The importance of simulation in education, specifically in legal subjects, is here discussed and explored within this innovative collection. Demonstrating how simulation can be constructed and developed for learning, teaching and assessment, the text argues that simulation is a pedagogically valuable and practical tool in teaching the modern law curriculum. With contributions from law teachers within the UK, Australia, Hong Kong, South Africa and the USA, the authors draw on their experiences in teaching law in the areas of clinical legal education, legal process, evidence, criminal law, family law and employment law as well as teaching law to non-law students. They claim that simulation, as a form of experiential and problem-based learning, enables students to integrate the 'classroom' experience with the real world experiences they will encounter in their professional lives. This book will be of relevance not only to law teachers but university teachers generally, as well as those interested in legal education and the theory of law.

Clinical legal education has revolutionized legal education, from its deepest origins in the nineteenth century to its now-global reach.

"By nearly every measure, Americans are less engaged in their communities and political activity than generations past." So write the editors of this volume, who survey the current practices and history of citizenship education in the United States. They argue that the current period of "creative destruction"—when schools are closing and opening in response to reform mandates—is an ideal time to take an in-depth look at how successful strategies and programs promote civic education and good citizenship.

Making Civics Count offers research-based insights into what diverse students and teachers know and do as civic actors, and proposes a blueprint for civic education for a new generation that is both practical and visionary.

This important new text is the product of several years of research of the family law of fifteen Commonwealth Caribbean jurisdictions. It is the first and only legal text that comprehensively covers all the main substantive areas of spousal family law, including marriage, divorce, financial support, property rights and domestic violence. The rights of the statutory spouse in the jurisdictions of Barbados, Belize, Guyana, Jamaica, and Trinidad and Tobago are examined, thus addressing, on a jurisdictional basis, an important area of spousal family that is seldom covered in English family law texts. The book also covers the number and variations of divorce regimes applicable to the region – the matrimonial offence divorce model of Guyana and Montserrat, the English five fact model of Trinidad and Tobago, Dominica, Grenada, Anguilla, and St Vincent and the Grenadines, the hybrid model of Antigua and Barbuda, Belize and St Kitts and Nevis, and the no fault model of Jamaica and Barbados. This book will prove an indispensable resource for law students and legal academics, as well as for family law practitioners across the English-speaking Caribbean. Other professionals, including sociologists and social workers, will also find the book useful and informative.

The essays in this volume deal with the legal history of the Province of Quebec, Upper and Lower Canada, and the Province of Canada between the British conquest of 1759 and confederation of the British North America colonies in 1867. The backbone of the modern Canadian provinces of Ontario and Quebec, this geographic area was unified politically for more than half of the period under consideration. As such, four of the papers are set in the geographic cradle of modern Quebec, four treat nineteenth-century Ontario, and the remaining four deal with the St. Lawrence and Great Lakes watershed as a whole. The authors come from disciplines as diverse as history, socio-legal studies, women's studies, and law. The majority make substantial use of second-language sources in their essays, which shade into intellectual history, social and family history, regulatory history, and political history.

Lori Chambers' fascinating study explores the legal history of adoption in Ontario since the passage of the first statute in 1921. This volume explores a wide range of themes and issues in the history of adoption including: the reasons for the creation of statutory adoption, the increasing voice of unmarried fathers in newborn adoption, the reasons for movement away from secrecy in adoption, the evolution of step-parent adoption, the adoption of Indigenous children, and the growth of international adoption. Unlike other works on adoption, Chambers focuses explicitly on statutes, statutory debates and the interpretation of statutes in court. In doing so, she concludes that adoption is an inadequate response to child welfare and on its own cannot solve problems regarding child neglect and abuse. Rather, Chambers argues that in order to reform the area of adoption we must first acknowledge that it is built upon social inequalities within and between nations.

As the settler state of Canada expanded into Indigenous lands, two traditions clashed in a bruising series of asymmetrical encounters over land use and ownership. One site of conflict was Kahnawà:ke. The Laws and the Land delineates the establishment of a settler colonial relationship from early contact ways of sharing land; land practices under Kahnawà:ke law; and ultimately the Canadian invasion in the guise of the Indian Act, private property, and coercive pressure to assimilate. This meticulously researched book is connected to larger issues of human relations with environments, communal and individual ways of relating to land, legal pluralism, historical racism and inequality, and Indigenous resurgence.

This collection examines law and justice on television in different countries around the world. It provides a benchmark for further study of the nature and extent of television coverage of justice in fictional, reality and documentary forms. It does this by drawing on empirical work from a range of scholars in different jurisdictions. Each chapter looks at the raw data of how much "justice" material viewers were able to access in the multi-channel world of 2014 looking at three phases: apprehension (police), adjudication (lawyers), and disposition (prison/punishment). All of the authors indicate how television developed in their countries. Some have extensive public service channels mixed with private media channels. Financing ranges from advertising to programme sponsorship to licensing arrangements. A few countries have mixtures of these. Each author also examines how "TV justice" has developed in their own particular jurisdiction. Readers will find interesting variations and thought-provoking similarities. There are a lot of television shows focussed on legal themes that are imported around the world. The authors analyse these as well. This book is a must-read for anyone interested in law, popular culture, TV, or justice and provides an important addition to the literature due to its grounding in empirical data.

This book makes the case for a more legally literate society and then addresses why and how a law school might contribute to achieving that. Moreover examining what public legal education (PLE) is and the forms it can take, the book looks specifically at the ways in which a law school can get involved, including whether that is as part of an academic, credit-bearing, course or as extra-curricular activity. Divided into five main chapters, the book first examines the nature of PLE and why its provision is so central to the functioning of modern society. Models of PLE are then set out ranging from face-to-face tuition to the use of hard-copy material, including the growing importance of e-based technology. One model of PLE that has proven to be very attractive to law schools – Street Law – is described and analysed in detail. The book then turns to look at the considerations for a law school wishing to incorporate PLE into its offerings be that as part of the formal curriculum or not. The subject of evaluation is then raised – how might we find out if what we do by way of PLE is effective and how it might be improved upon? The final chapter reaches conclusions, some penned by the book's author and others drawn from key figures in the PLE movement. This book provides a thorough examination of PLE in a law school context and contains a set of templates that can be implemented and/or adapted for use as the situation and jurisdiction dictate. An accessible and compelling read, this book will be of interest to law students, legal academics, practising lawyers, community activists and all those interested in PLE.
