There's a jiiiigsaaaaw, waiting in this box / It'd like for you to solve it / but it thinks it'll blow your mind! Not unlike the lyrical genius of David Bowie, jigsaw puzzles are at times mystifying yet always satisfying. Not only is the Where's Bowie? Jigsaw Puzzle a fun 500-piece detail-focused puzzle, it's also a find-Bowie interactive adventure. On the finished eight-by-eight-inch puzzle, hidden in multiple places across the detailed image, Bowie--in his various chameleonic guises--is patiently waiting to be spotted by a well-trained eye. It's like Where's Waldo? but, well, better,

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the

This one re-examines the ideas of that first conference, ideas that stimulated four decades of research and led to major legislation in the United States to conserve coastal wetlands. It is dedicated, appropriately, to two then young scientists - Eugene P. Odum and John M. Teal - whose inspiration has been the starting place for a generation of coastal wetland and estuarine research. I do not mean to suggest that wetland research started at Sapelo Island. In 1899 H. C. Cowles described successional processes in Lake Michigan freshwater marsh ponds. There is a large and valuable early literature about northern bogs, most of it from Europe and the former USSR, although Eville

Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. their known cousins by recent, dramatic mutations that
seem far too useful to have arisen by chance from

Mexico in the last half of the twentieth century. Born son of a homesteader in the tiny Santa Fe County farm and-ranch community of Stanley, King decided in seventh grade to be governor of New Mexico. The story of how he accomplished that goal-three times!-plays out against tremendous transformations occurring in the society, culture, politics, and business of New Mexico since World War II. When King won his first Santa Fe County Commission seat in 1954 at age 29, running for office was a down-home affair. Politics was personal. But as he served in office and climbed the political ladder toward his lifelong ambition, New Mexico changed. The state's
