*No matter how many times I tell myself this isn't happening, every time I open my eyes I have to convince myself all over again. By 'his,' I mean being sold as a slave and then being thrown into a cell filled with aliens of all different shapes and sizes. Then I'm put in a cage with a deadly alien with biceps the size of my thigh and skin that flashes with a pure, golden light. I think I'm not going to make it through the night. That maybe I'll be an after dinner snack, but when he calls me his bond-mate, I'm hit with a wave of desire unlike any I've ever felt before. He tells me I'm his fated. That I am his and he is mine, and I know he's right because I feel it deep inside my chest. It's a knowing that won't go away no matter how hard I try to ignore it. The only thing is, he shouldn't want me. Not at all. When we're taken to an unknown planet, the aliens who brought us here need me for my blood. They're in the final stage of planning an attack on every being in the universe and they need something from me that will annihilate millions. We can't let that happen. My alien is a Dhau warrior and he will tear through hell to save me. But I have a secret. He says he doesn't care but I know eventually he will. My life was irrevocably torn from me once. The Alien Book

In the first book of the brand-new early chapter book series, the Alien Next Door, an alien boy named Zeke tries to fit in and adjust to life on Earth, while a classmate, Harris, suspects that Zeke might not be quite what he claims to be. Zeke is on his way to his first day of school, feeling down because he has to start over again on a new planet, as his scientist parents constantly move to wherever their research

takes them. When he gets to school, no one seems to notice anything strange or different about him except Harris, a kid obsessed with science fiction and aliens. Harris sees Zeke doing extraordinary things but can't convince anyone, least of all his best friend, Roxy, that Zeke might be an alien. Roxy just thinks Harris is jealous that she's becoming friends with Zeke. But when Roxy invites Zeke over to Harris's house, will Harris find a way to prove that he's right?

Resistance Is Your Prime Directive Have you ever experienced a sensation of missing time? Have you ever found a metallic implant somewhere in your body? It's likely that you're a victim of alien abduction, and you don't even know it. Aliens are among us. While the true intentions of these mysterious intruders from outer space are unknown, there's no doubt that their actions are nefarious. It's your right - your civic responsibility - to learn the skills necessary to protect yourself, your loved ones and ultimately your planet. Aliens want to whisk you away in the night to perform terrifying experiments on you. Isn't it time you learn how use your MP3 player to defend yourself from their paralyzing powers? Shouldn't you know how to evade the pursuit of a flying saucer? Wouldn't you sleep better at night knowing some proven hand-to-

hand combat techniques guaranteed to stop your extraterrestrial foe in its tracks? Make no mistake - our world is under attack and this handbook may be the only thing standing between the human race and total annihilation. Read it and join the resistance.

What would life on other planets look like? Forget the little green men, alien life is likely to be completely unrecognisable -we haven't even discovered all the life on our own planet. This visionary book offers some of the most radical but scientifically accurate thinking on the possibility of life on other planets ever conceived. Using broad principles of Earthly biology and expanding on them laterally, Cohen and Stewart examine what could be out there. Redefining our whole concept of what 'life' is, they ask whether aliens could live on the surface of a star, in the vacuum of space or beneath the ice of a frozen moon. And whether life could exist without carbon or DNA -or even without matter at all. They also look at 'celebrity aliens' from books and films -most of which are biologically impossible. Jack Cohen is an 'alien consultant' to many writers, advising what an alien could and couldn't look like. (E. T. go home -you do not pass the test) But this book is as much about the latest discoveries in Earthly biology as well as life on other planets. It's a serious yet entertaining science book, as you'd expect from the bestselling authors of THE SCIENCE OF DISCWORLD.

