The Bismarck is perhaps the most famous – and notorious – warship ever built.

Completed in 1941, the 45,000-ton German battleship sank HMS Hood, the pride of the British Navy, during one of the most sensational

after her completion. Her wreck still lies where she sank, 4,800m down and 960km off the west coast of France. Drawing on new research and technology, this edition is the most comprehensive examination of

than 57,000 people had gathered in the Brooklyn Navy Yard on the day she was launched. As she went through her "shakedown" period, she returned repeatedly to that same naval yard for adjustments and modifications. Many New Yorkers, including

1930s and early 1940s. The navy was originally uncertain whether the ships should be fast enough to counter the Japanese Kong? class, which was believed by the

Online Library The Battleship Uss North Carolina Super Drawings In 3d

United States to be capable of 26 knots (30 mph; 48 km/h), or should sacrifice speed for additional firepower and armor. The Second London Naval Treaty's requirement

that all capital ships

metric tons) meant that
the desired objectives

of the United States Navy declared that it was in favor of design "XVI-C," which called for a speed of 30 knots (35 mph; 56 km/h) and a main battery of nine 14-inch (356

roles, as they would have

Online Library The Battleship Uss North Carolina Super Drawings In 3d

warships in the Standard-type battleship classes, the first three of which, the Nevada, Pennsylvania and New Mexico, formed the US Navy's main force in the inter-war period. The

Online Library The Battleship

Standard-types reflected a new design philosophy: by designing each class to meet common standards of maneuverability and handling, vessels of different classes could

Online Library The Battleship Uss North Carolina Super Drawings In 3d

operate as a single tactical unit without being limited by the performance of the slowest and least maneuverable ship. At the time of their construction, these ships

Online Library The Battleship Uss North Carolina Super Drawings In 3d

incorporated the latest design features such as triple gun turrets. Although they were rendered increasingly obsolete by evolving naval doctrines and the

with distinction
throughout World War II.
