Vita di Torquato Tasso scritta da Gio. Battista Manso ... Diuisa in tre parti. All'emin.mo e
reu.mo sig.re Antonio card. Barberino

What happened to the 11 men who served as governor of Illinois from 1933 to 2003? That is what this book is about. Each life is traced from highlights and lowlights in office to the day the music stopped and life played out as a former governor. Most of them would have preferred to continue serving as the state's chief executive. But that wasn't an option. Each man faced the challenges of a new life. Some performed well, some did not. The eleven are a mixed bag of personalities, ambitions and attempts at further glory. Their stories offer a rich assortment of adventures ranging from failure to success, from further political involvement to heroic legal battles, and efforts to earn their way. Yes, stories of three who went to prison, Kerner, Walker and Ryan, are included. For the first time in print, the rest of the story is available.

Opera di Saverio Mattei tomo 1. [-6] ... Dissertazione preliminare alla nuova traduzione de' libri poetici della Bibbia

Geordie Stylizations is a short-focused research work which builds on the renovated interest on the nexus between accent-identity-prestige-prejudice, offering an analysis of celebrities' use of the Geordie variety in a series of public performances as a reflection instrument for scholars but also for neophyte readers with an interest in Sociolinguistics, Pragmatics, Celebrity Studies, Cultural Studies, Anthropology, Sociology and Gender Studies. Of interest are the individual instances of Geordieness performed on specific occasions, i.e. the ways in which people construct their unique and constantly evolving language repertoires sometimes appropriating some, other times distancing themselves from, linguistic traits that would characterize them as members of specific communities in other people's perceptions. The material investigated is provided by the artistic world: engaging with the arts and culture, and in particular with music, is not just a solitary event, but also a participatory one which many people feel is worthwhile sharing through ordinary conversation and interaction via social networks every day.

In Whistling Vivaldi, described as a 'beautifully-written account' of the relationship between stereotypes and identity, Claude Steele offers a vivid first-person detailing of the research that brought him to his groundbreaking conclusions. Through the telling of dramatic personal stories, Dr. Steele shares the process of constructing and completing experiments and statistical studies that show that exposing subjects to stereotypes - merely reminding a group of female math majors about to take a math test, for example, that women are considered naturally inferior to men at math - impairs their performance in the area affected by the stereotype. Steele's conclusions shed new light on a host of American social phenomena, from the racial and gender gaps in standardized test scores to the belief in the superior athletic prowess of black men. As Homi Bhabha states, 'Steele's book is both urgent and important in understanding the tyranny of the stereotype and liberating ourselves from its derogatory, one-dimensional vision.' Whistling Vivaldi presents a new way of looking at identity and the way it is shaped by social expectations, and, in Richard Thompson Ford's words, 'offers a clear and compelling analysis and, better still, straightforward and practical solutions.'

Can aural training in music enhance your sound-discrimination abilities for languages? The study sets off to answer this question by testing 50 German-speaking students of non-linguistic degrees for their abilities to discriminate between sounds in Finnish, a language previously entirely unknown to them. 25 randomly selected subjects then went through an aural training in music for two weeks before all the subjects were retested in their aural-perceptive abilities in the Finnish language by means of a similar test containing different test items. The hypothesised positive effect of the musical intervention could be partially proved by a statistically significant mean enhancement in the final scores achieved by the trained group compared to an insignificant enhancement achieved by the control group.

This volume deals with the most controversial part of Velleius' work, regarded by the majority of modern scholars as a panegyric biography of Tiberius and used as an excuse for dismissing the historical value of Velleius' whole work. In the introduction Dr Woodman considers the nature of the Tiberian narrative in the light of the literary tradition, and argues that it is no more panegyric than some of the most admired products of Roman historiography such as Livy and Ammianus. He also considers the transmission of Velleius' text since its discovery in 1515, and argues that, contrary to the opinion of most nineteenth and twentieth-century editors, Rhenanus' editio princeps of 1520 is a more reliable authority than Amerbach's apograph of 1516. Dr Woodman provides a full apparatus criticus, and an extensive commentary which is intended for use by students and specialists in Roman literature, historiography, and history.
