A framework for understanding the deep archive of Black performance in the digital era In an era of Big Data and algorithms, our easy access to the archive of contemporary and historical Blackness is unprecedented. That iterations of Black visual art, such as Bert Williams's 1916 silent film short "A Natural Born Gambler" or the performances of Josephine Baker from the 1920s, are merely a quick YouTube search away has transformed how scholars teach and research Black performance. While Black Ephemera celebrates this new access, it also questions the crisis and the challenge of the Black musical archive in a moment when Black American culture has become a global export. Using music and sound as its primary texts, Black Ephemera argues that the cultural DNA of Black America has become obscured in the transformation from analog to digital. Through a cross-reading of the relationship between the digital era and culture produced in the pre-digital era, Neal argues that Black music has itself been reduced to ephemera, at best, and at worst to the background sounds of the continued exploitation and commodification of Black culture. The crisis and challenges of Black archives are not simply questions of knowledge, but of how knowledge moves and manifests itself within Blackness that is obscure, ephemeral, fugitive, precarious, fluid, and increasingly digital. Black Ephemera is a reminder that for every great leap forward there is a necessary return to the archive. Through this work, Neal offers a new framework for thinking about Black culture in the digital world.

*The future of politics after the pandemic COVID-19 exposed the pre-existing conditions of the current global crisis. Many Western states failed to protect their populations, while others were able to suppress the virus only with sweeping social restrictions. In contrast, many Asian countries were able to make much more precise interventions. Everywhere, lockdown transformed everyday life, introducing an epidemiological view of society based on sensing, modeling, and filtering. What lessons are to be learned? The Revenge of the Real envisions a new positive biopolitics that recognizes that governance is literally a matter of life and death. We are grappling with multiple interconnected dilemmas—climate change, pandemics, the tensions between the individual and society—all of which have to be addressed on a planetary scale. Even when separated, we are still enmeshed. Can the world govern itself differently? What models and philosophies are needed? Bratton argues that instead of thinking of biotechnologies as something imposed on society, we must see them as essential to a politics of infrastructure, knowledge, and direct intervention. In this way, we can build a society based on a new rationality of inclusion, care, and prevention.*

The Consumer Price Index Manual: Concepts and Methods contains comprehensive information and explanations on compiling a consumer price index (CPI). The Manual provides an overview of the methods and practices national statistical offices (NSOs) should consider when making decisions on how to deal with the various problems in the compilation of a CPI. The chapters cover many topics. They elaborate on the different practices currently in use, propose

alternatives whenever possible, and discuss the advantages and disadvantages of each alternative. The primary purpose of the Manual is to assist countries in producing CPIs that reflect internationally recommended methods and practices.

Clients who have multiple addictions and disorders are more difficult to engage and treat than clients with a single disorder. Many of the current systems are ill-equipped to address the myriad challenges of these clients—their relapse and recidivism rates are higher, and many of these clients tend to slip through the cracks, often going back and forth among addictions treatment, psychiatric and medical hospitalizations, and incarceration. Too many difficult-to-reach clients are at risk for relapse because their practitioners lack effective, innovative strategies for this unique client base who remain part of a revolving-door syndrome. Now, Certified Alcohol and Drug Addictions Counselor Mark Sanders, LCSW, offers specific strategies to assist therapists and counselors who work with difficult and at-risk populations, including those with: multiple addictions co-occurring disorders adolescents; rural methamphetamine users antisocial personality disorder, criminality, and addiction trauma or grief and chemical dependency history of chronic relapse and recidivism *Slipping Through the Cracks* is an encyclopedic handbook to specific traits of the difficult-to-reach client, as well as a concise guidebook to effective strategies that will be useful to anyone working with clients in private practice or in treatment programs who have both mental health and substance abuse issues.

*Resiliency-focused approaches to managing trauma. This is a book to help clients to transform what happened to them to make them better instead of bitter. The first book on trauma to combine the theory and practice of positive psychology and solution-focused brief therapy with traditional approaches, this book veers away from a focus on pathology (what is wrong with clients and how to repair the worst) to a focus on what is right with them (and how to create the best)—that is, from post traumatic stress to post traumatic success. The three R's of post traumatic success are: Recovery, Resilience and enrichment (post traumatic growth) - concepts depicted by the bamboo plant on the book's cover. Trauma professionals will learn what it takes to help more survivors benefit more substantively from therapy and how to support their clients in developing longer-term resilience. By practicing the skills in this book, they can increase their clients' self-efficacy and self-esteem, and make psychotherapy shorter in time, more cost effective and more lighthearted for their clients and themselves. Written for all professionals and students working with trauma survivors (both adults and children) and their families and friends, it equips readers with practical direction for adopting a more positive approach and expanding their range of available techniques. Over a hundred exercises, thirty-three cases, and forty stories are presented to illustrate and help incorporate this new approach into practice. It's about time to turn the tide on treating trauma by shifting the focus from reducing distress and merely surviving to building success and positively thriving.*
