With a simple, witty story and free-spirited illustrations, Peter H. Reynolds entices even the stubbornly uncreative among us to make a mark -- and follow where it takes us. Her teacher

smiled. "Just make a mark and see where it takes you." Art class is over, but Vashti is sitting glued to her chair in front of a blank piece of paper. The words of her teacher are a gentle invitation to express herself. But Vashti can't draw - she's no artist. To prove her point, Vashti jabs at a blank sheet of paper to make an unremarkable and angry mark. "There!" she says. That one little dot marks the beginning of Vashti's journey of surprise and self-discovery. That special moment is the core of Peter H. Reynolds's delicate fable about the creative spirit in all of us.

"Fascinating - A teaching book that I couldn't put down!" If the world is changing, leadership needs to change. The world is changing. It is that simple; it is that complex. Through our work in TomorrowToday Global we have been at the very forefront of this intersection of a changing world and changing leadership

across the broad scope of industries and sectors spanning all corners of the globe. And what we see concerns us. We see leaders who are frustrated that they can't mobilize their teams to adapt quickly enough to change. We see leaders who feel the horizon of their strategic plans rushing ever closer, resulting in decision making that often feels closer to guesswork than science. We see leaders battling to manage their teams,

to keep and get the most of talent, to develop succession plans and to ensure everyone is focused on the same outcomes. We see leaders exasperated at the lack of initiative their teams have, and yet equally bound by increasing regulation, bureaucracy and inertia. We see leaders struggling to lead. We see leaders unable to admit that they're struggling to lead. Maybe the symptoms we've just listed don't all

apply to you, or maybe you have a sense that your organization's problems lie elsewhere. Whatever the specific issues are, we're sure you'll agree with us that leadership isn't what it used to be. And a big part of the reason for this is that leadership itself is changing - just as the world around us is changing in dramatic ways. The leadership theory that underpins our practices of leadership is in need of

review. For the most part, the way in which we review and measure leadership practice no longer works. The only way to change all this is for leaders (and those tasked with the responsibility of leadership development) to step back, rethink things and be willing to change. It means asking searching questions, challenging assumptions and revisiting formulae that have, for a very long time, worked rather well. This is easier

said than done. But it can be done, and this is what this book is about. Future-focused leaders will gain insight into what it takes to succeed in a time of disruptive change. The book provides both a new lens through which to see the world and leadership, as well as practical tools and tips to help you make the journey towards a new leadership style and approach.

After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application

Have You Seen Zandile? is a wonderful South African resource, still as fresh and absorbing as when it was first written. Perfectly scripted, and with Gcina Mhlophe's sure instinct for stagecraft, it recounts the very personal story of Zandile, who is snatched away from her grandmother's loving care and taken to live with her matriarchal family in rural Transkei. Moving, funny and convincing, full of Zandile's shrewd, youthful insights, the play offers an illuminating window into the 1960s world that it depicts, with its

issues of white dominance, rural hardship and black female repression. *Have You Seen Zandile?* is already an established favorite in performance circles, and is fast becoming a South African classic.

This world has changed. The future has changed. Childhood is changing.

Raising children has never been more challenging - or potentially rewarding. It is becoming increasingly obvious that the world into which our young children will enter as adults, somewhere between 2020 and 2030, will be nothing like the world their parents grew up in, or even the world we currently inhabit. We need a better understanding of the world of the future in order to prepare our children and to 'future-proof' them. Future-

proof Your Child is a very different kind of parenting book. It contains many useful, practical hints and tips but also focuses on the context for parenting and child development today. It convinces 21st-century parents of the need to change their approach to parenting future generations and is relevant, accessible, practical and inspirational. Future-proof Your Child highlights the critical importance of making choices, having conversations and consciously connecting with tomorrow's children today.
