In a series of riveting interviews, America's senior statesman discusses the challenges of directing foreign policy during times of great global tension. As National Security Advisor to Richard Nixon, Henry Kissinger transformed America's approach to diplomacy with China, the USSR, Vietnam, and the Middle East, laying the foundations for geopolitics as we know them today. Nearly fifty years later, escalating tensions between the US, China, and Russia are threatening a swift return to the

same diplomatic game of tug-of-war that Kissinger played so masterfully. Kissinger on Kissinger is a series of faithfully transcribed interviews conducted by the elder statesman's longtime associate, Winston Lord, which captures Kissinger's thoughts on the specific challenges that he faced during his tenure as NSA, his general advice on leadership and international relations, and stunning portraits of the larger-than-life world leaders of the era. The result is a frank and well-informed overview of US foreign policy in the first half of the 70s—essential reading for anyone hoping to understand

tomorrow's global challenges. "I mean, it's not as if I want a father. I have a father. It's just that I don't know who he is or where he is. But I have one." Ramiro Lopez and Jake Upthegrove don't appear to have much in common. Ram lives in the Mexican-American working-class barrio of El Paso called "Dizzy Land." His brother is sinking into a world of drugs, wreaking havoc in their household. Jake is a rich West Side white boy who has developed a problem managing his anger. An only child, he is a misfit in his mother's shallow and materialistic world. But Ram and Jake do have one thing in

common: They are lost boys who have never met their fathers. This sad fact has left both of them undeniably scarred and obsessed with the men who abandoned them. As Jake and Ram overcome their suspicions of each other, they begin to move away from their loner existences and realize that they are capable of reaching out beyond their wounds and the neighborhoods that they grew up in. Their friendship becomes a healing in a world of hurt. This book provides a solution. Neil McDonald advocates his favourite opening - the very popular French Defence - but chooses a repertoire for Black that requires only the minimum amount of move memorization. The lines he selects are very easy to learn and play - perfect for those who are unwilling to be slaves to opening theory. But there's also something here for more experienced

Understanding what your

doing, you will end up complaining about bad luck after every game. This book consists of four chapters, all associated with the ability to think not only for yourself, but also for your opponent, to put yourself in his place. In this book, renowned author and chess trainer Mark Dvoretsky supplies the reader with high-quality material for independent training. Each chapter starts with a short theoretical section. Then dozens of exercises are given, from easy, even elementary, to difficult.

Training your skills in searching for a move and calculating variations will help you at all stages of the game - which is why among the almost 500 exercises, there are opening, middlegame and endgame positions.

Finally, the comments in the Solutions are quite detailed. Throughout the book, the author has tried to set forth the logic of the search for a solution, to show how a player can come to the right conclusions at the board.

Novice chess players now have a puzzle book just for them, complete with 400 diagrams and written by one of the most popular and accessible authors on the game for use in his own classes. Even children will have a good time trying these out and learning the right way to deliver a checkmate in one, two, or more moves from hundreds of different chess positions. By tackling these puzzles,

A beautiful, gritty, and charming port city where French old-world charm meets modern bohemia, father and son stroll the streets sharing strained small talk. But as the hours pass and day gives way to night, the two find themselves caught in a series of

Described by Virginia Woolf herself as 'easily the best of my books', and by her husband Leonard as a 'masterpiece', To the Lighthouse, first published in 1927, is one of the milestones of Modernism. Set on the Isle of Skye, over a decade spanning the First World War, the narrative centres on the Ramsay family, and is framed by Mrs Ramsay's promise to take a trip to the lighthouse the next day - a promise which isn't to be fulfilled for a decade. Flowing from character to character and

Why our brains aren't built for media multitasking, and how we can learn to live with technology in a more balanced way. "Brilliant and practical, just what we need in these techno-human times."—Jack Kornfield, author of The Wise Heart

Most of us will freely admit that we are obsessed with our devices. We pride ourselves on our ability to multitask—read work email, reply to a text, check Facebook, watch a video clip. Talk on the phone, send a text, drive a car. Enjoy family dinner with a glowing smartphone next to our plates. We can do it all, 24/7! Never mind the

errors in the email, the near-miss on the road, and the unheard conversation at the table. In The Distracted Mind, Adam Gazzaley and Larry Rosen—a neuroscientist and a psychologist—explain why our brains aren't built for multitasking, and suggest better ways to live in a high-tech world without giving up our modern technology. The authors explain that our brains are limited in their ability to pay attention. We don't really multitask but rather switch rapidly between tasks. Distractions and interruptions, often technology-related—referred to by the authors as

Get Free Soluzioni Libro Brilliant 2

“interference”—collide with our goal-setting abilities. We want to finish this paper/spreadsheet/sentence, but our phone signals an incoming message and we drop everything. Even without an alert, we decide that we “must” check in on social media immediately. Gazzaley and Rosen offer practical strategies, backed by science, to fight distraction. We can change our brains with meditation, video games, and physical exercise; we can change our behavior by planning our accessibility and recognizing our anxiety about being out of touch even briefly. They don't

suggest that we give up our devices, but that we use them in a more balanced way.
