Integrating business law with ethics and effective management, Bagley's MANAGERS AND THE LEGAL ENVIRONMENT: STRATEGIES FOR THE 21ST CENTURY, 8E equips future managers with the legal knowledge and risk management techniques essential for success in global business. Renowned for its cutting-edge coverage and strategic approach, this book offers one of the most comprehensive yet easy-to-understand presentations of today's global legal environment of business. Proven learning features such as Inside Story and Perspective boxes illustrate how the law impacts daily management decisions and business strategies, and A Manager's Dilemma feature challenges readers to consider such issues as whether to outsource labor to a country known for poor working conditions and the ethics of structuring a business to avoid domestic taxes. Fulfilling AACSB requirements, the eighth edition addresses the legal, political, regulatory, and ethical dimensions of business. Reflecting the latest developments and decisions, the text's up-to-date coverage includes the regulation of commercial speech, the disclosure of corporate political spending, the application of the Fourth Amendment to cell phone location data, the patentability of human genes, employees' use of social media, regulatory responses to climate change, the fiduciary duties of managers of limited liability companies, the FCC's proposed rules on net neutrality, the constitutionality of Obamacare, the use of race in college admissions, the Defense of Marriage Act, NSA surveillance programs, the right of college football players to unionize, and more. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The perspective of this book is to present "ethics" as a conversation about how we decide what is good or bad, right or wrong. It is a collection of conversations employed by educators to assist accounting students in developing their understanding of accounting's ethical aspects and to help them develop into critical thinkers who consider the ethical complexities of the function of accounting in human society. Because we are social beings, ethics is a central human concern, since it involves determining the ethicality of human actions and their effect on other individuals, as well as determining the collective societal acceptance or rejection of an action. Thus, the book 's primary goal is to call attention to the intersectionality of accounting and ethics and to encourage students and researchers to consider the ethical implications of accounting decisions. The book contains a diversity of perspectives within which discussions of accountants' and accounting's ethical responsibilities may occur. The contributing authors were deliberately chosen for their diverse perspectives on whence moral guidance for accounting may come. Each chapter stands on its own and represents the thinking of its authors. The book is not a primer on correct behavior for accountants but a place where educators may spur the conversation along.

How can leaders use strategic planning to strengthen their public and nonprofit organizations? In this fourth edition of his perennial bestseller Strategic Planning for Public and Nonprofit Organizations, Bryson provides the most updated version of his thoughtful strategic planning model and outlines the reasons public and nonprofit organizations must embrace strategic planning to improve their performance. Introduced in the first edition and refined over the past 18 years, the Strategy Change Cycle—a proven planning process used successfully by a large number of nonprofit and public organizations—is the framework used to guide the reader through the strategic planning process. Bryson offers detailed guidance on implementing the process, and specific tools and techniques to make the process work in any organization. In addition, he clarifies the organizational designs through which strategic thought and action will be encouraged and embraced throughout an entire organization. The most to updated examples, new cases, and additional information on boundaries, distinctive competencies, Actor-Network theory, Bryson will create an instructor's manual with sample syllabi, PowerPoint teaching slides, and additional cases.

Autobiographical accounts by Nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process. Lives of the Laureates offers readers an informal history of modern economic thought as told through autobiographical essays by twenty-three Nobel Prize laureates in Economics. The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. The accounts are accessible and engaging, achieving clarity without sacrificing inherently difficult content. This sixth edition adds four recent Nobelists to its pages: Eric Maskin, who illustrates his explanation of mechanism design with an example involving a mother, a cake, and two children; Joseph Stiglitz, who recounts his field's ideological wars linked to policy disputes; Paul Krugman, who describes the insights he gained from studying the model of the Capitol Hill Babysitting Coop (and the recession it suffered when more people wanted to accumulate babysitting coupons than redeem them); and Peter Diamond, who maps his development from student to teacher to policy analyst. Lives of the Laureates grows out of a continuing lecture series at Trinity University in San Antonio, which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms. These lectures demonstrate the richness and diversity of contemporary economic thought. The reader will find that paths cross in unexpected ways—that disparate thinkers were often influenced by the same teachers—and that luck as well as hard work plays a role in the process of scientific discovery. Survey of Accounting, 3rd edition, is designed to cover both financial and managerial accounting in a single 16-week course, presenting the material in a style easy for non-accounting majors to grasp. It incorporates the same pedagogical innovations that have made Edmonds' financial and managerial titles such fast-growing successes in the marketplace, including his unique Horizontal Financial Statements Model and a multiple accounting cycle approach that demonstrates the impact of related events over a series of accounting cycles.

Between the 18th and 19th centuries, Britain experienced massive leaps in technological, scientific, and economical advancement. This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

The fourth edition of a popular guide to the key issues in tax reform, discussing the current system and alternative proposals clearly and without a political agenda. As Albert Einstein may or may not have said, "The hardest thing in the world to understand is the income tax." Indeed, to follow the debate over tax reform, the interested citizen is forced to choose between misleading sound bites and academic treatises. Taxing Ourselves bridges the gap between the two by discussing the key issues clearly and without a political agenda: Should the federal income tax be replaced with a flat tax or sales tax? Should it be left in place and reformed? Can tax cuts stimulate the economy, or will higher deficits undermine any economic benefit? Authors and tax policy experts Joel Slemrod and Jon Bakija lay out in accessible language what is known and not known about how taxes affect the economy, offer guidelines for evaluating tax systems, and provide enough information to assess both the current income tax system and the leading proposals to reform or replace it (including the flat tax and the consumption tax). The fourth edition of this popular guide has been extensively revised to incorporate the latest information, covering such recent developments as the Bush administration's tax cuts (which expire in 2011) and the alternatives proposed by the President's Advisory Panel on Federal Tax Reform. Slemrod and Bakija provide us with the knowledge and the tools—including an invaluable voter's guide to the tax policy debate—to make our own informed choices about how we should tax ourselves.
