is because many

Today,
information

plays a
pivotal role
in financial

audit: most
financial data
is now

Additionally,
a firm's data—

in the case of

biotech firms—
comprises most
of the audited
value of the
firm.

Financial

its own strategy.
Data, representing

Lack of talent,

specific data sins prevent most organizations from benefiting fully from their data asset investments.

Solving these prerequisites will allow your organization to:

- Improve your organization's data;
- Improve the way your people use
