Five thousand years ago, the Vedas showed a clear appreciation of the natural world and its ecology, the importance of the environment and the management of natural resources. Hinduism and Nature delves into the religion's deep respect for all life forms, the forests and trees, rivers and lakes, animals and mountains, which are all manifestations of divinity. Nature is venerated all over India: every village has a sacred grove, every temple a sacred garden and sacred tree. In this fascinating book, scholar and environmentalist Nanditha Krishna explores both the classical and the tribal traditions that venerated nature, and convincingly argues that we can save the environment only by seeking answers in ancient wisdom.
