**Lucille Cholerton is a specialist in gluten sensitivity and coeliac disease. She and her three grown children all suffer from gluten sensitivity. Read her story in Spotlight on Gluten: New symptoms for the new millennium? Or long-standing symptoms now being recognized? Age is very pertinent to the subject of gluten sensitivity. This disorder should really be diagnosed in childhood, but if the diagnosis is missed, people can suffer for many years with unexplained symptoms, when something that they are eating every day could be the root cause of their ill health. This book covers the symptoms that Cholerton and her children suffered, and how they improved their health dramatically on a gluten-free diet. The author's research spans twenty years. In my research I discovered that gluten may be responsible for many autoimmune disorders, of which there are some eighty-eight documented. My doctors knew nothing about this, so I really had to be my own guinea pig. A former teacher, Lucille Cholerton is now a nutrition counselor and is writing her next books on gluten sensitivity. There is a dire need for better diagnosis and understanding of this disorder. She is married and lives in Durban, South Africa. She started the Gluten Intolerance/Coeliac Support Group in Durban in 1995. For more information about gluten, visit <http://www.allergysa.org> .

Food Matters explores questions about the seemingly simple concept of food: What is the purpose of food: sustenance, pleasure, health? What political, social, and cultural forces affect our food choices? What does it mean to eat ethically? How does our food system contribute to the climate crisis, and how can we make changes in our eating habits and in food production to protect the planet? What problems and possibilities will influence what the future of food? Readings by a range of essayists, scientists, journalists, farmers, activists, and ordinary citizens take up these questions and more. Questions and assignments for each selection provide a range of activities for students. The Bedford Spotlight Reader Series is an exciting line of single-theme readers, each reflecting Bedford's trademark care and quality. An editorial board of a dozen compositionists at schools with courses focusing on specific themes assists in the development of the series. Each reader collects the best chosen selections sufficient for an entire writing course--about 35 pieces--to allow instructors to provide carefully developed, high-quality instruction at an affordable price. The readers are flexibly arranged into thematic chapters, with each chapter focusing in depth on a different facet of the central topic. Instructor support at macmillanlearning.com includes sample syllabi and additional teaching resources.

? In 2013, the Nobel Prize for Literature was for the first time awarded to a short story writer from a Canadian, Alice Munro. The award focused international attention on a genre that had long thrived in Canada, particularly since the 1960s. This book traces the development and highlights the English-language Canadian short story from the late 19th century up to the present. The history, as well as the theoretical approaches to the genre are covered, with in-depth examination of exemplary stories by prominent writers such as Margaret Atwood and Alice Munro.

Lithography is a field in which advances proceed at a swift pace. This book was written to address several needs, and the revisions for the second edition were made with those original objectives in mind. Many new topics have been included in this text commensurate with the progress that has taken place during the past few years, and several subjects are discussed in more detail. This book is intended to serve as an introduction to the science of microlithography for people who are unfamiliar with the subject. Topics directly related to the tools used to manufacture integrated circuits are addressed in depth, including such topics as overlay, the stages of exposure, tools, and light sources. This text also contains numerous references for students who want to investigate particular topics in more detail, and they provide the experienced lithographer with lists of references by topic as well. It is expected that the reader of this book will have a foundation in basic physics and chemistry. No topics will require knowledge of mathematics beyond elementary calculus.

Essential Cell Biology provides a readily accessible introduction to the central concepts of cell biology, and its lively, clear writing and exceptional illustrations make it the ideal textbook for a first course in both cell and molecular biology. The text and figures are easy-to-follow, accurate, clear, and engaging for the introductory student. Molecular detail has been kept to a minimum in order to provide the reader with a cohesive conceptual framework for the basic science that underlies our current understanding of all of biology, including the biomedical sciences. The Fourth Edition has been thoroughly revised, and covers the latest developments in this fast-moving field, yet retains the academic level and length of the previous edition. The book is accompanied by a rich package of online

student and instructor resources, including over 130 narrated movies, an expanded and updated Question Bank. Essential Cell Biology, Fourth Edition is additionally supported by the Garland Science Learning System. This homework platform is designed to evaluate and improve student performance and allows instructors to select assignments on specific topics and review the performance of the entire class, as well as individual students, via the instructor dashboard. Students receive immediate feedback on their mastery of the topics, and will be better prepared for lectures and classroom discussions. The user-friendly system provides a convenient way to engage students while assessing progress. Performance data can be used to tailor classroom discussion, activities, and lectures to address students' needs precisely and efficiently. Confederation may have established Canada's nationhood in 1867, but the relationships framing Canada's modern existence go back much further. Employing a unique socio-historical perspective, *Canadian Society in the Twenty-First Century* examines three formative relationships that have shaped the country: Canada and Quebec, Canada and the United States, and Canada and Indigenous nations. Now in its fourth edition, this engaging text offers students an overview of Canadian society through a series of connections rather than a collection of statistics. Trevor W. Harrison and John W. Friesen weave together complex aspects of the nation's economic, political, and socio-cultural development. They guide readers to use this interdisciplinary framework to consider some of the tough questions that Canada is likely to face in adjusting to demands and challenges in the next few decades. Reflecting the most current scholarship in the field, this revised edition features new discussions on issues such as the current crisis of neo-liberal globalization, Canada's petroleum industry, global warming, the Wet'suwet'en dispute in 2020, and the COVID-19 pandemic. Exploring the unique character of Canada today, this text is a vibrant resource for sociology courses on Canadian society as well as courses in Canadian studies and Canadian history.
