In 2011, Janet Devlin wowed X-Factor judges and charmed the nation with her unique vocals and performances. She consistently received the highest consecutive public vote out of all the contestants and gained a place on the live arena tour. But rather than this steering her towards greater musical success, Janet faced numerous challenges which almost cost her her career... "Believe it or not, you're holding my life in your hands. Not the picture-perfect version we've all become accustomed to, thanks to social media. This is my life as I've lived it – no filters.Each chapter in this book unlocks the truth behind a song from my album Confessional. They span ten years of intense self-discovery married with a lot of self-sabotage. My broken brain has taken me to dark places both in my own head and in the real world. But, with destruction comes creation. I genuinely hope that My Confessional does not personally resonate with you and that you've not been to the same Hell that I've come to call Home, but if you have let my life be proof that it all works out in the end. I see now that the world is truly what we make of it and that everything happens for a reason. Or, at least, that's what I tell myself. Here lyeth my confessional of the sins I want so much to be free from and to finally forgive myself for what I've done. I confess.Janet Devlin"

A fascinating read for anyone from general readers to hardcore fans and scholars, this encyclopedia covers virtually every aspect of the zombie as cultural phenomenon, including film, literature, folklore, music, video games, and events. The proliferation of zombie-related fiction, film, games, events, and other media in the last decade would seem to indicate that zombies are "the new vampires" in popular culture. The editors and contributors of Encyclopedia of the Zombie: The Walking Dead in Popular Culture and Myth took on the prodigious task of covering all aspects of the phenomenon, from the less-known historical and cultural origins of the zombie myth to the significant works of film and literature as well as video games in the modern day that feature the insatiable, relentless zombie character. The encyclopedia examines a wide range of significant topics pertaining to zombies, such as zombies in the pulp magazines; the creation of the figure of the zuvembie to subvert decades of censorship by the Comics Code of Authority; Humans vs. Zombies, a popular zombie-themed game played on college campuses across the country; and annual Halloween zombie walks. Organized alphabetically to facilitate use of the encyclopedia as a research tool, it also includes entries on important scholarly works in the expanding field of zombie studies. • Provides comprehensive coverage of topics about or relating to zombies in film, literature, folklore, and popular culture • Features work from contributors who are dedicated scholars, authors, or fans in the zombie genre of work • Supplies dates with all names and works to give readers a sense of the historical context and evolution of zombie lore • Includes concept entries—for example, comedy, free will, and weapons—that place works in a logical, thematic context

This new Rough Guide is devoted to pop music, the tacky, catchy yet enduring music we grew up listening to when we should have been listening to something more profound. We celebrate the hits, the singers, the impresarios and the songs which have made up the soundtrack to our lives. So come along pop pickers, put on your blue suede shoes (or your tartan trousers or puffball skirt, it's your call) and take a stroll down Electric Avenue. Not aarf!
Features include: bull; The Stars A celebration of those performers, from Robbie Williams to Andy Williams (and Madonna to Mungo Jerry), who have had us singing along or, in the case of Dean Friedman and Kajagoogoo, left us wondering what the world is coming to.

Could we analyze power-sharing through the rear-view mirror? The politics of Lebanon and Northern Ireland are relevant case studies to answer this question. Using Pierre Nora's lieux de memoire scheme of historical memory, this book crafts a theory of sites of social interaction (SSI) and strategies of social cohesion in power-sharing institutions. SSIs and cohesion strategies that increase tensions will cause power-sharing failure in the long run, and vice versa. Thus, there is a causal link between power-sharing and ethnic tensions in divided societies, through mechanisms of SSIs and cohesion strategies. Lebanon and Northern Ireland encode power-sharing with different sites of social interaction and cohesion strategies, as a reflection of a society's composition and institutional design, respectively. Power-sharing implementation provides the missing link in our knowledge of power-sharing and ethnic tensions. At Boston College, this work won the 2021 Donald S. Carlisle Award for academic excellence in political science.

"Soules's excellent book makes sense of the capitalist forces we all feel but cannot always name... Icebergs, Zombies, and the Ultra Thin arms architects and the general public with an essential understanding of how capitalism makes property. Required reading for those who think tomorrow can be different from today."— Jack Self, coeditor of Real Estates: Life Without Debt In Icebergs, Zombies and the Ultra Thin, Matthew Soules issues an indictment of how finance capitalism dramatically alters not only architectural forms but also the very nature of our cities and societies. We rarely consider architecture to be an important factor in contemporary economic and political debates, yet sparsely occupied ultra-thin “pencil towers” develop in our cities, functioning as speculative wealth storage for the superrich, and cavernous “iceberg” homes extend architectural assets many stories below street level. Meanwhile, communities around the globe are blighted by zombie and ghost urbanism, marked by unoccupied neighborhoods and abandoned housing developments. Learn how the use of architecture as an investment tool has accelerated in recent years, heightening inequality and contributing to worldwide financial instability: • See how investment imperatives shape what and how we build, changing the very structure of our communities • Delve into high-profile projects, like the luxury apartments of architect Rafael Viñoly's 432 Park Avenue • Understand the convergence of technology, finance, and spirituality, which together are configuring the financialized walls within which we eat, sleep, and work Includes dozens of photos and drawings of architectural phenomena that have changed the way we live. Essential reading for anyone interested in architecture, design, economics, and understanding the way our world is formed.

Hearing Harmony offers a listener-based, philosophical-psychological theory of harmonic effects for Anglophone popular music since the 1950s. It begins with chords, their functions and characteristic hierarchies, then identifies the most common and salient harmonic-progression classes, or harmonic schemas. The identification of these schemas, as well as the historical contextualization of many of them, allows for systematic exploration of the repertory's typical harmonic transformations (such as chord substitution) and harmonic ambiguities. Doll provides readers with a novel explanation of the assorted aural qualities of chords, and how certain harmonic effects result from the interaction of various melodic, rhythmic, textural, timbral, and extra-musical contexts, and how these interactions can determine whether a chordal riff is tonally centered or tonally ambiguous, whether it sounds aggressive or playful or sad, whether it seems to evoke an earlier song using a similar series of chords, whether it sounds conventional or unfamiliar.

How Lulu Lost Her Mind

Best of the Cranberries

A propulsive and chillingly prescient novel of suspense and terror from the Bram Stoker award–winning author of The Cabin at the End of the World and A Head Full of Ghosts. “Absolutely riveting.”— Stephen King In a matter of weeks, Massachusetts has been overrun by an insidious rabies-like virus that is spread by saliva. But unlike rabies, the disease has a terrifyingly short incubation period of an hour or less. Those infected quickly lose their minds and are driven to bite and infect as many others as they can before they inevitably succumb. Hospitals are inundated with the sick and dying, and hysteria has taken hold. To try to limit its spread, the commonwealth is under quarantine and curfew. But society is breaking down and the government’s emergency protocols are faltering. Dr. Ramola “Rams” Sherman, a soft-spoken pediatrician in her mid-thirties, receives a frantic phone call from Natalie, a friend who is eight months pregnant. Natalie’s husband has been killed—viciously attacked by an infected neighbor—and in a failed attempt to save him, Natalie, too, was bitten. Natalie’s only chance of survival is to get to a hospital as quickly as possible to receive a rabies vaccine. The clock is ticking for her and for her unborn child. Natalie’s fight for life becomes a desperate odyssey as she and Rams make their way through a hostile landscape filled with dangers beyond their worst nightmares—terrifying, strange, and sometimes deadly challenges that push them to the brink. Paul Tremblay once again demonstrates his mastery in this chilling and all-too-plausible novel that will leave readers racing through the pages . . . and shake them to their core.

“In the wilds of the Northern California mountains, all the inhabitants of a small town have gone missing. It’s as if the people picked up and left everything they owned behind. Fearing something supernatural might be going on, the FBI taps a source they’ve consulted in the past: the werewolves Charles Cornick and Anna Latham. But Charles and Anna soon find that a deserted town is the least of the mysteries they face. Death sings in the forest, and when it calls, Charles and Anna must answer. Something has awakened in the heart of the California mountains, something old and dangerous-and it has met werewolves before”--

“Humanity has a new weapon against the living dead and that weapon is Steven Schlozman!” --New York Times bestselling author Max Brooks "I've written and made films about zombies for over forty years. In all that time, I've never been able to convince my audience that zombies actually exist. On page one of THE ZOMBIE AUTOPSIES, Steven Schlozman takes away any doubt. This fast-moving, entertaining work will have you chuckling...and worrying." --George A. Romero, director of Night of the Living Dead "Gruesome and gripping! Steven Schlozman reveals the science behind zombies from the inside out." --Seth Grahame-Smith, New York Times bestselling author of Abraham Lincoln: Vampire Hunter "With THE ZOMBIE AUTOPSIES, Steven Schlozman redefines 'weird science' for the 21st Century. Brilliant, bizarre and wonderfully disturbing." --Jonathan Maberry, New York Times bestselling author of Rot & Ruin and Patient Zero "Dr. Steve's 'Zombie Autopsy' will charm and excite a new generation into loving science." --Chuck Palahniuk, New York Times bestselling author of Fight Club As the walking dead rise up throughout the world, a few brave doctors attempt to find a cure by applying forensic techniques to captured zombies. On a remote island a crack medical team has been sent to explore a radical theory that could uncover a cure for the epidemic. Based on the team’s research and the observations of renowned zombie expert Dr. Stanley Blum, THE ZOMBIE AUTOPSIES documents for the first time the unique biology of zombie organisms. Detailed drawings of the internal organs of actual zombies provide an accurate anatomy of these horrifying creatures. Zombie brains, hearts, lungs, skin, and digestive system are shown, while Dr. Blum’s notes reveal shocking insights into how they function—even as Blum and his colleagues themselves begin to succumb to the plague. No one knows the ultimate fate of Dr. Blum or his researchers. But now that his notebook, THE ZOMBIE AUTOPSIES, has been made available to the UN, the World Health Organization, and the general public, his scientific discoveries may be the last hope for humans on earth.