When aliens invade, a generations-long struggle begins against an impenetrable enemy in this sci-fi epic from the Hugo and Nebula Award-winning author. The Entities have arrived on Earth, fifteen feet tall with impenetrable defenses and inscrutable motives. As conquerors, they have no demands, no explanations, simply harsh consequences should they be challenged. Releasing a plague and plunging the world into a new

Dark Age, the Entities seem unbeatable. But, one family at least—the Carmichael clan led by Colonel Arsen Carmichael—will never give up the resistance. THE ALIEN YEARS is an epic story told over multiple generations by master of thoughtful science fiction Robert Silverberg. Can ideas of freedom survive in the face of an overwhelmingly powerful enemy? “A remarkable study of human endurance and patience that belongs in

most SF collections.” —The Library Journal “Sobering and frightening.... Silverberg’s rich characters, his dead-on-target vision of modern society, his mastery at building tension—all are in evidence in this notable outing from one of the very best.” —Publishers Weekly

The Alien Abduction Files

**SHOCKING. CONTROVERSIAL. UNPRECEDENTED. A CASE LIKE UNLIKE ANY OTHER IN THE ANNALS OF UFO INVESTIGATION, DNA RESEARCH, OR ALIEN ABDUCTION.** Sydney, Australia, July 23, 1992. Twenty-eight-year-old Peter Khoury was awoken by what appeared to be two females—both striking and unearthly—kneeling on his bed. What transpired between them was a physical assault as bizarre and disorienting as it was unnatural. **Then, as quickly as they had arrived, they vanished.** Khoury had become one of a legion of alien abductees with inexplicable experiences, but this particular incident stood apart from all the others. This time, there was evidence—two strands of white-blond hair from one of the females. Khoury’s case would result in the very first forensic DNA analysis of “alien abduction” evidence and revealed an extraordinary biological anomaly—one genetically close to human yet almost impossibly far from the human mainstream. A gripping account of one of the great mysteries of our time, *Hair of the Alien*, brings us closer than ever before to understanding our past, our origins, and our place in the universe.

A rogue spaceship captain. A human scientist. An explosive attraction. Faith has spent the past eight years as a scientist locked in an alien research lab. When she finally manages to escape and finds out what the aliens are doing with her work, she is appalled and determined to stop their plans. The alien spaceship captain who unknowingly assisted her escape is going to help her shut down the lab - whether he wants to or not. And she's not going to let his massive body or the kind heart hidden behind his gruff facade distract her. Captain Athar finally has his life exactly the way he wants it - he has his ship, his crew, and his freedom. No mouthy little human is going to interfere with any of that, no matter how much she tempts him or how much his instincts demand that he claim her. If only he weren't as tempted as much by her brilliant mind as by her luscious body. Can Faith and Athar fight their overwhelming attraction long enough to defeat the evil scientists and stay ahead of the Imperial Fleet? And when the battle is over, can there be a future for the two of them? Each book in the Alien Abduction series features a different couple and can be enjoyed as a standalone romance. Intended for mature readers.

**Why would two women separated by thousands of miles share a common thread involving alien abduction? Both cases are supported by multiple witnesses and have substantial evidence.** Both women experienced missing time while driving with a companion, and were later taken from their homes. Both have been unwilling participants in ongoing experimental procedures that appear to follow family genetic lines. Both witnesses have given detailed descriptions of the crafts’ interiors and technology, medical procedures, messages from the visitors, and the types of ETs they have encountered, including their society’s hierarchical structure. Even more startling, both have independently described finding themselves on identical huge craft, within the same timeframe. The Alien Abduction Files finally reveals: The little-known details of alien experimental procedures The theoretical science that can explain alien technology The messages conveyed by the ETs to abduction experiencers The vulnerabilities and benefits of living life as an abduction experiencer The evidence that these phenomena are real.

**In the second book of the Alien Next Door series, Harris and Roxy go over to Zeke’s house and meet his strange family. Will Harris be able to prove to Roxy that Zeke and his family are aliens? Harris has his suspicions that the new kid at school, Zeke, is an alien, but he hasn’t been able to prove it to his best friend, Roxy. When they’re both invited over to Zeke’s house, Harris thinks this is the perfect opportunity for him to research Zeke’s alien family and show Roxy that they’re all from another planet. But Roxy is perfectly fine playing with all of Zeke’s alien technology which she just thinks is “hi-tech,” and as a thank you, Harris’s parents invite Zeke’s parents over for dinner. At dinner, no one but Harris seems to notice all the strange things Zeke’s family is doing-like making food levitate to their mouths. However, Zeke realizes that Harris is the only one noticing these things and decides to use this opportunity to have a little more fun at dinner. . . .**

From parrots to potatoes, in a great library you can find out almost everything the human race has ever thought or imagined. How excellent for an intelligent researcher from another planet...

