Roulette is a percentage game, and winning occasionally is simple. The aim is to win consistently. After watching, listening, and playing all over the world, Brett Morton distilled a wealth of information—and began to understand why he had been losing so often. Each spin of the wheel is a new and usually random event. Every spin is a fight against the casino's advantages. It was a challenge to debunk the theorists, especially those who had never played. His research and hard work proved he was right—winning consistently is possible. Morton explains the methods to use, rates many of the well-known systems, but above all brings a clear and refreshing vision to this exciting game.

Beating the Casinos at Their Own Game

Roulette, Breaking the Bank and Winning Monster

*Roulette game has been around for centuries and yet gamblers have gone broke just over 2.7% house edge. Now you may laugh at me and comment that I am losing 2.7% at every spin cumulatively. Of course you are right in saying that and you may tell me that it is highly negative expected value in the long run. But can you ignore these facts Roulette will produce winning and losing streaks Roulette will allow gamblers to win big by giving them 36 times of whatever they put straight up If a person goes hot and gets 2 times a number correct he stands to win 36*36 times the amount bet consecutively. Giving you returns of 1296 times or if you just bet 25 dollars which anyone can afford to lose in a casino he will have won 32 thousand 400 dollars or $32,400. Now with such low house edges anyone can go on a hot streak, but everyone loses. And now if I tell you I have a system that will allow you to take shots at the game of Roulette and if you win you compound your profits and cut losses and take profits then certainly the casinos will a lot fun, a lot entertainment and a hell lot more fun, then would you deny it? In this manual and in the coming pages I am going to convey to you the secrets of my winning system of Roulette, every Roulette player must read this book at least one and what have you got to lose? You are just going to get saved a lot of money and this is an indispensable guide to winning in casinos a cart full of money, all crisp 100 dollar bundles. And who knows you may even break the bank at roulette table. A lot of players go to the casinos and assume they are lucky and going to win and this is the wrong mentality to win at poker, because if you believe you are going to win you are going to compound your losses following bad strategies like Martingale. The Martingale strategy works best for the casino and they prevent losses by limiting the maximum amount of bets that could be placed and of course players like you and me don't have access to infinite resources that will allow us to keep doubling our bets forever. We need to win big and we need to win with a small amount of money. In this manual I am going to give you solid advice that will allow players to reduce the house edge of casinos and who knows if everyone read my book probably the casinos will stop the game of Roulette altogether. Because I have a system that really does beat the casinos. And the rules which I will tell you precisely in later part of the book are as follows 1.Take Profits 2.Try to go on a hot streak 3.Cut losses 4.Go for big wins like betting straight up 5.An intuitive pattern recognition system that makes phrases out of meaningless numbers for identification of wheel bias. (This works on every Roulette Wheel in Vegas, Atlantic City, every casino in the world and all machines open and closed and even automatic Roulette machines which have a ball inside a chamber) This is a short book that will give you the right tools to approach the game of Roulette and every chapter will convey the topics that I have told you above and you must use all of these tools at once so that you will make big money or be break-even or have very little losses in the game of Roulette. Good Luck and wish you a lot of fun and entertainment in the casinos."*

Winning Strategy Explained Step-By-Step

This book is the latest sensation in casino gambling. In the strictest sense imaginable it is about making money. Seasoned players as well as those new to the game will find it easy to adapt to this system. Its author has more than two decades of experience playing the game of roulette. The book addresses the greatest single reason why most people lose while playing roulette, that is, the odds are in the house's favor. It is a strategy that's uncomplicated and easy to learn, presented in a book that is loaded with examples and illustrations. It demonstrates how to improve your odds of winning, shows how to win quickly, and more importantly how to manage your money after you become a winner. Unlike other strategies, the amount of starting cash needed to use the system is relatively small. The results you will achieve using this system will be astonishing and seem downright criminal. One of the key elements of this strategy is progressive betting while protecting your bets as you go through steps in the progression. Can you imagine yourself winning over a thousand dollars in just three spins of the roulette wheel, and doing this with an initial investment of just thirty dollars? We will show you how to be the best possible roulette player you can be. You will thank your lucky stars for having found the strategy contained in this book. While no one can guarantee that you will win every time you enter a casino, nonetheless, having a strategy that works will determine those who will be winners most of the time. We promise, once you have read this book, you will never go back to playing roulette the same old way again.

The simple system that profited me $687,503. It's real and got me banned from a German casino. It still works today and the only thing casinos can really do is ban you. Casinos don't want this information to be known.It works at online or real casinos. On new or old wheels.It still works today but I'm now 62 years old and don't have the stamina to play.

Most gaming books tell you too much fluff, razzle dazzle and too many pages on the one subject that is not needed. This book is designed to cut to the chase, giving you quick knowledge of blackjack, roulette, and craps. In blackjack using card recognition is an unbalance of face cards vs. face value cards, doubling down hitting twelve when the dealer is weak, also not taking even money or insurance. By understanding the ratios are in your favor. Learning how to count every card in a six or eig

Continuing his series of books on the mathematics of gambling, the author shows how a simple-rule game such as roulette is suited to a complex mathematical model whose applications generate improved betting systems that take into account a player's personal playing criteria. The book is both practical and theoretical, but is mainly devoted to the application of theory. About two-thirds of the content is lists of categories and sub-categories of improved betting systems, along with all the parameters that might stand as the main objective criteria in a personal strategy - odds, profits and losses. The work contains new and original material not published before. The mathematical chapter describes complex bets, the profit function, the equivalence between bets and all their properties. All theoretical results are accompanied by suggestive concrete examples and can be followed by anyone with a minimal mathematical background because they involve only basic algebraic skills and set theory basics. The reader may also choose to skip the math and go directly to the sections containing applications, where he or she can pick desired numerical results from tables. The book offers no new so-called winning strategies, although it discusses them from a mathematical point of view. It does, however, offer improved betting systems and helps to organize a player's choices in roulette betting, according to mathematical facts and personal strategies. It is a must-have roulette handbook to be studied before placing your bets on the turn of either a European or American roulette wheel.

"Professional gambler John Patrick's books are among the most popular gaming books in the country. He takes players out of the red and keeps them in the black. His basic theory - that a player should be satisfied with a generous ten percent return on investment - can't be faulted. After all, if banks pay a much, much smaller return for holding money for a year, what's wrong with ten percent for a half hour's pleasure? Patrick knows roulette. It is the number-one gambling attraction in Europe and Asia and is becoming increasingly popular in American casinos. As he urges in his other books, Patrick cautions players to manage money shrewdly. They should be disciplined to press ahead when the wheel is spinning in their favor and pull back on a losing streak. He also asks that players become familiar with house rules. Blunders caused by ignorance still add up to losses. If possible, he tells players to patronize tables with a single rather than a double zero. And, above all, never bet on single numbers: That is suicidal."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved
