Today's healthcare supervisors are continuously faced with smaller budgets, fewer workers, greater responsibilities and time pressure. The all new Fifth Edition of Umikers Management Skills for the New Health Care Supervisor continues to provide valuable information for future health care managers and supervisors who must address these challenges daily. Written primarily for those who have little to no management training, Umikers offers practical suggestions for improving effectiveness both as a supervisor and as an organization. Ideal for students in junior undergraduate, community, and career college programs, author Charles McConnell maintains Bill Umikers clear, jargon-free writing style.

The Electronic Device Failure Analysis Society proudly announces the Seventh Edition of the Microelectronics Failure Analysis Desk Reference, published by ASM International. The new edition

will help engineers improve their ability to verify, isolate, uncover, and identify the root cause of failures. Prepared by a team of experts, this updated reference offers the latest information on advanced failure analysis tools and techniques, illustrated with numerous real-life examples. This book is geared to practicing engineers and for studies in the major area of power plant engineering. For non-metallurgists, a chapter has been devoted to the basics of material science, metallurgy of steels, heat treatment, and structure-property correlation. A chapter on materials for boiler tubes covers composition and application of different grades of steels and high temperature alloys currently in use as boiler tubes and future materials to be used in supercritical, ultra-supercritical and advanced ultra-supercritical thermal power plants. A comprehensive discussion on different mechanisms of boiler tube failure is the heart of the book. Additional chapters detailing the role of advanced material characterization techniques in failure investigation and the role of water chemistry in tube failures are key contributions to the book.
