A captivating illustrated autobiography of the early years of a major American choreographer. Both as a dancer and a choreographer, José Limón electrified audiences from the 1930s to the 1960s. With his striking looks and charismatic presence, he was American modern dance's first male star. Born in Culiacán, Mexico, in 1908, the eldest of twelve children, he came to the United States when he was seven. In 1928, after a year at UCLA as an art major, he left for New York. Here, he attended his first modern dance concert and discovered his destiny. He spent the 1930s with the Humphrey-Weidman group. Then, in the 1940s, after a stint in the army, and with Doris Humphrey as artistic advisor, he formed one of the outstanding modern dance companies of the postwar era. His greatest works — *The Moor's Pavane*, *La Malinche*, *The Traitor*, *A Choreographic Offering*, *There is a Time*, *Missa Brevis* — extolled a humanism that endeared them to audiences the world over. Although Limón died in 1972, all these dances remain in the Limón Dance Company's active repertory. This memoir was commissioned by Wesleyan University Press in the late 1960s. Left unfinished at the time of Limón's death, it stands on its own as a Joycean account of the coming of age of an unusually perceptive dance artist. Limón writes with

eloquence of his Mexican childhood. And of the numerous figures he memorializes, from Martha Graham to José Covarrubias, none is more luminously evoked than Doris Humphrey, the "goddess," "nymph," and "caryatid" of his life. Sensitively edited by Lynn Garafola, the book includes a complete list of Limón's works, richly informative notes, rare photographs, and a detailed bibliography. This is the single most important book on Limón and a riveting memoir of modern dance during its golden age

Guide to the Code of Ethics for Nurses

For millions of people worldwide, nurses are the difference between life and death, self-sufficiency and dependency, hope and despair. But a lack of understanding of what nurses really do -- one perpetuated by popular media's portrayal of nurses as simplistic archetypes -- has devalued the profession and contributed to a global shortage that constitutes a public health crisis. Today, the thin ranks of the nursing workforce contribute to countless preventable deaths. This fully updated and expanded edition of Saving Lives highlights the essential roles nurses play in contemporary health care and how this role is marginalized by contemporary culture.

Through engaging prose and examples drawn from television, advertising, and news coverage, the authors detail the media's role in reinforcing stereotypes that fuel the nursing shortage and devalue a highly educated sector of the contemporary workforce. Perhaps most important, the authors provide a wealth of ideas to help reinvigorate the nursing field and correct this imbalance. As American health care undergoes its greatest overhaul in decades, the practical role of nurses -- that as autonomous, highly skilled practitioners -- has never been more important. Accordingly, Saving Lives addresses both the sources of, and prescription for, misperceptions surrounding contemporary nursing.

A comprehensive book supported by extensive research studies and data, Bjorklund's text presents the broadest coverage of topics in cognitive development. Unlike other books, Bjorklund shows readers how developmental function can help explain individual differences in cognition by covering both the typical pattern of change in thinking observed over time and the individual differences in children's thinking in infancy and childhood. A major theme of this book is the continuous transaction between the child embedded in a social world: although a child is born prepared to make some sense of the world, his or her mind is also shaped by forces in the physical and social

Understanding Jurisprudence by Raymond Wacks adopts a novel approach to this challenging subject; It reveals the nature of legal theory with clarity, enthusiasm, and wit, without avoiding its complexities and subtleties. The author provides an illuminating guide to the central questions of legal theory. An experienced teacher of jurisprudence and distinguished writer in the field, his approach is stimulating, accessible, and even entertaining. The concept of law lies at the heart of our social and political life. Jurisprudence explores the concept of law and its role in society. It elucidates its meaning and its relation to the universal questions of justice, rights, and morality. And it analyzes the nature and purpose of our legal system, and its practice by courts, lawyers, and judges.

This book focuses on a theoretical framework (the Four-Component Model) and evaluations of the Defining Issues Test (DIT) developed by Rest and his coworkers. The authors assess their own work with the DIT and that of hundreds of other investigators. Among their conclusions are: formal education is correlated with moral judgment; there is evidence for Kohlberg's higher stages; moral education programs produce modest gains, and, there are no sex differences. The book is important for libraries wishing a complete collection on moral development. Choice
