The encyclopedia opens with a basic introduction, *Stories from the American Revolution*, providing a capsule history of the war from protests in 1763 to the end game at Yorktown and the Treaty of Paris. There is a discussion of African-Americans, American Indians, privateers, and the role of religion in the Revolutionary Period. There are biographies of General George Washington, Nathanael Greene, Salem Poor, Captain John Paul Jones, John Adams, Haym Salomon, and Thomas Paine. The second chapter gives a good overview of the major battles of the revolution. Chapter Three provides a very thorough day-by-day overview through 1783. The next chapter is an essay about the continental army's ways of war. Chapter Five discusses the factors contributing to the success of the American colonies as they revolted against British rule. The following chapter by the U.S. Army is a detailed account of the Army in the forging of a nation, beginning with the European heritage of the colonies. A major section provides a timeline of the revolution with numerous original document transcriptions, placing each text in the context of its history. It gives extraordinary contemporaneous insight into the thoughts and plans of key players in the drama, including Washington. *Supplying Washington's Army* is the next section of this incredible encyclopedia, answering the question of how the soldiers were clothed and armed and why there was such a shortage of provisions. The role of the first American Navy, and Captain John Paul Jones, is covered in the next chapter, which includes a full list of vessels of the Continental Navy. The history of the U.S. Army noncommissioned officer (NCO), dating back to 1775 with the birth of the Continental Army, is discussed in the next chapter. There are four chapters on intelligence, including the role of Army rangers and Thomas Knowlton. A brief chapter describes the musket drill. Army-supplied histories of four major battles provide vivid accounts: Camden, King's Mountain, Philadelphia, and the Virginia Campaign.

This definitive history of American xenophobia is "essential reading for anyone who wants to build a more inclusive society" (Ibram X. Kendi, New York Times-bestselling author of *How to Be an Antiracist*). The United States is known as a nation of immigrants. But it is also a nation of xenophobia. In *America for Americans*, Erika Lee shows that an irrational fear, hatred, and hostility toward immigrants has been a defining feature of our nation from the colonial era to the Trump era. Benjamin Franklin ridiculed Germans for their "strange and foreign ways." Americans' anxiety over Irish Catholics turned xenophobia into a national political movement. Chinese immigrants were excluded, Japanese incarcerated, and Mexicans deported. Today, Americans fear Muslims, Latinos, and the so-called browning of America. Forcing us to confront this history, Lee explains how xenophobia works, why it has endured, and how it threatens America. Now updated with an epilogue reflecting on how the coronavirus pandemic turbocharged xenophobia, *America for Americans* is an urgent spur to action for any concerned citizen.

*Leaves of Grass* The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

How America's high standard of living came to be and why future growth is under threat In the century after the Civil War, an economic revolution improved the American standard of living in ways previously unimaginable. Electric lighting, indoor plumbing, motor vehicles, air travel, and television transformed households and workplaces. But has that era of unprecedented growth come to an end? Weaving together a vivid narrative, historical anecdotes, and economic analysis, *The Rise and Fall of American Growth* challenges the view that economic growth will continue unabated, and demonstrates that the life-altering scale of innovations between 1870 and 1970 cannot be repeated. Robert Gordon contends that the nation's productivity growth will be further held back by the headwinds of rising inequality, stagnating education, an aging population, and the rising debt of college students and the federal government, and that we must find new solutions. A critical voice in the most pressing debates of our time, *The Rise and Fall of American Growth* is at once a tribute to a century of radical change and a harbinger of tougher times to come.

Since its original landmark publication in 1980, *A People's History of the United States* has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the street, the home, and the workplace. Known for its lively, clear prose as well as its scholarly research, *A People's History* is the only volume to tell America's story from the point of view of -- and in the words of -- America's women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country's greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women's rights, racial equality -- were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus's arrival through President Clinton's first term, *A People's History of the United States*, which was nominated for the American Book Award in 1981, features insightful analysis of the most important events in our history. Revised, updated, and featuring a new afterword by the author, this special twentieth anniversary edition continues Zinn's important contribution to a complete and balanced understanding of American history.

In an extraordinary blend of narrative history, personal recollection, & oral testimony, the author presents a sweeping history of Asian Americans. He writes of the Chinese who laid tracks for the transcontinental railroad, of plantation laborers in the canefields of Hawaii, of "picture brides" marrying strangers in the hope of becoming part of the American dream. He tells stories of Japanese Americans behind the barbed wire of U.S. internment camps during World War II, Hmong refugees tragically unable to adjust to Wisconsin's alien climate & culture, & Asian American students stigmatized by the stereotype of the "model minority." This is a powerful & moving work that will resonate for all Americans, who together make up a nation of immigrants from other shores.

Kessel (Ohio State University, emeritus) draws on the presidencies of Eisenhower through Clinton to examine the president in the context of the institutional presidency and the political environment. The role and importance of the White House staff is emphasized, and the relationships between the White House and Congress and the media are examined. Kessel also evaluates each contemporary president based on their successes and failures in policy. c. Book News Inc.

