stories and his gothic style. He was born in 1809 in the USA and died in 1849. After studying languages at the University of Virginia he went to the army in the end of the 1820s and started to write short stories in the 1830s. The narrator of "Black Cat" has been analyzed by different authors.

Fisher, for instance, has the intention to figure out the motivation of Poe. His book analyses different short stories with diverse topics. For "Black Cat", he chooses a psychological view. This focus is close to the topic of that work. However, the analysis of Fisher is

superficial, because he comes to the conclusion that the narrator is emotionally fragile, without giving a deep argumentation. The most detailed work is given by Susan Amper and Harold Bloom. Different topics are analyzed; strategies for the interpretation of

"Black Cat" were given and different approaches to understanding the narrator are mentioned. That means the story could be read supernatural, psychological or skeptical. Even so, the argumentation could be deeper. For this reason, the psychological analysis

of the narrator with a psychological test could be seen as desideratum. Filling that gap, by analyzing him on a psychological way, is the main target of this work.

A representative of Poe's tales of the sea, "Ms. Found in a Bottle" follows the writer's infatuation

with the horrific and unknown forces around us. An avid reader just like his creator, the narrator finds solace within books and ancient lore, thus testing the limits of one's imagination, and at the same time paving the road for further exploration of the unknown. Poe's

otherworldly narrative could easily fall in the same category as the sea voyages and tribulations described by later authors such as Herman Melville and Joseph Conrad. Edgar Allan Poe (1809-1849) was an American poet, author, and literary critic. Most famous for his poetry, short

For over twenty years, psychologist Richard Wiseman has examined the quirky science of everyday life. In Quirkology, he navigates the oddities of human behavior, explaining the tell-tale signs that
