If there's a bad idea in Tugalo County, chances are that Mack and Marshall Dooley are behind it. When the brothers heist a snake-handling church's money-laundering operation, things go south in a hurry. This part of the north Georgia hills ain't much, just hardscrabble folks trying to get by. It's the perfect place to wash a load of cash -- and an even better place to make your enemies disappear. When Mack goes missing, Marshall cuts a deal with a local crime boss to rescue his brother. Navigating a storm of wild women and a literal nest of vipers, the Dooleys can't trust anyone other than themselves to get out of the mess they've made. Praise for A VIOLENT GOSPEL: "Let me be the first to sing A Violent Gospel's praises. Mark Westmoreland's debut is the literary equivalent of The Dukes of Hazzard driving onto the set of Elmore Leonard's Justified. This book is filled with folks who know right from wrong but don't like boring." -David Tromblay, author of As You Were and Sangre Road "Mark Westmoreland's A Violent Gospel is a down-n-dirty, rough-n-tumble romp where no punches are pulled, and Old Testament justice is the law of the land." -Steph Post, author of Lightwood and Miraculum "In A Violent Gospel Mark Westmoreland stakes his claim as a powerful voice in the Neo-Southern Gothic Movement. Equal parts Flannery O'Connor, Harry Crews with a smidge of Gator era Burt Reynolds, A Violent Gospel is a visceral slice of existential cornbread." -S.A. Cosby, author of Razorblade Tears and Blacktop Wasteland "This book is rural crime fiction at its best. A bullet read that gets right down to the dark and dirty point. Westmoreland's ability to play in the gray area between darkness and light is spot on word candy that is perfectly suited to the title of A Violent Gospel. Look out for this guy. He's going to listed with Daniel Woodrell and Tom Franklin in no time." -Brian Panowich, author of Hard Cash Valley and Bull Mountain "A Violent Gospel is one rollicking old testament ass whoopin' of a debut. Westmoreland is an exciting new voice in southern noir, delivering 100 Proof Hellbilly Pulp and I can't wait for more." -Peter Farris, author of Last Call for the Living and Clay Eaters

Seaside Heights tells the history of a timeless seashore resort community located on a barrier island nestled between the Atlantic Ocean and Barnegat Bay. The 224-acre town was settled by residents of Philadelphia and Camden, who purchased white-sand lots to escape city life for the brisk ocean breezes and tranquility that Seaside Heights offered prior to World War II. Seaside Heights uses the scenes captured in vintage postcards, some of them very rare, as a study of the changes that have occurred in the town since its incorporation in 1913.

Bond is back with a license to thrill. Forty-three years ago, Ian Fleming wrote his last great 007 adventure. Now, in Devil May Care, the world's most iconic spy returns in a Cold War story spanning the world's exotic locations. By invitation of the Fleming estate to mark the centenary of his birth, acclaimed novelist Sebastian Faulks picks up where Fleming left off, writing a tour de force that will electrify every James Bond fan. A fitting tribute to the Bond tradition, Devil May Care stands on its own as a triumph of witty prose and plenty of double-0 action. "In his house in Jamaica, Ian Fleming used to write a thousand words in the morning, then go snorkeling, have a cocktail, lunch on the terrace, more diving, another thousand words in the late afternoon, then more martinis and glamorous women. In my house in London, I followed this routine exactly, apart from the cocktails, the lunch, and the snorkeling." —Sebastian Faulks

The financial crisis is just beginning for retail institutions. Ninety to ninety-five per cent of bank transactions are executed electronically today. The Internet, ATMs, call centres and smartphones have become mainstream for customers. But banks still classify these as alternative channels and maintain an organisation structure where Branch dominates thinking. Continued technology innovations, Web 2.0, social networking, app phones and mobility are also stretching traditional banking models to the limit. BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet all within the next 10 years. Reading has arguably the longest and richest history of any domain for scientifically considering the impact of technology on the user. From the 1920s to the 1950s, Miles Tinker [1963] and other researchers ran hundreds of user tests that examined the effects of different fonts and text layout variables, such as the amount of vertical space between each line of text (called leading). Their research focused on user performance, and reading speed was the favoured measure. They charted the effect of the manipulated variables on reading speed, looking for the point at which their participants could read the fastest. Their assumption was that faster reading speeds created a more optimal experience. Printers and publishers eagerly consumed this research. In recent years, some of these variables have been reexamined as the technology and capabilities evolve with the advent of computers and computer screens. Dillon [1992] examined how to design textual information for an electronic environment. Boyarski et al. [1998] examined the effect of fonts that were designed for computer screens. Dyson & Kipping [1998] examined the effect of line length on computer screens. Larson et al. [2000] examined the effect of 3-D rotation on reading. Gugerty et al. [2004] demonstrated a reading performance advantage with the Microsoft ClearType display technology.

This book constitutes the refereed proceedings of the 7th Pacific Rim Conference on Multimedia, PCM 2006, held in Hangzhou, China in November 2006. The 116 revised papers presented cover a wide range of topics, including all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues. Named a Best Book of 2021 by NPR • Harper’s Bazaar • CrimeReads • Electric Literature • Autostraddle • The Globe and Mail In this thrilling story of survival and anger, a woman has her whole life turned upside down after speaking out against workplace hostility—and inadvertently becomes the leader of a cultural movement. Eliza Bright was living the dream as an elite video game coder at Fancy Dog Games when her private life suddenly became public. But is Eliza Bright a brilliant, self-taught coder bravely calling out the toxic masculinity and chauvinism that pervades her workplace and industry? Or, is Eliza Bright a woman who needs to be destroyed to protect "the sanctity of gaming culture"? It depends on who you ask... When Eliza reports an incident of workplace harassment that is quickly dismissed, she's forced to take her frustrations to a journalist who blasts her story across the Internet. She's fired and doxxed, and becomes a rallying figure for women across America. But she's also enraged the beast that is male gamers on 4Chan and Reddit, whose collective, unreliable voice narrates our story. Soon Eliza is in the cross-hairs of the gaming community, threatened and stalked as they monitor her every move online and across New York City. As the violent power of an angry male collective descends upon everyone in Eliza's life, it becomes increasingly difficult to know who to trust, even when she's eventually taken in and protected by an under-the-radar Collective known as the Sixsterhood. The violence moves from cyberspace to the real world, as a vicious male super-fan known only as The Inspectre is determined to exact his revenge on behalf of men everywhere. We watch alongside the Sixsterhood and subreddit incels as this dramatic cat-and-mouse game plays out to reach its violent and inevitable conclusion. This is an extraordinary, unputdownable novel that explores the dark recesses of the Internet and male rage, and the fragile line between the online world and real life. It's a thrilling story of female resilience and survival, packed with a powerful feminist message.

Like many ideological dictatorships of the twentieth century, North Korea has always considered cinema an indispensable propaganda tool. No other medium penetrated the whole of the population so thoroughly, and no other medium remained so strictly and exclusively under state control. Through movies, the two successive leaders Kim Il Sung and Kim Jong Il propagandized their policies and sought to rally the masses behind them, with great success. This volume chronicles the history of North Korean cinema from its beginnings to today, examining the obstacles the film industry faced as well as the many social problems the films themselves reveal. It provides detailed analyses of major and minor films and explores important developments in the industry within the context of the concurrent social and political atmosphere. Through the lens of cinema emerges a fresh perspective on the history of North Korean politics, culture, and ideology.

Charlotte Perkins Gilman (1860-1935) penned this sardonic remark in her autobiography, encapsulating a lifetime of frustration with the gender-based double standard that prevailed in turn-of-the-century America. With her slyly humorous novel, Herland (1915), she created a fictional utopia where not only is face powder obsolete, but an all-female population has created a peaceful, progressive, environmentally-conscious country from which men have been absent for two thousand years. Gilman was enormously prolific, publishing five hundred poems, two hundred short stories, hundreds of essays, eight novels, and seven years' worth of her monthly magazine, The Forerunner. She emerged as one of the key figures in the women's movement of her day, advocating equality of the sexes, the right of women to work, and socialized child care, among other issues. Today Gilman is perhaps best known for the chilling depiction of a woman's mental breakdown in her unforgettable short story, "The Yellow Wall-Paper". This Penguin Twentieth-Century Classics edition includes both this landmark work and Herland, together with a selection of Gilman's major short stories and her poems. This book explores how entrepreneurial networks provide the basis for individuals and firms to compete based on knowledge asymmetries. This book states that this is crucial in the increasingly interdependent world where social capital influences potential market performance. This edited book focuses on future trends regarding entrepreneurial networks in terms of social, cultural and market connections thereby bridging the entrepreneurship, strategy and network literature. This book provides a practical way to capture market changes as networks evolve to a more digital format. The impact of innovation and strategy on these market developments will be discussed in each chapter as a way to understand performance.

Literary Nonfiction. Art. Introduced by Matthew Scott. DIAGRAMS is a book that collects 49 diagram drawings made between 2009 and 2014, and includes a conversation-based essay between the artists and the Canadian math scholar, Matthew Scott. These diagrams are an attempt at using the objective visual language of mathematical diagraming to illustrate some of the most important concepts we use to underpin our subjective understanding of the world. In what seems like a hopeless task, the central concern is not how these must inevitably fail to communicate in a truly objective way, but how they might actually succeed.