*This dissertation offers a history of Indian removal as a political issue from the War of 1812 to the signing of the Indian Removal Act in 1830. Its central argument is that federal removal policy emerged and evolved due to a precise and largely unforeseen sequence of events. Drawing on Indian treaties, journals of negotiations, minutes of cabinet meetings, Congressional debates, personal memoirs, and a variety of other sources, the dissertation charts and elucidates the evolution of United States Indian policy from a diplomatic to a domestic concern. One of the central themes of the dissertation is how most white statesmen gradually, once Anglo-American dominion was established east of the Mississippi River after the War of 1812, abandoned long-held notions of "assimilation" and instead viewed the American Indian communities as the quintessential "other." Chapter 1 examines American-Indian relations at the outbreak of the War of 1812. It argues that the federal government's policy toward the Native Americans was both contradictory and incompatible with the nation's desire for western expansion. Chapter 2 describes the establishment of American hegemony in eastern North America during and immediately after the War of 1812. Chapter 3 considers the efforts of the James Monroe administration to reform the contradictory modes of interacting with the Indians. It argues that these efforts were stymied by the determination of Georgia to remove all Indians from their state, which led to clashes between the federal government and the state over Indian affairs. Chapters 4 and 5 discuss the fraudulent Treaty of Indian Springs, conducted with the Creeks in 1825, and its aftermath. They argue that the controversy over the treaty and its subsequent annulment created a political environment in which removal came to be viewed by the majority of politicians as the only solution to the tensions both in the American government and in the southern borderlands. Chapter 6 argues that Andrew Jackson inherited an unofficial policy of Indian removal in 1829 and describes the efforts of his administration to codify removal as official policy. Chapter 7 delineates the debate over the removal bill in Congress and the subsequent vote.*

While conventional wisdom points to the Arab-Israeli War of 1967 as the gateway for the founding of the first Arab American political organization, such advocacy in fact began with the Syrian nationalist movement, which emerged from immigration trends at the turn of the last century. Bringing this long-neglected history to life, *The Making of Arab Americans* overturns the notion of an Arab population that was too diverse to share common goals. Tracing the forgotten histories of the Free Syria Society, the New Syrian Arab National League, and the Institute of Arab American Affairs, the book restores a timely aspect of our understanding of a region (often called Syria) that comprises modern-day Syria, Lebanon, Jordan, Israel, and Palestine. Hani Bawardi examines the numerous Arab American political advocacy organizations that thrived before World War I, showing how they influenced Syrian and Arab nationalism. Bawardi further offers an in-depth analysis exploring how World War II helped introduce a new Arab American identity as priorities shifted and the quest for assimilation intensified. In addition, the book enriches our understanding of the years leading to the Cold War by tracing the Arab National League's transition to the Institute of Arab American Affairs and new campaigns to enhance mutual understanding between the United States and the Middle East. Illustrated with a wealth of previously unpublished photographs and manuscripts, *The Making of Arab Americans* provides crucial insight for contemporary dialogues.

The American-born author describes her family's experiences and impressions when they were forced to relocate to a camp for Japanese in Owens Valley, California, called Manzanar, during World War II, detailing how she, among others, survived in a place of oppression, confusion, and humiliation. As author of *Citizen Power* in 1971, Senator Mike Gravel determined that much of what he wrote then is apropos in America today; hence, the release of *Citizen Power: A Mandate for Change* that reflects the accuracy of his evaluation of problems then, his current position on a number of issues facing America now, and the process that Americans can undertake to become empowered as lawmakers in partnership with their elected officials. Most chapters of *Citizen Power: A Mandate for Change* present material from the original book, as well as new information and revised positions. The exceptions are Chapter 2: *The National Initiative*, and Chapter 7: *The War on Drugs*. Unlike dry history books, *What Makes America Great?* is written in a breezy, personal style. It makes history come alive with humanizing stories about the men and women who made America great. Chapter 1 provides objective proof of America's greatness, using a lot of statistics. Chapters 2 and 3 cover the early history of America and explain why we revolted. Chapter 4 explains our victory over England in the American Revolution, a tremendous upset. Few Americans know how the colonists achieved this astounding feat. Some modern "debunkers" like to say that our founding fathers acted out of selfishness rather than principle. Chapter 5 shows the idealism of our founders and details the sacrifices made by the signers of the Declaration of Independence. Our founding fathers were faced with the exciting but daunting task of creating an entirely new kind of country. Well-educated men, they based the United States on principles developed by the world's greatest philosophers. Chapter 6 starts with Moses and goes through Locke and Voltaire. Each philosopher's ideas are related to American ideals. The Declaration and the Constitution are the two greatest publications mankind has ever known. But they weren't created out of thin air. Chapter 7 discusses the precedents our forefathers studied before drafting these two great documents. In Chapter 8, each American war is discussed in the light of whether it was just or unjust. Chapter 9 covers the role of immigrants in shaping America. It shows the challenges, obstacles and contribution of each immigrant group. No country is perfect, not even America. Chapter 10 discusses the five areas in which America has done wrong: Indians, slaves, women, prejudice, and education. Chapter 11 is a glimpse into the future of America.

A longtime professor of Ethnic Studies at the University of California at Berkeley, Ronald Takaki was recognized as one of the foremost scholars of American ethnic history and diversity. When the first edition of *A Different Mirror* was published in 1993, Publishers Weekly called it "a brilliant revisionist history of America that is likely to become a classic of multicultural studies" and named it one of the ten best books of the year. Now Rebecca Stefoff, who adapted Howard Zinn's best-selling *A People's History of the United States* for younger readers, turns the updated 2008 edition of Takaki's multicultural masterwork into *A Different Mirror for Young People*. Drawing on Takaki's vast array of primary sources, and staying true to his own words whenever possible, *A Different Mirror for Young People* brings ethnic history alive through the words of people, including teenagers, who recorded their experiences in letters, diaries, and poems. Like Zinn's *A People's History*, Takaki's *A Different Mirror* offers a rich and rewarding "people's view" perspective on the American story.
