Are you interested in Art and the Humanities? Have you been learning English for a long time but do not have enough confidence to carry out tasks in these fields efficiently? Would you like to learn necessary strategies and skills? Expanding your English and Creative Skills through Art and the Humanities has been designed for students or professionals who would like to use and improve the areas such as history, art history, literature, film and media, and language, at an upper-intermediate or advanced level. This book integrates practice of the four skills (reading, listening, speaking and writing) and has been written from a holistic and humanistic approach. An important aspect that is emphasized is how to acquire intercultural competence in a globalized world. The approach is a very practical one. You will learn how to carry out tasks such as commenting on artistic and multimedia materials, providing conservation advice, advertising a product or service, making a successful speech or oral presentation, and writing your own curriculum vitae. All the skills that will help increase your confidence in using the English language!

This is the second edition of David Powers' highly-respected PHP Solutions: Dynamic Web Design Made Easy. This new edition has been updated by David to incorporate changes to PHP since the first edition and to offer the latest techniques—a classic guide modernized for 21st century PHP techniques, innovations, and best practices. You want to make your websites more dynamic by adding interactivity, form, creating a private area where members can upload images that are automatically resized, or perhaps storing all your content in a database. The problem is, you're not a programmer and the thought of writing code sends a chill up your spine. Or maybe you've dabbled a bit in PHP and MySQL, but you can't get past baby steps. If this describes you, then you've just found the right book. PHP and MySQL and database are deservedly the most popular combination for creating dynamic websites. They're free, easy to use, and provided by many web hosting companies in their standard packages. Unfortunately, most PHP books either expect you to be an expert already or force you to go through endless exercises of little practical value. In contrast, this book gives you real value right away through a series of practical examples that you can incorporate directly into your sites, optimizing performance and adding functionality such as file uploading, email feedback forms, image galleries, content management systems, and much more. Each solution is created with not only functionality in mind, but also visual design. But this book doesn't just provide a collection of ready-made scripts: each PHP Solution shows you what's gone before, teaching you the basics of PHP and database design quickly and painlessly. By the end of the book, you'll have the confidence to start writing your own scripts or—if you prefer—to pass that task to others—to adapt existing scripts to your own requirements. Right from the start, you're shown how easy it is to protect your sites by adopting secure coding practices.

All animals are equal but some animals are more equal than others. It's just an ordinary farm - until the animals revolt. They get rid of the irresponsible farmer. The other animals are sure that life will be better but as systems are replaced and half-truths are retold, a new hierarchy emerges . . . Orwell's tale of propaganda, power and greed has never felt more pertinent. With an exciting new cover and illustrations by superstar Chris Mould.

Decades ago, there was no distinct middle class in the People's Republic of China. Any meaningful discussion of China's economy, politics, or society must take into account the rapid emergence and explosive growth of the Chinese middle class. This book details the origins and characteristics of this dramatic change.

At a time when debates about social inequality are in the spotlight, it is worth examining how the two most popular media of the 20th and 21st centuries--film and television--have shaped the representation of social classes. How do generic conventions determine the representation of social stereotypes? How do filmmakers challenge social class identification? How do factors such as national history, geography and gender affect the representation of social classes? This collection of new essays explores these and other questions through an analysis of a wide range of American and British productions--from sitcoms and reality TV to documentaries and auteur cinema--from the 1950s to the present.

David Crystal's classic English as a Global Language considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

Josie is independent and fierce. She may flirt with boys or kiss them, but it doesn't mean anything, not even with Michael, who's more like a friend-with-benefits. So how can she explain what happens when Carson Gold goes after her? Carson Gold, the hottest senior, the one everyone secretly watches. . . . Maybe it's the same thing that causes all the girls to stare as he walks by. Or maybe it's something between them, something just he and Josie share. Could you resist? It's too much, when love finds you and pulls you under. It's too much, even for Josie.

