Taking a decision about your future is not very simple, it requires intensive research and some strong decision making skills. Am I choosing the right course, will I get a job after I graduate, should I do what I love doing, will I be able to manage my budgets? These questions are always relevant to students who are planning to pursue their higher education and easyuni's guidebook is an attempt to answer a few of these questions. This guidebook is another step forward to improve the entire experience of university selection and application. The guidebook is an attempt to answer questions of millions of students who are eligible for enrollment in higher education institutes in 2013-2014. The guidebook consists of 80 pages of educational content, including articles on studying abroad, choosing and applying for universities, what to study, and scholarships & loans among others. The articles also focus heavily on the seven most popular subjects, namely Engineering, Medicine, Information Technology, Science, Arts and Creative Design, and Business and Accounting. This book of proceedings collects fifty-one papers presented at the inaugural Colloquium of Administrative Science and Technology (CoAST 2013) event, held at Kuching, Sarawak, Malaysia. It has been reviewed by 750 experts world-wide and covers three main areas – Administrative Science and Technology, Management, and Arts and Humanities. The papers in this volume reflect:

- the importance of the social sciences in academia and in the nations' social-economic growth;*
- the multi-disciplinary and trans-disciplinary nature*

of academia that transcends the broad areas of the social sciences; • the increasing trend towards fundamental studies in the social sciences, management, and the arts and the humanities, which have been characterized under the overarching theme of administrative science and technology; • the growing demand for research outcomes affecting the public and private sectors' service processes. The other overlapping niche areas affecting the civil service scope will ensure more interest in and readability of the findings showcased in this proceedings book; • the popular and contemporary measurement techniques and methodologies employed within the scopes of the social sciences and humanities; • the noticeably changing trends in administrative science and technology, which will greatly impact the governments of the world, allowing the development of a better understanding of governmental processes and their impact on key performance and e-service deliveries. The reporting on technology-based services will improve the public sector's agility; • a knowledge-sharing agenda for other developing and less developed nations to emulate; • some of the major generic developments that have taken place in these thematic areas of CoAST 2013.

A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science journals.

The Power of Local Feminisms

Crazy Rich Asians is the outrageously funny debut novel about three super-rich, pedigreed Chinese families and the gossip, backbiting, and scheming that occurs when the heir to one of the most massive fortunes in Asia brings home his ABC (American-born Chinese) girlfriend to the wedding of the season. When Rachel Chu agrees to spend the summer in Singapore with her boyfriend, Nicholas Young, she envisions a humble family home, long drives to explore the island, and quality time with the man she might one day marry. What she doesn't know is that Nick's family home happens to look like a palace, that she'll ride in more private planes than cars, and that with one of Asia's most eligible bachelors on her arm, Rachel might as well have a target on her back.

Initiated into a world of dynastic splendor beyond imagination, Rachel meets Astrid, the It Girl of Singapore society; Eddie, whose family practically lives in the pages of the Hong Kong socialite magazines; and Eleanor, Nick's formidable mother, a woman who has very strong feelings about who her son should--and should not--marry. Uproarious, addictive, and filled with jaw-dropping opulence, Crazy Rich Asians is an insider's look at the Asian JetSet; a perfect depiction of the clash

between old money and new money; between Overseas Chinese and Mainland Chinese; and a fabulous novel about what it means to be young, in love, and gloriously, crazily rich.

This book constitutes the proceedings of the 6th International Conference on Social Computing, Behavioral-Cultural Modeling and Prediction, SBP 2013, held in Washington, DC, USA in April 2013. The total of 57 contributions, which consists of papers and posters, included in this volume was carefully reviewed and selected from 137 submissions. This conference is strongly committed to multidisciplinary, consistent with recent trends in computational social science and related fields. The topics covered are: behavioral science, health sciences, military science and information science. There are also many papers that provide methodological innovation as well as new domain-specific findings.

A history of the common people and the Industrial Revolution: "A true masterpiece" and one of the Modern Library's 100 Best Nonfiction Books of the twentieth century (Tribune). During the formative years of the Industrial Revolution, English workers and artisans claimed a place in society that would shape the following centuries. But the capitalist elite did not form the working class—the workers shaped their own creations, developing a shared identity in the process. Despite their lack of power and the indignity forced upon them by the upper classes, the working class emerged as England's greatest cultural and political force. Crucial to contemporary trends in all aspects of society, at the turn of the nineteenth century, these workers united into the

class that we recognize all across the Western world today. E. P. Thompson's magnum opus, *The Making of the English Working Class* defined early twentieth-century English social and economic history, leading many to consider him Britain's greatest postwar historian. Its publication in 1963 was highly controversial in academia, but the work has become a seminal text on the history of the working class. It remains incredibly relevant to the social and economic issues of current times, with the *Guardian* saying upon the book's fiftieth anniversary that it "continues to delight and inspire new readers."

