Companies traded over the counter or on regional conferences.

Although there are about 15,000 school districts in the United States, each headed by a superintendent, research on the superintendency has not been systematic and dynamic. This book presents a synthesis of research on the superintendency. Chapters include the following: (1) "Smoke, Mirrors, or Reality: Another Instructional Leader" (Shirley M. Hord); (2) "Through the Looking Glass" (Thomas E. Glass); (3) "Point and Counterpoint: What Is In the Context of What Might Be?" (Thomas E. Glass); (4) "Exemplary Superintendents: Do

They Fit the Model?" (Thomas E. Glass); (5) "Superintendent Selection and Success" (Shirley M. Hord and Nolan Estes); (6) "Diagnosis, Self-Prescription, and Treatment" (David S. G. Carter and Ben M. Harris); (7) "Assessment-Based Models for Learning and Growth" (Judith G. Loreda, Ben M. Harris, and David S. G. Carter); (8) "Enter the Neophyte: Preparing Administrators for Leadership Roles" (Judith G. Loreda and David S. G. Carter); (9) "Leadership for Learning--Learning for Leadership" (David S. G. Carter); and (10) "The Future: Mapping the Multisite Executive Development Center" (David S. G. Carter and Thomas E. Glass). The appendix contains a list of skills and components needed for instructional leadership. A total of 12 tables, 11 figures,

Management blends theory, data analysis, examples and practical case situations to equip students and business leaders with the analytical tools they need to make informed financial decisions and manage the risks that businesses face in today's competitive global environment. Combining theory and practice, the authors offer the reader a multitude of real-world examples and case studies, emphasising fundamental concepts, principles and analytical theories to enable students to understand not only what to do when confronted with an international financial decision, but why that choice is the correct one. Features include: real data analysis - all fully updated for the third edition; extended

This publication considers the effects of gender on access within the family and beyond. It is based on a more detailed study of women's involvement in key sectors of the Indian economy, the returns they are getting, and the critical constraints they face in increasing their access to, and productivity in, these sectors. Three fundamental observations emerge. First, women are vital productive workers in India's national

economy. Second, the poorer the family, the greater its dependence on women's economic productivity. The third observation is that, as a society, India invests far less in women workers than in its working men. India's women also have less access than do men to health services and nutrition. These gender based asymmetrics are contributing factors in India's high child mortality rates and persistently high birth rates.

One of the most vexing issues that has faced the international community since the end of

the Cold War has been the use of force by the United Nations peacekeeping forces. UN intervention in civil wars, as in Somalia, Bosnia and Herzegovina, and Rwanda, has thrown into stark relief the difficulty of peacekeepers operating in situations where consent to their presence and activities is fragile or incomplete and where there is little peace to keep. Complex questions arise in these circumstances. When and how should peacekeepers use force to protect themselves, to protect their mission, or, most

troublingly, to ensure compliance by recalcitrant parties with peace accords? Is a peace enforcement role for peacekeepers possible or is this simply war by another name? Is there a grey zone between peacekeeping and peace enforcement? Trevor Findlay reveals the history of the use of force by UN peacekeepers from Sinai in the 1950s to Haiti in the 1990s. He untangles the arguments about the use of force in peace operations and sets these within the broader context of military doctrine and practice.

Drawing on these insights the author examines proposals for future conduct of UN operations, including the formulation of UN peacekeeping doctrine and the establishment of a UN rapid reaction force.

“Beyond New Media Art” is the revised, updated version of a book first published in Italian with the title “Media, New Media, Postmedia” in 2010. Through the circulation of excerpts, reviews and interviews, the book produced some debate outside of Italy, which persuaded the author to release, three years later, this English translation. “Beyond New Media Art” is an attempt to analyze the current

positioning of so-called New Media Art in the wider field of contemporary arts, and to explore the historical, sociological and conceptual reasons for its marginal position and under-recognition in recent art history. On the other hand, this book is also an attempt to suggest new critical and curatorial strategies to turn this marginalization into a thing of the past, and to stress the topicality of art addressing the media and the issues of the information age. Domenico Quaranta is an art critic, teacher and curator. He

**Howard Rheingold tours the "virtual community" of online networking. Howard Rheingold has been called the First Citizen of the Internet. In this book he tours the "virtual community" of online networking. He describes**

**a community that is as real and as much a mixed bag as any physical community—one where people talk, argue, seek information, organize politically, fall in love, and dupe others. At the same time that he tells moving stories about people who have received online emotional support during devastating illnesses, he acknowledges a darker side to people's behavior in cyberspace. Indeed, contends Rheingold, people relate to each other online much the same as they do in physical communities. Originally published in 1993, *The Virtual Community* is more timely than ever. This edition contains a new chapter, in which**

**the author revisits his ideas about online social communication now that so much more of the world's population is wired. It also contains an extended bibliography.**
