Clearly, the “normal” way of life is the opposite of genuine sustainability, and it has an expiration date. Any way of life that is fully in balance with the family of life must be genuinely sustainable, a healthy path with a future. At present, too few really comprehend this concept. It would be wise to learn, and Sustainable or Bust is a useful tool for the job. Seven-point-something billion people can't switch to sustainable living this afternoon, because it's temporarily impossible. But the collapse of industrial civilization is now in its early stages, and when it's done, the human sphere will be much smaller, slower, and simpler. Decades down the road, many new options will become possible, including genuine sustainability. We could help our descendants find a more direct path to health and balance by learning about sustainability now, and sharing this wisdom with the young ones. There's never been a better time to hit the books and feed our minds — before the lights go out. Nothing can change until ideas change. My first book, What Is Sustainable, presented an introduction to genuine sustainability, with an emphasis on food. Sustainable or Bust is a collection of 64 book reviews, and 16 rants. It's a gallery of thinkers, scholars, and ideas that might make “normal” minds itch and squirm. This book is for pilgrims who are awake, alive, and weary of normal — minds hungry for outside-the-box ideas. I don't expect to see the end of the collapse. What the survivors, if any, choose to do is entirely beyond my control. I am not responsible for the decisions they make, but I am responsible for doing what I can to help them understand their history, predicament, and options. Who are we? Where are we from? How did we get here?

Have you ever wondered what Santa Claus does for fun in his spare time? Now you can find out with Santa's Hobbies. This book also includes a mini game where the reader can find hidden stars on each page. This picture book is for children ages 2-5.

Questioning some commonly accepted metaphysical beliefs and explaining how they are programs-beliefs of control designed to keep a person within this earthly matrix. How to escape these programs and this system by changing your beliefs.

The Final Book In The Divinity Saga The Earth is breaking open. The wall between the Spirit and Human realm has begun to shatter, allowing darkness to seep in and converge like an epidemic. The End Has Begun... Even after setting everything in motion by attacking Morning Star first, Cam`ael finally has everything that he's ever wanted in his existence; Starling's love and a family. Cam`ael's happiness is short-lived when he's finally given the harsh and inexplicable truth about why Starling has always been such a unique Chosen. A Fiery Will... Shortly after giving birth, Starling begins to realize what must be done in order to save the world and the future of their children. But having made the the promise to Cam`ael of never sacrificing herself for him, how can she risk it? While the Elders and other warriors see her as a traitor, her friends begin to see her as something more. In every battle and every war there will be sacrifices and betrayals, but if darkness prevails- light will cease to exist.

We've all heard stories of people who've experienced seemingly miraculous recoveries from illness, but can the same thing happen for our world? According to pioneering biologist Bruce H. Lipton, it's not only possible, it's already occurring. In *Spontaneous Evolution*, this world-renowned expert in the emerging science of epigenetics reveals how our changing understanding of biology will help us navigate this turbulent period in our planet's history and how each of us can participate in this global shift. In collaboration with political philosopher Steve Bhaerman, Dr. Lipton invites readers to reconsider: •the "unquestionable" pillars of biology, including random evolution, survival of the fittest, and the role of DNA; •the relationship between mind and matter; •how our beliefs about nature and human nature shape our politics, culture, and individual lives; and •how each of us can become planetary "stem cells" supporting the health and growth of our world. By questioning the old beliefs that got us to where we are today and keep us stuck in the status quo, we can trigger the spontaneous evolution of our species that will usher in a brighter future. .

When past and present unite, hearts collide!!!! Ceana has spent her life dreaming of becoming an archaeologist and unlocking the mysteries of the past. However, her own past is a mystery that eludes her until the very man, who has been haunting her dreams, walks through the doors of her family's business and sends her comfortable life into a downwards spiral. She is about to learn that she herself is linked to the past that she has been studying, in more ways than she could ever imagine. Kessan, a fearsome highlander is torn between protecting his family from destruction and death at the hands of an evil magic, and going through time to find the one person who may be able to defeat the evil that is raging through the highlands. Travel through time and space with Ceana and Kessan, as they battle family secrets, forces of evil and love. Lives are lost, bonds are formed and secrets uncovered, as Ceana and Kessan try to defeat an evil so dark that it threatens to consume everything.

