Winner of the 2015 Ruth Benedict Prize for Outstanding Edited Volume Sex, sexuality and sexual relationships are hotly debated in Indonesia, triggering complex and often passionate responses. This innovative volume explores these issues in a variety of ways. It highlights historical and newer forms of sexual diversity, as well as the social responses they provoke. It critiques differing representations of sexuality, pointing to the multiplicity of discourses within which sexuality

and "the sexual" are understood in modern-day Indonesia. Placing sexuality centre-stage and locating it within the specific historical context of the Reformasi era, this landmark volume explores understandings and practices across a wide variety of sites, focusing in on a diverse group of Indonesian actors, and the contested meanings that sexuality carries. Beginning with a substantive introduction and concluding with a scholarly reflection on key issues, the volume is framed around the four themes of sexual politics, health, diversity and representations. It seeks both to present new empirical findings as well as to add to existing theoretical analysis. This work fills an important gap in our understanding of the evolution and contemporary dynamics of Indonesian sexualities. It will be of interest to scholars and academics

"Mean Streets offers, in a single, sustained argument, a theory of the social and economic logic behind the historical development, evolution, and especially persistence of homelessness in the contemporary city. By updating and revisiting thirty years of research and thinking, Don Mitchell explores the conditions that produce and sustain homelessness, and how its persistence relates to the way capital works in the urban built environment. Consequently, he unpacks the structure, meaning, uses, and governance of urban public space. As one reviewer commented, "thinking about the histories under which the homeless have been

produced and regulated is vital." Mitchell traces his argument through two sections: a broadly historical overview, followed by an exploration of recent Supreme Court jurisprudence that also expands the discussion beyond the regulation of the homeless and the poor, arguing that this has 'metastasized' to become more general issue, affecting all urbanites"--

This book explores the interactions between queer identity, experience, and activism and a range of communal and public spaces.

empirical (or evidence-based) criminology and criminal justice on this vast and diverse country-by focusing on research that is both balanced and precise. This book brings together a diverse set of 32 academics from India, the US, and the UK who have authored 19 chapters on many aspects of crime and justice in India. The organizational components or sectors of the criminal justice system are the police, the courts, and corrections. The studies collected here provide balanced coverage of the entire criminal justice system and not just one component of it. The first section of this book consists of overviews of several major issues that affect the entire criminal justice system. Section Two considers topics related to the gateway of the criminal justice system, policing. Section Three takes up the operational problems

Each chapter focuses on Supreme Court cases that articulate the constitutional requirements, while call-out boxes outline statutes or state constitutional law provisions that impose more stringent rules. Short problem cases, also in boxes, ask students to apply these principles to new fact patterns. Each chapter ends with a Practice and Policy section that delves deeper into the conceptual and practical obstacles to the realization of procedural rights in the daily practice of criminal law. The result is a modular format, presented in a lively visual

Recent global appropriations of public spaces through urban activism, public uprising, and political protest have brought back democratic values, beliefs, and practices that have been historically associated with cities. Given the aggressive commodification of public re- sources, public space is critically important due to its capacity to enable forms of public dis- course and social practice which are fundamental for the well-being of democratic societies. Louie Dean Valencia-García skillfully examines how young Spaniards occupied public plazas, subverted Spanish cultural norms and undermined the authoritarian state by participating in a postmodern punk subculture that eventually grew into the 'Movida Madrileña'. In doing so, he exposes how this antiauthoritarian youth culture reflected a mixture of sexual liberation, a rejection of the ideological indoctrination of the dictatorship, a reinvention of native Iberian pluralistic traditions and

Ali Rahnama's work is a meticulous historical reconstruction of the Iranian coup d'état in 1953 that led to the overthrow of Mohammed Mosaddeq and his government. Mosaddeq's removal from power has probably attracted more attention than any other event occurring during his tenure because of the role of foreign involvement, the political, economic and social impact on Iran, and the long-term impact the ousting had on Iran-US relations. Drawing on American, British and Iranian sources, Rahnama closely examines the four-day

period between the first failed coup and the second successful attempt, investigating in fine detail how the two coups were conceptualised, rationalised and executed by players on both the Anglo-American and Iranian sides. Through painstaking research into little-studied sources, Rahnema casts new light on how a small group of highly influential pro-Britain politicians and power brokers revisited the realities on the ground with the CIA operatives dispatched to Iran and how they recalibrated a new, and ultimately successful, operational plan.

The aim of this collection of essays, the first academic book on the topic in English, is to offer a preliminary analysis of Gezi protests and address the following questions: 'How can we account for the protests?' and 'Who were the protesters?'

The world has witnessed many protests in recent years over a range of issues, from climate change and rights of marginalized communities to threats to democracy or the rise of fundamentalism. This collection explores how any particular city (usually the capital of a nation) participates in, and provides answers and closure (or not) to, the issue and its protesters, negotiating both their identities and its own. Drawing on critical geopolitics and related strands of social theory, this book combines new case studies with theoretical and methodological reflections on the geographical analysis of security and insecurity. It brings together a mixture of early career and more established scholars and interprets security and the war on terror across a number of domains, including: international law, religion, migration,
