As the sales of new bicycles increase every year, these helpful tips will educate and inform beginning cyclists so they perform to the maximum potential, all while having fun. Trusted bicycle consultant Tori Bortman distills the essentials every beginning cyclist needs to know. She covers different types of rides, the components of bicycles, proper cycling clothing and equipment, basic road skills, nutrition, training, maintenance, and how to ride for a cause. She also explores how to approach cycling from the conceptual beginnings into tangible, real-time facts about riding as a new cyclist, as well as elaborating on the bountiful health benefits of cycling, including weight loss, stress reduction, and boosted immunity. This is the ultimate guide to bicycling know-how for beginning cyclists.

From mountain bikes and road racers to hybrids, the Bicycle Repair Manual helps riders keep their bikes in peak condition. Perfect for beginners and dedicated cyclists alike, this updated guide to bicycle repair includes the latest technological advances in cycling, troubleshooting charts, hints and tips for diagnosing and problem, and servicing schedules.

The No-Drop Zone contains all the information necessary for new cyclists to gain the

knowledge and skills to take them from buying their first bicycle to starting their first race. Cyclists learn how to handle the bike, perform minor maintenance, select clothing and accessories, join clubs, and find events. The book also covers every aspect of riding in a group, emphasizing such specific skills as how to avoid bumping into other riders when riding in close quarters and fixing a flat quickly enough to rejoin the group. Author Patrick Brady explores the particular pleasures that come from group riding, a unique experience at once social (talking with friends while riding), exciting (descending in a group), and exhilarating (finishing a long hill). Brady also details the enormous fitness benefits of riding in a group. The No-Drop Zone has all the knowledge a cyclist needs to move to that next level of skill.