The Earth is in ruins. Cities and nations destroyed. Mankind is extinct. Brant and Arsha are synthetics, machines made in the image of people. They dream of bringing humans back into the world and have the technology to succeed, but the obstacles in their way are mounting. Not only are their own conflicting ideals creating a rift between them, but now the sinister Marauders are closing in as they seek revenge on Brant. Out in the wasteland, strange lights and mysterious objects in the sky herald the arrival of new factions that seek to control the region. Even in the once quiet streets of their own city, malevolent forces are beginning to unfurl that threaten the sanctity of everything they hold dear, jeopardising the future that is within their grasp. **PEOPLE HAVE BECOME SO BUSY WITH EVERYDAY ACTIVITIES THAT THEY SELDOM HAVE TIME TO THINK ABOUT EVERYTHING THAT SURROUNDS THEM. THE WORLD IS FULL OF LIFE, EVEN IN THE SEEMINGLY MOST INSIGNIFICANT THINGS. WOULDN'T IT BE WONDERFUL TO JUST SIT BACK AND TRY TO LEARN MORE ABOUT THE LIVING AND BREATHING SPECIES THAT SURROUND US BUT GO UNNOTICED EVERYDAY? Biology is the science of life, but while many of us may be familiar with the subject, only a few may be aware that biology encompasses much more than just humans and the other species that inhabit the earth. It is, perhaps, the most expansive and interesting subject that you could learn about. You may ask, if it is so expansive, then how would it be possible to learn all the important things there are to know about biology? The answer lies in this book, which would teach you all the most significant concepts to make you realize how biology has implications in our past, our present, and yes, even our future. This book is the only one you need to delve into the world of biology. It will teach you, in simple and easy-to-understand terms, how biology comes alive in our daily activities. Here's what this book contains: What exactly does the study of biology include How can biology help us understand our past Which branches of biology is relevant to our present What implications biology has on our future PLUS: Delve into the world of genetics Understand the how and why of human evolution Know the men and women who have spearheaded breakthroughs in biology You won't get information this comprehensive anywhere else! *An illuminating introduction to the wonders and mysteries of the mind, by the father of modern hypnosis, George H. Estabrooks, covering such subjects as memory stimulation, time distortion, tapping the subconscious mind for creative purposes, mind-body relationships, paranormal and extrasensory perception (ESP), and much more. Dr. Estabrooks was instrumental in bringing the powers of hypnosis to the battlefield, by helping the U.S. military design and develop its hypnosis, remote-viewing, and ESP programs, which allowed the Western powers to stave off crippling Cold War attacks from the Soviet Union and other Eastern Bloc organizations. *There have been several scientific books and lecture papers written on the subject of our holographic universe but none have gone far enough as to expand peoples thinking and explain the true nature of reality. Music is a natural consequence of the pure mathematics within nature. Music is a true universal language as Music is vibrational physics and mathematics that is a language understood by the human mind. The silent music of the universe or Aether Physics from the RG Veda is the only ONE science that explains the true perfection of creation and our connection to the holographic universe. Quantum Metrics are from the RG Veda: Quantum Physicist already knowing the answer as they have taken it the RG Veda then creates complicated elongated mathematical equations to derive at their Metric, which they name after themselves. I explain how to calculate all 90 metrics contained in RG Veda using a dividend and divisor and how to apply this system of harmony to devices you can manufacture such as electric motors. I would not dare name any of the yet "undiscovered" Metrics after myself, as no man should claim Gods work as his own. Although I have examples of the RG Vedas and other sources mentioning the Vedic Meter no one to my knowledge as given a full interpretation of them and what they relate to as I have done. I have deciphered and attempted to simplify one of the most ancient of mysteries and show how to apply it. My intention in releasing this information is to enlighten humanity as to assist in the rebuilding of the foundations of science for the advancement of all. We all must aspire to a brighter future and not allow this information to remain the industrial secret*