The book begins in Berkeley in 1968, and ends with a piece on Dylan’s show at the University of Minnesota—his very first appearance at his alma mater—on election night 2008. In between are moments of euphoric discovery: From Marcus’s liner notes for the 1967 Basement Tapes (pop music’s most famous bootlegged archives) to his exploration of Dylan’s reimagining of the American experience in the 1997 Time Out of Mind. And rejection; Marcus’s Rolling Stone piece on Dylan’s album Self Portrait—often called the most famous record review ever written—began with “What is this shit?” and led to his departure from the magazine for five years. Marcus follows not only recordings but performances, books, movies, and all manner of highways and byways in which Bob Dylan has made himself felt in our culture. Together the dozens of pieces collected here comprise a portrait of how, throughout his career, Bob Dylan has drawn upon and reinvented the landscape of traditional American song, its myths and choruses, heroes and villains. They are the result of a more than forty-year engagement between an unparalleled singer and a uniquely acute listener.

*When there's no more room in hell, the dead will walk the earth. . . And law enforcement is ready to take them down! Teaching with film is not a new approach in the social studies classroom. Different publications, such as Hollywood or History, have bridged the gap with challenges attached to using historical film and engage students through inquiry, not entertainment. To continue with the Hollywood or History strategy, this text uses television shows (sitcoms) to brings issue-centered curriculum to middle and high school classrooms. By exploring issues in specific episodes, students can learn the history behind an issue, relate it to their lives, and develop an informed decision associated with the issue. The College, Career, and Civic Life (C3) framework is an integral part to the exploration of issue-centered curriculum. In each chapter, the students will work through the four dimensions and develop critical thinking, reading, and writing skills. My hope is that this text can play a small role in walking practicing teachers through the C3 framework while allowing students to learn about issues that affect society and the communities where they live.

"Describes the mystery, cool characteristics, and interest in zombies, including historical and contemporary examples"--Provided by publisher.

This book looks at the role of popular music in constructing the myth of the First World War. Since the late 1950s over 1,500 popular songs from more than forty countries have been recorded that draw inspiration from the War. National Myth and the First World War in Modern Popular Music takes an inter-disciplinary approach that locates popular music within the context of the war and the influence of the war on the music. The book explores how the war influenced by their country's 'national myths': How does popular music help form memory and remembrance of such an event? Why do some songwriters stick rigidly to culturally dominant forms of memory whereas others seek an oppositional or transnational perspective? The huge range of musical examples include the great chansonniers Jacques Brel and Georges Brassens, the socially aware rock of The Kinks and Pink Floyd; metal legends Iron Maiden and Bolt Thrower and female iconoclasts Diamanda Galás and PJ Harvey.

This is a comprehensive overview of zombie movies in the first 11 years of the new millennium, the most dynamic and vital period yet in the history of the zombie genre. It serves not only as a follow-up to its predecessor (The Zombie Movie Encyclopedia, McFarland 2001), which covered movies from 1932 up until the late 1990s, but also as a fresh exploration of what makes the zombie such a compelling figure. The book includes a critical analysis of the zombie as creature in more than 280 feature-length movies, from 28 countries and filmed on six continents. Encompassing experimental film and video, essay film, gallery-based installation art, and digital art, Jihoon Kim establishes the concept of hybrid moving images as an array of impure images shaped by the encounters and negotiations between different media, while also using it to explore various theoretical issues, such as stillness and movement, indexicality, abstraction, materiality, afterlives of the celluloid cinema, archive, memory, apparatus, and the concept of medium as such. Grounding its study in interdisciplinary framework of film studies, media studies, and contemporary art criticism, Between Film, Video, and the Digital offers a fresh insight on the post-media conditions of film and video under the pervasive influences of digital technologies, as well as on the crucial roles of media hybridity in the creative processes of giving birth to the emerging forms of the moving image. Incorporating in-depth readings of recent works by more than thirty artists and filmmakers, including Jim Campbell, Bill Viola, Sam Taylor-Johnson, David Claerbout, Fiona Tan, Takeshi Murata, Jennifer West, Ken Jacobs, Christoph Girardet and Matthias Müller, Hito Steyerl, Lynne Sachs, Harun Farocki, Doug Aitken, Douglas Gordon, Stan Douglas, Candice Breitz, among others, the book is the essential scholarly monograph for understanding how digital technologies simultaneously depend on and differ film previous time-based media, and how this juncture of similarities and differences signals a new regime of the art of the moving image.

In a new edition featuring a new preface, A World of Arms remains a classic of global history. Widely hailed as a masterpiece, this volume remains the first history of World War II to provide a truly global account of the war that encompassed six continents. Starting with the changes that restructured Europe and its colonies following the First World War, Gerhard Weinberg sheds new light on every aspect of World War II.

Actions of the Axis, the Allies, and the Neutrals are covered in every theater of the war. More importantly, the global nature of the war is examined, with new insights into how events in one corner of the world helped affect events in often distant areas.