This book samples recent and emerging trust research in education including an array of conceptual approaches, measurement innovations, and explored determinants and outcomes of trust. The collection of pathways explores the phenomenon of trust and establishes the significance of trust relationships in school life. It emboldens the claim that trust merits continued attention of both scholars and practitioners because of the role it plays in the production of equity and excellence. Divided into four parts, the book explores trust under the rubrics of learning, teaching, leading and bridging. The book proposes a variety of directions for future research. These include the simultaneous investigation of trust from the perspectives of various trusters, and at both the individual and group levels, longitudinal research designs, and an elaboration of methods.

Learning through the medium of a second or additional language is becoming very common in different parts of the world because of the increasing use of English as the language of instruction and the mobility of populations. This situation demands a specific approach that considers multilingualism as its core. Pedagogical translanguaging is a theoretical and instructional approach that aims at improving language and content competences in school contexts by using resources from the learner's whole linguistic repertoire. Pedagogical translanguaging is learner-centred and endorses the support and development of all the languages used by learners. It fosters the development of metalinguistic awareness by softening of boundaries between languages when learning languages and content. This Element looks at the way pedagogical translanguaging can be applied in language and content classes and how it can be valuable for the protection and promotion of minority languages. This title is also available as Open Access on Cambridge Core. In foreign language education, decisions must be taken on what languages to teach, who will teach them, in which schools (i.e. all, only urban, only rural), in which grades, the number of hours a week, and the cost involved. This book explores the answers to these questions across a number of Asian polities. It illustrates why some of the efforts undertaken are successful and why some are not, why – despite significant investments of time and resources – some students do not seem to acquire the languages being taught, and why some teachers responsible for instruction in the designated foreign languages have problems achieving fluency in the designated language or have other language teaching difficulties. It

suggests some strategies various polities might attempt to achieve their stated language learning objectives. This book was originally published as a special issue of Current Issues in Language Planning. Polyamines are small aliphatic polycations which have been involved in key stress and developmental processes in plants. In the recent years, compelling genetic and molecular evidences point to polyamines as essential metabolites required for resistance to drought, freezing, salinity, oxidative stress among other type of abiotic and biotic stresses. In addition to their role as stress-protective compounds, polyamines participate in key developmental processes mediated by specific signaling pathways or in cross-regulation with other plant hormones. Our Research Topic aims to integrate the multiple stress and developmental regulatory functions of polyamines in plants under a genetic, molecular and evolutionary perspective with special focus on signaling networks, mechanisms of action and metabolism regulation.

This ground-breaking collection investigates the relationship between feminist activism and legal reform as a pathway to gender justice and social change. Since the advent of feminist movements legal reform has been a popular and yet contentious vehicle for seeking women's rights and empowerment. This important book looks at comparative insights drawn from field-based research on the processes, the challenges, and the outcomes of legal reform and feminist activism. Feminist Activism, Women's Rights, and Legal Reform brings together cases from Middle East, Latin America, and Asia of the successes and failures of reform efforts concerning the promulgation and implementation of new family laws and domestic violence codes.

Policies, Practices and Perspectives in Global Times

INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to thinking clearly about the world.” – Bill Gates “Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.”

—Melinda Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama

Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a

radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be.” Hans Rosling, February 2017.

Although identifying learning disabilities in a school setting is a complex process, it is particularly challenging in low- and middle-income countries that lack the appropriate resources, tools, and supports. This guide provides an introduction to learning disabilities and describes the processes and practices that are necessary for the identification process. It also describes a phased approach that countries can use to assess their current screening and evaluation services, as well as determine the steps needed to develop, strengthen, and build systems that support students with learning disabilities. This guide also provides intervention recommendations that teachers and school administrators can implement at each phase of system development. Although this guide primarily addresses learning disabilities, the practices, processes, and systems described may be also used to improve the identification of other disabilities commonly encountered in schools.

From Thomas Jefferson to John Rawls, justice has been at the center of America's self-image and national creed. At the same time, for many of its peoples—from African slaves and European immigrants to women and the poor—the American experience has been defined by injustice: oppression, disenfranchisement, violence, and prejudice. In *Identity and the Failure of America*, John Michael explores the contradictions between a