This was the original magnum opus of Earth Manifesto understandings. This book contains entertaining stories, incisive insights, philosophical introspections and biggest picture perspectives of all the great issues that face human beings and our civilizations today. Whether discussing the myth of America as a happy and contented country or the possibility of creating a radically different society, Why Not Utopia? offers a thought provoking challenge to the notion that only capitalism can guarantee economic prosperity and personal liberty. It is both a radical critique of the solutions to our current political and social problems that are being proposed by the major political parties and media sources that dominate our public discourse and a vision of what might be.

The Book of Positive Vibes is a collection of inspirational poems for all ages!

Looks at the processes in which cells receive information, arguing that DNA is controlled by signals from outside the cell that emanate from one's positive and negative thoughts.

For most, it was a time of heartfelt bliss, robust health, and abundant energy. Life was so beautiful that you couldn't wait to bound out of bed in the morning to experience more Heaven on Earth. It was the Honeymoon Effect that was to last forever. Unfortunately for most, the Honeymoon Effect is frequently short lived. Imagine what your planetary experience would be like if you could maintain the Honeymoon Effect throughout your whole life. Bruce H. Lipton, Ph.D., best-selling author of The Biology of Belief, describes how the Honeymoon Effect was not a chance event or a coincidence, but a personal creation. This book reveals how we manifest the Honeymoon Effect and the reasons why we lose it. This knowledge empowers readers to create the honeymoon experience again, this time in a way that ensures a happily-ever-after relationship that even a Hollywood producer would love. With authority, eloquence, and an easy-to-read style, Lipton covers the influence of quantum physics (good vibrations), biochemistry (love potions), and psychology (the conscious and subconscious minds) in creating and sustaining juicy loving relationships. He also asserts that if we use the fifty trillion cells that live harmoniously in every healthy human body as a model, we can create not just honeymoon relationships for couples but also a “super organism” called humanity that can heal our planet.*

The "I'm Going..." series deals with the uncomfortable trips children need to make sometimes: going to the dentist, going to school on the first day of school and other events. In the first volume we meet the little kid who doesn't like to do anything and is afraid of what they are facing the frightening reality of having to go to the hospital. Hospitals are no fun for grown-ups, but for kids they are strange and scary. "I'm Going to the Hospital" is fun to read, but perfect for the little kid if your life should they ever have to go to hospital. This book will prepare a child for what a hospital is like and hopefully ease some of those fears in addition to help them know that what they are feeling is normal.

Groomed for a place at a Big Name School since their obsessed, status-conscious helicopter parents passed out cigars at the Stockstill General Hospital Neonatal Unit, the privileged students of Pembrocton College Preparatory are ratcheting up the stakes in the race to get into the nation's most prestigious colleges. The PCP juniors are gloating, jubilant at the rumor that the valedictorian presumptive has received a B on her report card, a grade that will relegate her to in-state hell. Her heir apparent, a three-generation Yale legacy, is the sole mourner at the demise of her future—if only because her thoughtless academic lapse is going to derail his plans to attend MIT. Across town, in the graffiti-covered halls of Stockstill High School, the students slink to class, praying that they arrive without a knife wound—and dream of ivy-covered walls. And with the help of a take-no-prisoners principal and an enterprising parent, the students at SHS dare to encroach shamelessly on territory normally reserved for their wealthy private school rivals. Join the fray as a memorable cast of characters engages in the latest rage in extracurricular activities: college admissions as a blood sport. Laugh out loud funny, The Applicants lampoons the heights we scale—and the depths to which we sink—to get into the “right” college. ?
