Historical and Multinational Perspectives

South African national bibliography

This volume reflects on the role played by textbooks in the complex

relationship between war and education from a historical and multinational perspective, asking how textbook content and production can play a part in these processes. It has long been established that history textbooks play a key role in shaping the next generation's understanding of both past events and the concept of 'friend' and 'foe'. Considering both current and historical textbooks, often through a bi-national comparative approach, the editors and contributors investigate various important aspects of the relationships between textbooks and war, including the role wars play in the creation of national identities (whether the country is on the winning or losing side), the effacement of international wars to highlight a country's exceptionalism, or the obscuring of intra-national conflict through the ways in which a civil war is portrayed. This pioneering book will be of interest and value to students and scholars of textbooks, educational media and the relationships between curricula and war.

Ladybird has published fairy tales for over forty-five years, bringing the magic of traditional stories to each new generation of children. These classic stories are based on the original Ladybird retellings by Vera Southgate, with beautiful new illustrations of the kind children like best - full of richness and detail. An essential part of any child's bookshelf, Ladybird Tales are perfect for sharing together and creating memories to treasure forever. This beautiful treasury brings together five of everyone's favourite fairy tales: Hansel and Gretel, Cinderella, Aladdin, Snow White and the Seven Dwarfs, and Puss in Boots. Academic literacy - prepare to learn is different from traditional courses in that it is task-based: it requires of language learners who are developing their academic literacy to do authentic academic tasks and to solve real academic problems.

A prominent popular science writer presents simple instructions for 100 illustrated experiments.

Memorable, easily understood experiments illuminate principles related to astronomy, chemistry, physiology, psychology, mathematics, topology, probability, acoustics, other areas.
