Students such as these may be working for an international company, are relocating to an English-speaking country, or may simply want to focus on their interview technique. Also, professionals may be able to describe the technical intricacies of their job

has struggled with heroin, alcohol, sex, fame, food and eBay, that will help addicts and their loved ones make the first steps into recovery “This manual for self-realization comes not from a mountain but from the mud...My qualification is not that I am better than you but I am worse.” —Russell Brand With a rare mix of honesty, humor, and compassion, comedian and movie star Russell Brand mines his own wild story and shares the advice and wisdom he has gained through his fourteen years of recovery. Brand speaks to those suffering along the full spectrum of addiction—from drugs, alcohol, caffeine, and sugar addictions to addictions to work, stress, bad relationships, digital media, and fame. Brand understands that addiction can take many shapes and sizes and how the process of staying clean, sane, and unhooked is a daily activity. He believes that the question is not “Why are you addicted?” but “What pain is your addiction masking? Why are you running—into the wrong job, the wrong life, the wrong person’s arms?” Russell has been in all the twelve-step fellowships going, he’s started his own men’s group, he’s a therapy regular and a practiced yogi—and while he’s worked on this material as part of his comedy and previous bestsellers, he’s never before shared the tools that really took him out of it, that keep him clean and clear. Here he provides not only a recovery plan, but an attempt to make sense of the ailing world.

We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The 'machine habitus' is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our
