"Includes recipes and tea time tips"--Page 4 of cover.

This book is above all an example of philosophical reflection in Africa, refuting traditional commonplaces concerning the continent. The texts comprising this volume disprove the misconceptions that Africa has never understood itself and has never contributed to the enrichment of knowledge, the development of rational thought, philosophy, the arts, science and technology as well as civilization. For the members of the recently established network Africa In-The-World, the contributions dealing with musical rhythms, dances and the continental humanist philosophy confirm that Africanisation is a process that continues unabated to this day. The multiple and

significant African contributions are often difficult to see because they have long since been adopted and integrated into the heritage of humanity. Africa In-The-World is working toward the construction of a universal humanity - one conceived in terms of a "give and take mentality."

The hypothesis is that feature checking theory and its related principles and operations provides an adequate framework within which to characterise and explain structural aspects of English-Afrikaans intrasentential code switching. A number of word order differences between English and Afrikaans, specifically involving verb position, are analysed within the framework of feature checking theory, where the movement of lexical items is proposed to be driven by the

The constructions include constructions with adverbs, focalisation and topicalisation constructions, embedded that and wh clauses, and yes-no questions. On the basis of the feature checking analyses, predictions are made regarding the well-formedness of constructions of these types in which code switching between English and Afrikaans occurs. The predictions are tested on the basis of data elicited from 30
