to speak about what they see. Its topics are culturally interesting, and include cities to visit, recipes and small biographies of famous Italian poets and writers. As such, the book is suitable for students who are at beginner and post-beginner levels; in other words, A1, A2, B1, and B2. Students of the latter level can use the first two parts of the book to revise what they have studied in the past and the third part to improve their vocabulary and their reading skills. One of the strengths of this book is in its recordings, which used several people with a range of different accents. Such variety of accents and voices represents a good training tool for the student of

Italian. The book also includes contributions from Michela Dettori, Michela Esposito, Elsa Musacchio, Davide Renzi, Lea De Negri, Denise Pellini, Maria Andreana Deiana, Lia Renzi, Clara Lucci and Flavia Rovella, which serve to make it unique and interesting. The European Union is unique amongst international organisations in that it has a highly developed and coherent system of judicial protection. The rights derived from Union law can be enforced in court, as opposed to other international organisations whereby enforceability is often far less certain. At the heart of the system of judicial protection in the European Union is the core

principle of upholding the rule of law. As such, the stakes are high in the sense that the system of the judicial protection in the European Union must live up to its promise in which individuals, Member States and Union institutions are all guaranteed a route by which to enforce Union law rights. This book provides a rigorously structured analysis of the EU system of judicial protection and procedure before the Union courts. It examines the role and the competences of the Union courts and the types of actions that may be brought before them, such as the actions for infringement, annulment, and failure to act, as well as special forms of procedure,

for example interim relief, appeals, and staff cases. In doing so, special attention is given to the fields of EU competition law and State aid. In addition it evaluates the relationship between the Court of Justice and the national courts through the preliminary ruling procedure and the interplay between EU law and the national procedural frameworks generally. Throughout, it takes account of significant institutional developments, including the relevant changes brought by the entry into force of the Lisbon Treaty and the amendments to the Statute of the Court of Justice of the European Union and the Rules of Procedure of the Court of Justice and the General Court. Previously

published as *The Procedural Law of the European Union*, this thoroughly revised work will continue to be the first port of call for legal practitioners and academics seeking guidance on the system of judicial protection in the EU.

This book explores the EU law notion of 'individual rights'. It examines which sorts of rules grant EU legal rights to individuals, how it is decided if a right is conferred, and which individuals may claim the judicial protection of a right. It further discusses the legal implications and consequences of holding an EU legal right with respect to the interpretation and application of EU law in general

and to specific remedies such as declaratory remedies, injunctions, restitution and damages. On a more overarching level, the book explores the question of how the idea of EU law rights relates to other fundamental EU law concepts such as the principles of effectiveness and direct effect, and discusses the legal stringency of the EU courts' 'rights language' in light of the overall aim of European integration. It thus contributes to the body of literature that aims to shed new light on the borders of the sui generis legal order that is EU law.

A Guide to Italian Language and Culture for English-Speaking Learners of Italian

This topical book offers an in-depth analysis of the recent implementation of the Public Procurement Directive, based on the experiences of 12 Member States including France, Germany, Italy, Poland, Spain and the United Kingdom. The contributions from first-class public procurement law experts offer an informed and comparative analysis of the recent implementation of the Public Procurement Directive, as well as

focussing on so-called gold-plating (overimplementation) and issues where the legality of the implemented legislation is questionable. Vitally, the chapters also consider national preparatory works as a legal source and their interesting role in the implementation of the Directive including its Preamble. Attention is also given to the implementation of some of the most important novelties in the Directive such as the exclusion grounds, the competitive procedure with negotiation and contract changes. Modernising Public Procurement will be important reading for practitioners and civil servants involved in the

implementation of public procurement law. Academics, researchers, politicians, judges and members of complaints boards in the field of public procurement law will also find this book a stimulating read.

This book explores Public Procurement novelties and challenges in an interdisciplinary way. The process whereby the public sector awards contracts to companies for the supply of works, goods or services is a powerful instrument to ensure the achievement of new public goals as well as an efficient use of public funds. This book brings together the papers that have been presented during the "First

Symposium on Public Procurement", a conference held in Rome last summer and to be repeated again yearly. As Public Procurement touches on many fields (law, economics, political science, engineering) the editors have used an interdisciplinary approach to discuss four main topics of interest which represent the four different parts in which this book is divided: Competitive dialogue and contractual design fostering innovation and need analysis, Separation of selection and award criteria, including exclusion of reputation indicators like references to experience, performance and CV 's from award criteria, Retendering a contract for

This book explores how women's relationship with food has been represented in Italian literature, cinema, scientific writings and other forms of cultural expression from the 19th century to the present. Italian women have often been portrayed cooking and serving meals to others, while denying themselves the pleasure

of the table. The collection presents a comprehensive understanding of the symbolic meanings associated with food and of the way these intersect with Italian women's socio-cultural history and the feminist movement. From case studies on Sophia Loren and Elena Ferrante, to analyses of cookbooks by Italian chefs, each chapter examines the unique contribution Italian culture has made to perceiving and portraying women in a specific relation to food, addressing issues of gender, identity and politics of the body.

Each issue consists of the consolidated text of a directive, incorporating all amendments, in each of the official languages of the European Union.

*Public procurement and competition law are both important fields of EU law and policy, intimately intertwined in the creation of the internal market. Hitherto their close connection has been noted, but*

*not closely examined. This work is the most comprehensive attempt to date to explain the many ways in which these fields, often considered independent of one another, interact and overlap in the creation of the internal market. This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement, which consolidate the principle of competition in terms very close to those advanced by the author in the first edition. This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement*

*rules, and whether the latter (in their revised form) are adequate to ensure that competition is not distorted. The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective. Proceeding through a careful assessment of the general rules of competition and public procurement, the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement. It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out*

The Commentary also highlights the application problems and interpretative issues being raised in EU Member States, which in due time will make their way up to the CJEU or even require further legislative interventions. The first part of the book offers a unique reflection on enduring themes in public procurement law such as the

shaping of the scope of this regulatory regime, the development of tighter criteria for the exclusion of candidates and tenderers, the conduct of qualitative selection, the consolidation of the court's previous approach to technical specifications, new developments in tender evaluation, the inclusion of contract performance clauses with a social orientation, and, last but not least, the development of interpretive guidance concerning several aspects of the procurement remedies

regime. The book shows that the period 2015–2017 has been an interesting and rather intense period for the development of EU public procurement law, where the CJEU has not only consolidated some parts of its long-standing procurement case law but also introduced significant innovations that can create future challenges for the consistency of this regulatory regime. The first part of the book concludes with some thoughts on some of the salient aspects of this recent episode of silent

reform of EU public procurement law through CJEU case law. The second part of the book contains the essential excerpts of forty-one chronologically ordered judgments issued by the CJEU in the period 2015-2017, which have been selected because they either raise new issues or important matters of public procurement law. Each of the selected judgments is followed by an exhaustive and critical in-depth analysis, highlighting and providing insight into its legal and practical issues and

consequences. An exhaustive subject-index offers the reader quick and easy access to the case law treated in this book. This unique book, a 'must-have' reference work for judges and courts of all EU Member States and candidate countries and academics and legal professionals who are active in the field of procurement law, will also be valuable for law libraries and law schools across the world and for law students who focus their research and studies on EU law.

Public procurement law is a

necessary component of the single market because it attempts to regulate the public markets of Member States and represents a key priority for the European Union. This Research Handbook makes a major contribution to the understanding of the current EU public procurement regime, its interface with the law of the internal market and the pivotal role that this will play in the delivery of the European 2020 Growth Strategy.
