The 5 Day Typing Course

Each vol. 1906/1908-1906/1910 and 1907/1911-1912/1916 contains tables of data for each year arranged in parallel columns for comparison purposes. Vol 1906/1908 also contains property records and photographs of all New York's public schools; called the "Real estate section" in subsequent vols. 1911/1915 and includes only data for instance where changes or new acquistitions occurred since the previous report. Reports 1911/1915- include "Pictorial section" containing photographic illustrations of various school.activities.

Deep learning is often viewed as the exclusive domain of math PhDs and big tech companies. But as this hands-on guide demonstrates, programmers comfortable with Python can achieve impressive results in deep learning with little math background, small amounts of data, and minimal code. How? With fastai, the first library to provide a consistent interface to the most frequently used deep learning applications. Authors Jeremy Howard and Sylvain Gugger, the creators of fastai, show you how to train a model on a wide range of tasks using fastai and PyTorch. You'll also dive progressively further into deep learning theory to gain a complete understanding of the algorithms behind the scenes. Train models in computer vision, natural language processing, tabular data, and collaborative filtering Learn the latest deep learning techniques that matter most in practice Improve accuracy, speed, and reliability by understanding how deep learning models work Discover how to turn your models into web applications Implement deep learning algorithms from scratch Consider the ethical implications of your work Gain insight from the foreword by PyTorch cofounder, Soumith Chintala

You are often told that eating less and exercising more are the keys to losing weight; but even with multiple plans and temporary successes, you fail to find lasting results with this old method. Yuri Elkaim's The All-Day Fat-Burning Diet provides the solution with his 5-Day Calorie Cycling Formula that sets your metabolism to lose up to 5 pounds a week. This plan eliminates the causes of weight gain and pushes the reset button on your fat-burning capacity. No combination of calorie cutting, exercising, or restrictive dieting will help you look and feel great unless you set your body to burn fat and lose weight all day, all night, when you're not eating or working out--24/7. In The All-Day Fat-Burning Diet, Elkaim reveals rarely discussed "fat triggers" along with an easy and innovative way to double weight loss in just 3 weeks. Based on a powerhouse blend of nutritional know-how, fitness experience, and solid science, Elkaim's four-pronged approach features (1) strategically cycling calories and carbohydrates; (2) eating "clean and lean" foods that reduce "fat triggers" in the body; (3) exercising more intelligently; and (4) improving the body's ability to repair and avoid burnout. This proven program will reset your body to your desired factory settings and supercharge your metabolism to burn fat on autopilot--no matter age, fitness level, or health status.

Teach yourself how to type in 5 days instead of wasting all year on it.Zoom-Type is a revolutionary breakthrough in teaching touch-typing FAST by using the right brain. Hundreds of quick snapshots and a musical finger march get you seeing, saying, and tapping the correct keys with the correct fingers in just 5 days! (5 minutes, 5 times a day). Good for ages 4 to 94. Totally portable-no computer necessary. This is the only right-brain typing course on the market. The difference in the sheer speed of the results we get is head-spinning. You and your children will speed-type while others with other programs are still just getting the book open! Even the computer programs designed to teach typing are still in the dark ages. The brain learns best by pictures.This typing course is unique in three ways:(1) Spaced repetition-five-minute lessons, several times a day! Away with hour-long drudgery! Rapid-fire quick imprints of the autonomic nervous system gets the job done.(2) Right brain-uses the picture side of the brain, not just the left side as other typing methods do. With Zoom-Type, children subconsciously learn where the letters LIVE not just what they ARE.(3) Splintered skills-you learn each skill separately, in small increments, then when you put them together all the brain has to do is jump the synapses between the already acquired mini-skills. The brain is tricked into thinking the whole task is super EASY.
