It used to take years or even decades for disruptive innovations to dethrone dominant products and services. But now any business can be devastated virtually overnight by something better and cheaper. How can executives protect themselves and harness the power of Big Bang Disruption? Just a few years ago, drivers happily spent more than \$200 for a GPS unit. But as smartphones exploded in popularity, free navigation apps exceeded the performance of stand-alone devices. Eighteen months after the debut of the navigation apps, leading GPS manufacturers had lost 85 percent of their market value. Consumer electronics and computer makers have long struggled in a world of exponential technology improvements and short product life spans. But until recently, hotels, taxi services, doctors, and energy companies had little to fear from the information revolution. Those days are gone forever. Software-based products are replacing physical goods. And every service provider must compete with cloud-based tools that offer customers a better way to interact. Today, start-ups with minimal experience and no capital can unravel your strategy before you even begin to grasp what's happening. Never mind the “innovator's dilemma”—this is the innovator's disaster. And it's happening in nearly every industry. Worse, Big Bang Disruptors may

not even see you as competition. They don't share your approach to customer service, and they're not sizing up your product line to offer better prices. You may simply be collateral damage in their efforts to win completely different markets. The good news is that any business can master the strategy of the start-ups. Larry Downes and Paul Nunes analyze the origins, economics, and anatomy of Big Bang Disruption. They identify four key stages of the new innovation life cycle, helping you spot potential disruptors in time. And they offer twelve rules for defending your markets, launching disruptors of your own, and getting out while there's still time. Based on extensive research by the Accenture Institute for High Performance and in-depth interviews with entrepreneurs, investors, and executives from more than thirty industries, Big Bang Disruption will arm you with strategies and insights to thrive in this brave new world. “Build a better brew by mastering 10 manual methods, from French Press to Chemex, with this comprehensive guide.” —Imbibe Magazine Named a top food & drink book of 2017 by Food Network, Wired, Sprudge, and Booklist This comprehensive but accessible handbook is for the average coffee lover who wants to make better coffee at home. Unlike other coffee books, this one focuses exclusively on coffee—not espresso—and explores multiple pour-over, immersion, and cold-brew techniques on 10 different devices. Thanks to a small but growing number of dedicated farmers, importers, roasters, and baristas, coffee quality is at an all-time high. But for nonprofessionals, achieving café quality at home can seem out of reach. With dozens of equipment options, conflicting information on how to use that equipment, and an industry language that, at times, doesn’t seem made for the rest of us, it can be difficult to know where to begin. *Craft Coffee: A Manual*, written by a coffee enthusiast for coffee enthusiasts, provides all the information readers need to discover what they like in a cup of specialty coffee—and how to replicate the perfect cup day after day. From the science of extraction and brewing techniques to choosing equipment and deciphering coffee bags, *Craft Coffee* focuses on the issues—cost, time, taste, and accessibility—that home coffee brewers negotiate and shows that no matter where you are in your coffee journey, you can make a great cup at home. “Engaging and fun . . . I really can’t recommend *Craft Coffee: A Manual* enough. If you’re even mildly curious about brewing coffee at home, it’s absolutely worth a read.” —BuzzFeed

Entire service businesses have been built around the ideas of Heskett, Sasser, and Schlesinger, pioneers in the world of service. Now they test their ideas against the actual experiences of successful and unsuccessful practitioners, as well as against demands of the future, in a book service leaders around the world will use as a

guide for years to come. The authors cover every aspect of optimal service leadership: the best hiring, training, and workplace organization practices; the creation of operating strategies around areas such as facility design, capacity planning, queue management, and more; the use—and misuse—of technology in delivering top-level service; and practices that can transform loyal customers into “owners.” Looking ahead, the authors describe the world of great service leaders in which “both/and” thinking replaces trade-offs. It's a world in which new ideas will be tested against the sine qua non of the “service trifecta”—wins for employees, customers, and investors. And it's a world in which the best leaders admit that they don't have the answers and create organizations that learn, innovate, “sense and respond,” operate with fluid boundaries, and seek and achieve repeated strategic success. Using examples of dozens of companies in a wide variety of industries, such as Apollo Hospitals, Châteaufort, Starbucks, Amazon, Disney, Progressive Insurance, the Dallas Mavericks, Whole Foods, IKEA, and many others, the authors present a narrative of remarkable successes, unnecessary failures, and future promise.

STARBUCKED will be the first book to explore the incredible rise of the Starbucks Corporation and the caffeine-crazy culture that fueled its success. Part Fast Food Nation, part Bobos in Paradise, STARBUCKED combines investigative heft with witty cultural observation in telling the story of how the coffeehouse movement changed our everyday lives, from our evolving neighborhoods and workplaces to the ways we shop, socialize, and self-medicate. In STARBUCKED, Taylor Clark provides an objective, meticulously reported look at the volatile issues like gentrification and fair trade that distress activists and coffee zealots alike. Through a cast of characters that includes coffee-wild hippies, business sharks, slackers, Hollywood trendsetters and more, STARBUCKED explores how America transformed into a nation of coffee gourmets in only a few years, how Starbucks manipulates psyches and social habits to snare loyal customers, and why many of the things we think we know about the coffee commodity chain are false.