Being a space pirate makes a being rich, which was why Rhlax was dealing with the biggest crime lord in the ten quadrants against his better judgment. He doesn't know much about the job on offer, but he knows it'll pay for food and supplies for himself and his brothers. Maybe enough to find a nice, quiet planet somewhere, forget about a life of smuggling and finally settle down. He's certainly not prepared when a female slave, none the likes he'd seen before, is led naked, chained and helpless to be his fated mate. He definitely wasn't prepared when she overrules his dream, along with the crime lord's head, kidnapping the female and makes a target of himself and his brothers - The crime lord has a brother and the brother wants them all dead. When their ship is destroyed, Rhlax and his brothers are blown into the far reaches of the known universe. To make matters worse, the escape pod is wrecked and his fated mate has escaped. Rhlax must find her before the crime lord's thugs, or the unknown creatures on this planet, and complete the bond before his mind is lost to the mating urge. She can't remember her or her life before the cages. Maybe it's better not knowing. Being trapped in a cage and grieving a beautiful life would be the worst kind of torture. She's good at zoning out, but it gets harder and harder to disregard the massive blue-skinned alien who tells her he is her fated mate, whatever that is. All she knows is if she doesn't get away from him, she might never be free again. If you like impossible odds, wildness planets, blue-skinned aliens and the tension of fated mates, you'll love Protected by the Alien Space Pirate. Most of us have encountered frustrating incidents in our lifetimes. For humor columnist Wolfgang Niesielski, one of his most exasperating moments involves an expensive hotel room, a faulty thermostat, and a patronizing front desk clerkly to be rescued by two gentlemen who, after conferring with each other in hushed tones, change their pleasant demeanor into the serious miens of surgeons before a heart transplant operation. In this compilation of his humor columns, Niesielski provides an amusing take on everyday experiences. See what its like to have understand the overwhelming differences between first class and tourist class on an airplane, and find out why its important to choose the right gift for a loved oneeven if it is a Salad Shooter or an electric nail-file buffing system. From learning how unforgiving Mother Nature truly is when he forgets how to water the lawn to the moment when he discovers he is a procrastinator in the worst way, Niesielski illustrates what fun life can be when one learns to laugh at himself. *Unmasking the mysteries of alien life on earth! Make mention of the word "alien" and it conjures images of black-eyed, large-headed, dwarfish beings that have come to be known as the Greys. Indeed, Greys have become a staple part of pop-culture, never mind just the field of UFO research. They've appeared in Steven Spielberg's classic 1977 movie, Close Encounters of the Third Kind. They regularly popped up in The X-Files. And, of course, there are numerous people – all across the world – who claim to have been abducted by the Greys and subjected to intrusive medical experiments. Yet, before the 1950s, the Greys were nowhere in sight. The Alien Book: A Guide to Extraterrestrial Beings on Earth shows that extraterrestrial life comes in all kinds, appearances, sizes, and bodies. They all have one thing in common, however: the human race has encountered them, and we continue to do so today. Not just dozens, or even hundreds, but thousands of eyewitness experiences have been reported. Covering hundreds of extraterrestrial life forms in more than 40 thematic chapters, this absorbing look at the mysteries of aliens on earth includes ... the Space Brothers: long-haired, very human-looking ET's the finnish Reptilians: seven-to-eight-foot-tall predatory shapeshifters Men in Black beings: extremely pale-skinned, tall, and with huge eyes Black-eyed Children: anemic-looking kids with solid black eyes that might be ET-human hybrids Bigfoot the werewolf-like Dogmen jellyfish-style aliens that soar around the skies of our world the Shadow People: dangerous humanoids that terrorize people legendary Nephthim space-vampires: insect-like aliens that resemble a giant praying mantis and many, many more! The Alien Book investigates the full range of sentient, alien life forms. Some are benign and others downright deadly. Some are small, like a germ or virus that has NASA's, creating guidelines to deal with an outbreak of an extraterrestrial germ. Some are big like a giant praying mantis or the biblical Goliath. They all lurk on Earth and in this chilling book! With more than 120 photos and graphics, this tome is richly illustrated. Its helpful bibliography and extensive index add to its usefulness.*
