

Staunton Nursing 7th Edition

Graduate nurses are expected to ‘hit the ground running’, taking on complex care challenges in a stressful and fast-paced environment. This comprehensive yet accessible textbook provides expert guidance for students and commencing nurses on the contexts for their practice. Part 1 presents a pragmatic insight into the intersection, tensions and complexities of practice and professional issues for Australian nurses. It outlines the nature of nursing roles and professional codes of conduct, national health priority areas and legal and ethical issues including the growing use of health informatics. There is an examination of the diverse career paths available in nursing, a focus on nurses’ mental health and well-being and a special examination of Aboriginal and Torres Strait Islander health issues. Part 2 unpacks key issues across a range of clinical contexts that will be a key resource for clinical practitioners. Contexts covered include acute care, community nursing, paediatric nursing, mental health nursing and aged care. Part 3 examines the professional and practice issues of nursing in diverse distinctive and emergent practice areas including aesthetic nursing, military nursing and international nursing with case studies and vignettes highlighting common issues and challenges. Drawing on the expertise of a wide range of Australian clinical and academic nursing professionals, this text is a key reference for all nursing undergraduates seeking to enter successfully into the profession.

“Law for Nurses and Midwives, 7th edition gives undergraduate and postgraduate nursing and midwifery students a concise introduction to the law as it pertains health care provision in Australia. As students will already appreciate, nursing and midwifery practice involves making decisions with and for others. This often requires evaluation of best interests and obligations and an assessment of what will best protect or enhance a patient or client’s wellbeing. Understanding the application of current legal statutes - particularly those relating to negligence and consent - as they apply to professional practice is therefore essential for all nurses and midwives. Law for Nurses and Midwives, 7th edition provides students with information and knowledge necessary to make well informed and considered decisions - both for themselves and for those under their care.”-**Publisher.**

Commencing a nursing qualification can be an exciting and daunting prospect. ...“Focuses on the use of drugs as medications within the healthcare environment in Australia and New Zealand. ... We use the term ‘medication’, rather than ‘drug’, throughout this book to refer to any drug that is used in the healthcare context, although the terms are generally interchangeable ... and it is the generic name of a medication that does not change and is the essential name for the nurse to know. ... we also introduce some abbreviations that are commonly used by healthcare providers and pharmacists in writing and preparing medication prescriptions. ...Two new chapters have been included in the second edition. One chapter covers pharmacogenetics and pharmacogenomics, an area of growing interest in personalised medicine, and the other covers legal and ethical issues related to the administration of medications.”-**from preface.**

Kozier and Erb’s Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern.
