Evacuate by Margaret Seiders-Metz *It is hard to believe that these calm waters that we swim in, fish and cruise on with our pontoons and boats, would turn against us with its swift currents, dragging everything in its path along the way to destruction, leaving the victims suffering from the horrible disaster of flooding. It is useless to fight those swift, dangerous currents since they have strength of their own that no human can beat. The flooding water destroys houses, trees, boats, piers, even the heavy appliances and furniture inside our flooded homes. The damage one is left with is unbelievable and very depressing after you see your beautiful items destroyed from the high levels of mud and water left inside your house. But, life goes on, and you start repairing and replacing the damage only to have it all damaged again and again by more floods. You thank the Good Lord that He spared your family, pets and yourself. Material things can be replaced, but a life cannot be.*

This book for architects, interior designers, building managers, students, conference organisers looks at first principles to provide the user with the 'tools' to make their own decisions rather than a 'cookbook' approach. It is intended that designs and product information can be taken straight from the manual and inserted into ongoing projects. For the first time the book considers the needs of people with visual, hearing and mental disabilities, who make up the majority of disabled people in the population, alongside those of people with physical mobility disabilities. Practical low cost solutions to retro-fitting existing buildings are discussed, as well as the methods used to assess the suitability of an existing building, and assembling a project to improve access for disabled people. Specific products and designs are illustrated and discussed - with full working technical drawings, and full specification details. These will reduce considerably the research time needed to produce a cost-effective solution that will improve access for disabled people. A perspective of the standards and legislation dealing with access issues in the UK is compared with those in other countries, and the standards mentioned are compared with the realities of practical implementation carried out in 4 years of design in this area.

Aspiring to win a cash prize that will help his family avoid eviction after his father passes away, seventh-grader Benjamin Epstein uses his flair for clever slogans to participate in a contest being run by a bathroom tissue company. Simultaneous eBook.

Start with a simple block. Slice, turn, and sew slices back together. Then watch the magic happen! It's hard to believe such complex-looking quilts can come from such easy-to-sew blocks, but turnaround techniques transform even the most basic blocks into showstopping quilts. In some cases slicing isn't even necessary—just turn units as directed for unique designs! Each chapter focuses on a single block; just follow along to sew, slice, turn, and sew again. Find several design options for each block, along with a total of 24 quilt patterns, so you can make lap quilts, runners, and more with the turnaround blocks you create.

The Association of British Theatre Technicians produced its first guide to the design and planning of theatres in 1972. Revised in 1986, it became the standard reference work for anyone involved in building, refurbishing, or creating a performance space. Theatre Buildings – a design guide is its successor. Written and illustrated by a highly experienced team of international theatre designers and practitioners, it retains the practical approach of the original while extending the scope to take account of the development of new technologies, new forms of presentation, changing expectations, and the economic and social pressures which require every part of the theatre to be as productive as possible. The book takes the reader through the whole process of planning and designing a theatre. It looks in detail at each area of the building: front of house, auditorium, backstage, and office spaces. It gives specific guidance on signage, acoustics, stage engineering, lighting, sound and video, auditorium and stage formats. Aspects such as catering, conference and education use are also covered. The information is supplemented by twenty-eight case studies, selected to provide examples which range in size, style and format and to cover new buildings, renovations, conversions, temporary and found space. The studies include Den Norsk, Oslo; The Guthrie Theatre, Minneapolis; The Lliça, Barcelona; Les Bouffes du Nord, Paris; The RSC's Courtyard Theatre in Stratford on Avon; and the MTC Theatre in Melbourne. All have plans and sections drawn to 1:500 scale. The book contains around 100 high-quality full colour images as well as over 60 specially drawn charts and diagrams explaining formats, relationships and technical details.

We all have treasured possessions—a favorite pair of shoes, a much-beloved chair, an ever-expanding record collection. But sometimes, this emotional attachment to our belongings can spiral out of control and culminate into a condition called compulsive hoarding. From hobbyists and collectors to pack rats and compulsive shoppers—it is close to impossible for hoarders to relinquish their precious objects, even if it means that stuff takes over their lives and their homes. According to psychologist Dr. Robin Zasio, our fascination with hoarding stems from the fact that most of us fall somewhere on the hoarding continuum. Even though it may not regularly interfere with our everyday lives, to some degree or another, many of us hoard. The Hoarder In You provides practical advice for decluttering and organizing, including how to tame the emotional pull of acquiring additional things, make order out of chaos by getting a handle on clutter, and create an organizational system that reduces stress and anxiety. Dr. Zasio also shares some of the most serious cases of hoarding that she's encountered, and explains how we can learn from these extreme examples—no matter where we are on the hoarding continuum.