WiiPi Leaks (WL) Manual (Jam Crab version, text only) Description: the smuggled-out manual (WM069) is the only known copy of the diabolical WiiPi organization (see warning). This interruption of the WM069 and the graphic repositories (offered for a low price on Google Play Books) of unofficial information and rumors will serve as the foundation of the entire WiiPi Leaks (WL) series and other related materials and channels, for example, the Dear Jammy letters, Random Unexplained Diagrams (RUD), Jam Crab News, Portraits, Podcasts, etc. Why do we need a manual for a fictional novel series? Well according to the author, Jam Crab, there should be explanations due to the nature of the content. Meaning the future world as contrived by the WiiPi organization in WM069 is constructed and designed in accordance to the evil, sinister WiiPi plot of world domination. Also, the WM069 does not stay within the physical, cultural and or logic of our modern-day society. Therefore, the behavior of the WiiPi characters, organizations, government affiliations, machines and contraptions, to support this fictional story we needed to justified the absurdity of the stuff in the original WM069 manual. Warning: the whole WiiPi Leaks (WL) Series of books is a mix of ironic comedy, political satire, current events and ludicrous inventions which we learned of from the Jam Crab (not his or her real name) WiiPi Leaks. It touches on some creepy topics. So here's the warning and if these topics in the WL Series are offensive, we apologize here in advance. As mentioned, the content is intended to be used solely for

the purpose of entertainment and is meant as a comedic work for an adult audience. In other words, the authors would rather laugh than cry about corporate greed, American politics, our hap hazard lives and any other issues throughout the world. Updates: there will need to be revisions as the series grows, so it's suggested the readers check for updated editions. Note: this WiiPi Leaks manual is free (no graphic diagrams included) and contains almost everything the reader needs to follow along with the story and the links to accompanying diagrams. Who is Jam Crab? Well, we here at the Jam Crab Group (JCG) of channels, simply interpret leaked messages from Jam Crab (JC), our WiiPi informant. We have never met JC. In fact he or she is believed to be on the run from the evil clutches of WiiPi. So we just wish JC well and hope he or she keeps the leaks coming in. The JCG intends to take all the possible measures to deter WiiPi from implementing their devious scheme.

"It's gonna be worth every scratch down my back..." Kat broke two of her wealthy family's biggest rules: she refused to work in the family business that spans generations, and she rejected every man they've handpicked for her. Instead, she runs her own successful company and chooses her own men. Even though her hectic lifestyle leaves her with little time or patience for a committed relationship, she would consider one. But it would take a special kind of man. One she has yet to meet in all her dating years in New York City. When Tucker meets Kat, sparks fly. She's the hellcat he's been looking for, and their chance meeting presents him with a tricky choice. A risk he takes, believing he's met his match. Now he needs to prove he's her best match too. That won't be easy with her family's knee-jerk, snooty disapproval of him. And it will be even harder with her longtime on-again, off-again old flame lingering 'off' in the background, waiting for the 'on' signal, again. What is it about that guy...? Dan cannot believe who he's seen Kat photographed with in the society pages. The guy next to her is all scruff, long hair, and leather jackets. It looks like a cry for help from the woman he's been hung up on ever since their undergrad days at Columbia. But Dan is sitting tight; he's not calling her. Their last

fight was a doozy—all Kat's fault. She needs to apologize to him this time. And from the looks of the new guy she's with, Dan's expecting her concession call any day now. But that call may never come after Kat uncovers shocking family secrets. The kind that put her, and the people she loves, in the crosshairs of a killer when she discovers her life in one of New York's elite families has been a lie. Even worse, her own family covered up the gruesome scandal decades earlier that nearly killed her. Can she survive the same killer twice?

David Hurst has a unique knowledge of organizationsÑtheir function and their failureÑboth in theory and in practice. He has spent twenty-five years as an operating manager, often in crises and turnaround conditions, and is also a widely experienced consultant, teacher, and writer on business. This book is his innovative integration of management practice and theory, using a systems perspective and analogies drawn from nature to illustrate groundbreaking ideas and their practical application. It is designed for readers unfamiliar with sophisticated management concepts and for active practitioners seeking to advance their management and leadership skills. Hurst's objective is to help readers make meaning from their own management experience and education, and to encourage improvement in their practical judgment and wisdom. His approach takes an expansive view

of organizations, connecting their development to humankind's evolutionary heritage and cultural history. It locates the origins of organizations in communities of trust and follows their development and maturation. He also crucially tracks the decline of organizations as they age and shows how their strengths become weaknesses in changing circumstances. Hurst's core argument is that the human mind is rational in an ecological, rather than a logical, sense. In other words, it has evolved to extract cues to action from the specific situations in which it finds itself. Therefore contexts matter, and Hurst shows how passion, reason, and power can be used to change and sustain organizations for good and ill. The result is an inspirational synthesis of management theory and practice that will resonate with every reader's experience.
