In recent years several "new" infectious agents have been associated with neonatal diarrhoea in both calves and pigs.

Furthermore,

Read Online Star Diagnosis

important additional information has become available as regards enterotoxigenic *Escherichia coli* infections in both species. Although still much has to be learned, it is likely that in many field cases different agents act in concert. Therefore an integrated approach

Read Online Star Diagnosis

to the problem of neonatal diarrhoea appears to be necessary, particularly in the field research. Such an approach requires a series of diagnostic techniques. The purpose of this meeting was to bring together a limited number of scientists that are actively

Read Online Star Diagnosis

involved in neonatal diarrhoea research, in order to discuss present knowledge and to produce proceedings containing review articles, new developments and laboratory manuals of relevant diagnostic techniques. x This publication constitutes a collection of

Read Online Star Diagnosis

System Test and
Diagnosis is the
first book on
test and
diagnosis at the
system level,
defined as any
aggregation of
related elements

Read Online Star Diagnosis

that together form an entity of sufficient complexity for which it is impractical to treat all of the elements at the lowest level of detail. The ideas presented emphasize that it is possible to diagnose

Read Online Star Diagnosis

complex systems
efficiently.

Since the notion
of system is
hierarchical,
these ideas are
applicable to
all levels. The
philosophy is
presented in the
context of a
model-based
approach, using
the information

Read Online Star Diagnosis

flow model, that focuses on the information provided by the tests rather than the functions embedded in the system. Detailed algorithms are offered for evaluating system testability,

Read Online Star Diagnosis

performing
efficient
diagnosis,
verifying and
validating the
models, and
constructing an
architecture for
system
maintenance.
Several advanced
algorithms, not

Amicus Curiae
Brief on Appeal
Using real-life cases
describing patients
with neuro-ophthalmic
disorders, this book is
a case-based
teaching tool that
bridges the gap
between textbook
information and
everyday clinical
practice. Each case
illustrates a particular

Read Online Star Diagnosis

area of frequent diagnostic confusion, and highlights the specific clinical features that should point to the correct diagnosis. Focusing on errors in this way serves as motivation to the clinician to master the material so that 'pitfalls' can be avoided. The level of the case discussions

Read Online Star Diagnosis

assumes that the reader has some familiarity with basic neuroanatomy, physiology and disease process but each case discussion furnishes a brief review of such information, always with an emphasis on those features that are clinically relevant. The case-histories are

Read Online Star Diagnosis

succinct and amply illustrated, including motility and fundus photographs, visual fields and radiographic studies. The narrative is moved along with questions to the reader, making it easy to follow the logic of the cases.