A Times Literary Supplement's Book of the Year 2020 A New Statesman's Best Book of 2020 A Bloomberg's Best Book of 2020 A Guardian Best Book About Ideas of 2020 The world-renowned philosopher and author of the bestselling Justice explores the central question of our time: What has become of the common good? These are dangerous times for democracy. We live in an age of winners and losers, where the odds are stacked in favor of the already fortunate. Stalled social mobility and entrenched inequality give the lie to the American credo that "you can make it if you try". The consequence is a brew of anger and frustration that has fueled populist protest and extreme polarization, and led to deep distrust of both government and our fellow citizens--leaving us morally unprepared to face the profound challenges of our time. World-renowned philosopher Michael J. Sandel argues that to overcome the crises that are upending our world, we must rethink the attitudes toward success and failure that have accompanied globalization and rising inequality. Sandel shows the hubris a meritocracy generates among the winners and the harsh judgement it imposes on those left behind, and traces the dire consequences across a wide swath of American life. He offers an alternative way of thinking about success--more attentive to the role of luck in human affairs, more conducive to an ethic of humility and solidarity, and more affirming of the

dignity of work. The Tyranny of Merit points us toward a hopeful vision of a new politics of the common good.

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Though decades ago school shootings were rare events, today they are becoming normalized. Active shooter drills have become more commonplace as pressure is placed on schools and law enforcement to prevent the next attack. Yet others argue the traumatizing effects of such exercises on the students. Additionally, violence between students continues to remain problematic as bullying pervades children's lives both at school and at home, leading to negative mental health impacts and, in extreme cases, suicide. Establishing safer school policies, promoting violence prevention programs, building healthier classroom environments, and providing better staff training are all vital for protecting students physically and mentally. The Research Anthology on School Shootings, Peer Victimization, and Solutions for Building Safer Educational Institutions examines the current sources of violence within educational systems, and it offers solutions on how to provide a safer space for both students and educators alike. Broken into four sections, the book examines the causes and impacts that peer victimization has on students and how this can lead to further violence and investigates strategies for detecting the warning signs. The book provides solutions that range from policies and programs that can be established to strategies for teaching nonviolence and promoting coexistence in the classroom. Highlighting a range of topics such as violence prevention, school climate, and bullying, this publication is an ideal reference source for school administrators, law enforcement, teachers, government and state officials, school boards, academicians, researchers, and upper-level students who are intent on stopping the persisting and unfortunate problem that is school violence.

The book that inspired the major new motion picture Mandela: Long Walk to Freedom. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's anti-apartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. LONG WALK TO FREEDOM is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

Tells a story about the strange relationship of two migrant workers who are able to realize their dreams of an easy life until one of them succumbs to his weakness for soft, helpless creatures and strangles a farmer's wife.

This book illustrates the degree of variability in voting behaviour within social groups and suggests reasons for that variability. It reviews and critiques conventional analyses and presents statistical analyses of the geography of voting in England. The book reveals that substantial geographical variations exist in the widely-held

generalisations, such as that white-collar owner-occupiers favour the Conservatives or that blue-collar council tenants prefer Labour.

Inhaltsangabe:Abstract: Environmental matters and in particular climate change are among the most discussed issues at present. The aviation industry has been in the spotlight of politicians, environmentalists and the Media for its detrimental impacts on the natural environment and the question rises as whether the increased publication of the problem leads to the more environmental conscious consumer purchasing behaviour in terms of booking flights? The study aimed to answer this question. On the one hand the topic was chosen as it represents a current issue; on the other the topic of environmental conscious consumer buying behaviour appears to be under researched. The study intended to work through following objectives in order to find an answer to the main study aim: - How important is the climate change issue to consumers? - Can green marketing and environmental policy making bring a commercial benefit? - To analyse environmentally conscious consumer behaviour. - To analyse whether potential air travellers consider environmental attributes prior to booking a flight by looking at airlines environmental commitment. First of all existing literature surrounding the topic of green marketing and environmental consumer behaviour was reviewed prior to conducting primary research. Primary research was conducted by means of a questionnaire which was distributed to 100 people at Bournemouth, Southampton and Heathrow Airport. The results were subsequently analysed with the aid of SPSS and related to the literature reviewed. Research results exemplified that environmental concern among the population does not exist to an extent that environmental conscious purchasing is likely to take place. In terms of the booking of flights the majority of consumers do not consider airlines environmental attributes in their purchase decision making. Other factors such as travel costs and travel comfort still play a far more decisive role in most individual s decision making. However, the study could reveal that one of the main reasons for this being the case was that most respondents were not aware that airlines can be environmentally responsible. Hence, the findings of the study recommend that airlines should show more evidence of environmental responsibility to potential customers.
