapmaking revolution with the first practical, comprehensive book on making milk soap from scratch. Experience the rich, soothing, luxurious feel of milk soap you've made yourself. Your skin will thank you for it.

////////// "Beautiful in its simplicity. . . . A definitive book for experienced as well as beginning milk soapers." -- Rebekah Bailey, The Original Soap Dish, South Whitley, Indiana "An easy to read and understand book that will take the mystery out of milk-based soapmaking and debunk some of the myths surrounding it. It contains some great basic formulas to get you started making milk soaps of any kind, and fuel to let your imagination

run wild when you are ready to formulate your own creations. A good source of information for new soapmakers, and also suitable for more experienced soapmakers who want to start making milk soaps but thought it would be too difficult." -- Amanda Guilfoyle, Bodelicious Bath & Body Products, Ipswich, Queensland, Australia "As always, Anne is up to her usual excellence. This book demystifies milk soapmaking so everyone can have the luxury of a truly decadent bar of soap *easily*. LOVE this book!!!" -- Susan Kennedy, Oregon Trail Soaps, Rogue River, Oregon "If you have an interest in milk soaps, this is the book for you. . . . Debunks much of the popular wisdom that may have discouraged some soapmakers." -- Kevin M. Dunn, Author, "Scientific Soapmaking" and "Caveman Chemistry" "As uber-soapmaker Anne L. Watson demonstrates, milk soaps made properly are [rightfully] well-known for a quality of luxurious buttery softness that is undeniable. . . . Anne once again acquits herself ably as a scholar of the suds and a natural communicator." -- Wishing Willow (blog) "Enthusiastically recommended." -- Midwest Book Review, Feb. 2009, "Reviewer's Choice" "Full of information that milk soapers, whether novice or experienced, could use to make better milk soaps. Anne writes in a conversational style that made me feel as though I were sitting down with her in her kitchen. . . . Anne details what seems to be everything there is to know about the subject. Rather than simply offering her opinions and favorite practices, Anne did extensive testing and experimenting, learning how to make the best milk soap bars that could be made. Soapmakers will be impressed with the amount and quality of

Anne's research and observations. . . . That leaves the question: Can a neophyte made good cold-process milk soap? I now say yes, with the caveat they have 'Milk Soapmaking' in hand." -- Beth Byrne, "The Saponifier," Sept.-Oct. 2010

Make your own custom-tailored and perfectly formed cold-process soaps!