mythic national identity promising justice to all and the realities of a divided, hierarchical, and frequently iniquitous history and social order. Through a series of insightful readings, Michael analyzes such cultural moments as the epic dramatization of the tension between individual ambition and communal complicity in *Moby-Dick*, "attempts to effect social change through sympathy in the novels of Lydia Marie Child and Harriet Beecher Stowe, Ralph Waldo Emerson's antislavery activism and Frederick Douglass's long fight for racial equity, and the divisive figures of John Brown and Nat Turner in American letters and memory. Focusing on exemplary instances when the nature of the United States as an essentially conflicted nation turned to force, Michael ultimately posits the development of a more cosmopolitan American identity, one that is more fully and justly imagined in response to the nation's ethical failings at home and abroad. John Michael is professor of English and of visual and cultural studies at the University of Rochester. He is the author of *Anxious Intellectuals: Academic Professionals, Public Intellectuals, and Enlightenment Values and Emerson "and Skepticism: The Cipher of the World."* After reading Joyce Kilmer's poetry, farm boy Richard Knight begins a correspondance with the soldier-poet about his own writing, even as he worries about the war in Europe and the way people

Climate Change 2013: The Physical Science Basis

The strengths and abilities children develop from infancy through adolescence are crucial for their physical, emotional, and cognitive growth, which in turn help them to achieve success in school and to become responsible, economically self-sufficient, and healthy adults. Capable, responsible, and healthy adults are clearly the foundation of a well-functioning and prosperous society, yet America's future is not as secure as it could be because millions of American children live in families with incomes below the poverty line. A wealth of evidence suggests that a lack of adequate economic resources for families with children compromises these children's ability to grow and achieve adult success, hurting them and the broader society. A Roadmap to Reducing Child Poverty reviews the research on linkages between child poverty and child well-being, and analyzes the poverty-reducing effects of major assistance programs directed at children and families. This report also provides policy and program recommendations for reducing

This book provides a path-breaking study of the genesis, growth, gains, and dilemmas of women's movements in countries throughout the world. Its focus is on the global South, where women's movements have engaged in complex negotiations with national and international forces. It challenges widely held assumptions about the Western origins and character of local feminisms. The authors locate women's movements within the terrain from which they emerged by exploring their relationships with the state, civil society, and other social movements. This fully revised second edition contains six new chapters by leading scholars of women and gender studies, on both individual countries and on several major regions of the world? Europe, Africa, Latin America, and the Maghreb. This balanced coverage enables readers to identify regional patterns and also learn from in-depth case studies. Women's Movements in the Global Era is essential reading for anyone interested in the global scope and implications of feminism.

The continual rise of English as a global lingua franca has meant that English literature, both as a discipline and as a tool in ESL and EFL classrooms, is being used in varied ways outside the inner circle of English. This edited collection provides an overview of English literature education in the Asia-Pacific in global times, bringing to international attention a rich understanding of the trends, issues and challenges specific to nations within the Asia-Pacific region. Comprising contributions from Australia, China, Hong Kong, India, Indonesia, Malaysia, Philippines, Singapore and Vietnam, the collection addresses the diversity of learners in different national, cultural and teaching contexts. In doing so, it provides insights into historical and current trends in literature education, foregrounds specific issues and challenges in policymaking and implementation, presents practical matters concerning text selection, use of literature in the language classroom, innovative practices in literature education, and raises pressing and important questions about the nature, purpose and importance of literature education in global times.

Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

The question of how morphologically complex words (assignment, listened) are represented and processed in the brain has been one of the most hotly debated topics in the cognitive neuroscience of language. Do complex words engage cortical representations and processes equivalent to single lexical objects or are they processed as sequences of separate morpheme-like units? Research on morphological processing has suggested that adults make efficient use of both lexical (i.e., whole word) storage and retrieval, as well as combinatorial computation in processing morphologically complex words. Psycholinguistic studies have demonstrated that processing of complex words can be affected both by properties of the morphemes and the whole words, such as their frequency, transparency, and regularity. Furthermore, this research has been informative about the time-course of complex word recognition and production, and the role of morphological structure in these processes. At the neural level, left-hemisphere inferior frontal and superior temporal areas, and negative-going event-related potentials, have been consistently associated with morphological processing. While most previous research has been done on the recognition of morphologically complex words in adult native speakers, much less is known about neurocognitive processes involved in the on-line production of morphologically complex words, and even less on morphological processing in children and non-native speakers. Moreover, we have

limited understanding of how linguistically distinct morphological processes, e.g. inflectional (listen-ed) versus derivational (assign-ment), are handled by the cortical language networks. This e-book provides an up-to-date overview of the questions currently addressed in the field of morphological processing. It highlights the significance of morphological information in language processing, both written and spoken, as assessed by a variety of methods and approaches. It also provides a comprehensive range of research and development tools for the development of new technologies.

This book discusses multilingual postcolonial common law, focusing on Malaysia's efforts to shift the language of law from English to Malay, and weighing the pros and cons of planned language shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack proficiency in the traditional legal medium. Through analysis of legislation and policy documents, interviews with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes?
